JPM skeptical of vaccines, advocates herbal remedies

By Guardian Reporter

PRESIDENT John Magufuli yesterday expressed skepticism on vaccines fronted by foreign entities to curb health challenges in Tanzania, and instead pushed for local solutions.

Speaking in Chato District, Geita Region, during the official launch of Silayo Forest Plantation, the president said there are more questions than answers in the commitment of the global vaccine industry to save Africans and the world from diseases.

Citing the Covid-19 pandemic, Dr Magufuli discouraged embracing various vaccines being developed and rolled out, instead calling on Tanzanians to go for traditional remedies such as steam inhalation.

"If they (vaccine developers) were genuine; they would have already brought us vaccines for HIV, cancer, TB and malaria. Be careful with things that are brought from outside; don't think they love you that much," he told the gathering.

He wanted Tanzanians to stay fearless and continue taking preventive measures such as steam inhalation so as to remain safe.

President Magufuli reemphasized that; the country will not go into lockdown in whatever situation but will rather promote the use of natural remedies so as to fight

"We will not go into lockdown because of corona, we have a living God to help us, let us continue praying as well as taking preventive measures," he declared.

He told the Ministry of Health, Community Development, Gender, Elders and Children not to agree on every vaccine proposal brought before them because others are harmful to the nation.

He cited an example that "there is a certain country

Pig farmers, dealers appeal for more action as trade ban bites

By Guardian Reporter, Kahama

A WEEK after the government banned trade in pigs and consumption of pork in six Lake Zone districts following an African Swine Fever (ASF) outbreak, farmers and dealers here have appealed for enhanced government action to contain the disease so that they can resume business.

They made the call yesterday at a meeting convened by the Director of Livestock Services, Prof Hezron Nonga, who visited Kahama–the most affected district-to provide support to

a team of experts tasked with supervising effectiveness of measures taken to stop the spread of the disease.

Participating farmers and traders told the director that they have incurred extensive losses since the outbreak of the disease in the zone and consequent ban on trade of pigs and consumption of pork.

Wilson Sawa, a local trader, said selling of pork boosts other businesses and its being banned seriously affects sales of other

Bar business goes hand in hand with sale of foods like pork, so it is one of the most affected lines of business, he said, appealing to the government to act fast in controlling the disease and conduct an evaluation on developments.

Upon its conclusion, if possible they should then be allowed to continue with the business, he pleaded.

Pendo Emmanuel, who operates -pork butchery, said that before the outbreak of

Drugs czar nabs three

400g heroin seized

By Guardian Reporter

DRUG Control and Enforcement Authority (DCEA) detectives are holding three suspects in Dar es Salaam, including a ten house cell leader, for allegedly possessing 400 grammes of heroin.

The trio was also found with a sizeable amount of marijuana stuffed in nylon bags, said DCEA Commissioner General James Kaji.

He told reporters in Dar es Salaam yesterday that detective pounced on the suspects at Kunduchi suburb at the weekend, naming the suspects as Kulwa Shamas (49) who is a Juwale ten house leader, Anadhati

As a country gearing up for industrialization. Tanzania should bank on natural gas as one of the basic ingredients to making the drive a success

Mchongeza (20) and Emmanuel

"We are still holding the suspects and they will appear in court upon completion of investigations," he

With heroin addicts in the country on the rise, the government last year responded by putting up new methadone treatment centres in Tanga and Bagamoyo, and at the Tumbi Referral Hospital in Coast Region, he stated.

Detectives significant convictions towards the end of last year, with three drug traffickers and peddlers found guilty by courts and jailed, he said, listing the successful cases as including that of Yanga Omar Yanga, a Tanga

TPDC upbeat on energy adequacy Natural gas output nearly doubles

By Getrude Mbago

Tanzania Petroleum Development Corporation (TPDC) has assured industries and domestic electricity consumers of steady supply of energy as natural gas production increases to 211m cubic feet (mcf) per day.

TPDC Director General Dr James Mataragio said on Tuesday that production earlier stood at

Energy minister Dr Medard Kalemani

145mcf per day, inadequate to meet domestic demand, as Energy deputy minister Stephen Byabato visited the Kinyerezi natural gas processing plant in Dar es Salaam.

Big industries should expect reliable supply of gas on a daily basis soon, he said, noting that at the moment gas supply outstrips demand, so the corporation is working to meet industrial energy

Aweso directs water contractor to work 24 hrs to complete work

By Guardian Correspondent, Missenyi

WATER minister Jumaa Aweso has called on the contractor for Kyaka Bunazi water project to work day and night to ensure the project is completed within the time agreed as per the project contract and that there would be no extension of more time.

The minister gave the instructions on Tuesday this week when he visited the project site accompanied by his deputy Permanent Secretary Nadhifa Kemikimba.

The project contractor is China Engineering Consultant Corporation and supervised by Mwanza Urban Water and Sanitation Authority (MWAWASA) at the cost of 15.1bn/.

Aweso said the project has to be completed in time and his ministry will ensure that the people to benefit from the project get water supply as planned without any excuse.

"It must be understood that this project was among President John Magufuli's pledges and a few days ago, he was here and inquired about it, and basically he was not impressed by its progress and gave some directives which we received and that is why I am

to deliver the project within the agreed time," Aweso said.

Submitting the project's report, MWAWASA acting director Leonard Msenyele the project's supervisor said construction work was at 35 per cent whereby the contractor is supposed to construct water supply outtake source on the banks of Kagera River, 1.6km pipe laying and a water treatment plant able to pump 6.57 million litres per day as well as a 2-million litres reservoir.

He added that the contractor is supposed to implement the project at a cost of 9.4bn/- saying

is being here, hence I ask the contractor that the aim is to ensure the project is completed within the remaining six months.

> Speaking to officials under his ministry, Aweso called on them to be trustful as well as creative in implementing water projects in their areas to enable the people benefit from the funds provided by their government.

He also called all managers of water authorities in Kagera Region by March 22 this year the climax of Water Week, should ensure they have completed all the ongoing water projects in their areas and to use the day to inaugurate the projects.

JPM skeptical of vaccines, advocates herbal remedies

FROM PAGE 1

which vaccinated its young girls so as to prevent cervical cancer, but it was later found that the vaccine was meant to bar the girls from conceiving. So all these are lessons for us," he asserted.

"As the majority of people across the globe are indoors, Tanzanians should work hard to produce enough food to sell in those countries with a high demand for food supplies. So we have to invest heavily in our farms, produce enough for local consumption as well as for export," he said.

Experts have frequently been advising the public to avoid unnecessary gatherings, practice self-isolation to remain safe during this time when the world struggles to battle the spread of the flu-like Covid-19 outbreak.

Speaking on the launched forest, President Magufuli commended the Ministry of Natural Resources and Tourism for establishing the forest, one of the biggest forests in the country.

The area had become bare due to deforestation but the tree plantation has now changed the area's ecology, he said, praising efforts done by the ministry and the Tanzania Forest Services (TFS).

As part of recognition for their dedication, the farm will be named after the TFS Conservation Commissioner, Dos Santos Silayo "who has worked hard to reforest this area. So it will now be known as Silayo Forest," he said.

He said the forest industry makes a huge contribution in the country's development and it has employed over one million people.

"This is why the government has set a number of strategies to promote conservation. Tree farming has improved lives of

Tanzanians harvesting and selling tree products such as timber, thus improving their income," he stated.

Earlier, Prof Silayo said the establishment of the farm will increase production of tree raw materials and products.

"We conducted research and found that the country still has a deficiency of tree products. That's why we decided to come up with a special programme to establish more large tree farms across the country," he explained.

The forest farm had already lost its natural vegetation so establishing a farm tree could address the challenge promoting biodiversity.

"The farm has 69,000 hectares being the second one in the country after Saohill farm in Iringa Region. The demand for tree products such as timber is high inside and outside the country," he said, noting that these programmes are continuous.

In the coming years, TFS will be harvesting the trees and thus increase the county's revenue collection and growth prospects, the conservator added.

We conducted research and found that the country still has a deficiency of tree products. That's why we decided to come up with a special programme to establish more large tree farms across the country

rugs czar nabs three

resident who was sentenced to 30 years in prison after being found guilty of trafficking 1052.63 grammes of heroin.

The second case was that of Ayubu Kiboko and his wife Pili who were found guilty of trafficking 251.25 grammes of heroin and both sentenced to spend 20 years in jail.

"The third victory was against two Iranian nationals who were convicted of trafficking heroin weighing 111.02 grammes via the sea. They were jailed for 30 years,"

Prime Minister Kassim Majaliwa said in September 2018 that around 6,500 Tanzanians were on treatment for heroin addiction

in six centers since 2011, as the country battled the use and trafficking of other narcotic drugs,.

Opening the 28th meeting of heads of law enforcement agencies in Africa held in Dar es Salaam, the premier said Tanzania was the first country in Sub-Saharan Africa to launch medically assisted therapy for people with opioid use disorders.

By the end of 2017, six centers were operating, enrolling 6,500 persons with heroin use disorders, while there are upwards of 60 recovery homes. Medical personnel manning mental health units were receiving training on controlling drug addiction and behavioral disorders, he added.

Pig farmers, dealers appeal for more action as trade ban bites

FROM PAGE 1

the disease she used to sell up to 80 kilograms of pork, and with the ban she cannot afford to pay school fees for her children. "I plead with the government to look into how it can help us," the trader implored.

Frank Kimaro, another local pig farmer, argued that lack of specified pig abattoirs in the district has to some extent increased the spread of the

Municipal director Anderson Msumba said that government is working all the times to control the further spread of the disease so that other business can continue, asserting that since the team of experts from the government camped in the district, cases of the diseases are on the decrease. This is a sign that soon the situation will improve, he told the gathering.

Livestock and Fisheries minister Mashimba Ndaki said at a press conference in Dodoma on Sunday that the disease had killed 1500 pigs already, with pig farmers in Kahama, Geita, Mbogwe and

Sengerema districts losing about 375m/- in value of animals due to the outbreak.

He explained that 909 deaths were recorded in Kahama, with Geita registering 56 deaths, Mbogwe 388 animals perishing and Sengerema with 147 deaths, being 10.1 percent of 14, 814 pigs under domestication in the four districts.

Five cases have been reported in Kyerwa and one in Misungwi district, whose value is not yet ascertained." The losses cited do not include jobs lost but direct losses to farmers," he said, emphasizing that the government is doing all it takes to contain the situation.

The minister said that a team of veterinary experts had visited affected districts in efforts to help control the further spread of the disease.

Prof Nonga, in addition to detailing on steps to take to control the disease, urged farmers and those involved in pig business to adhere to quarantine measures. Whoever violates the regulation will face legal actions, he added.

intoned

FROM PAGE 1 needs as per the country's

industrialization plan.

"We are well prepared to ensure that we supply enough gas in various small and large scale industries such as petrochemical, fertilizer and others so as to facilitate smooth and costeffective operations of the factories," he said.

Gas supplies at an industrial level are geared for export to neighboring countries like Kenya and Uganda, he said, elaborating that this will be facilitated by new discoveries of natural gas in the

Likong'o area in Lindi region.

The country has sufficient gas reserves for domestic consumption and export surplus to nearby countries, he stated, with the corporation having received several requests from investors who want to establish liquefied natural gas (LNG) plants for domestic use and export.

"As a country gearing up for industrialization, Tanzania should bank on natural gas as one of the

basic ingredients to making the drive a success," he emphasized, expressing satisfaction with TPDC performance. Its various successful projects have in turn transformed the lives of Tanzanians and uplifted the country's economy, the director

TPDC upbeat on energy adequacy

"Despite all these achievements, we should not sit back. We have to continue working hard to ensure that we increase production of gas and thus cater for local demand and sell the extra to neighboring countries," he said.

Energy minister Dr Medard Kalemani recently said that the country's gas reserves so far amount to 57 trillion cubic feet (tcf), with 10 tcf slated for use in Liquefied Natural Gas (LNG) plants, 4.6tcf for petrochemical and fertiliser industries, 9.1tcf for generation of electricity.

About 3.8tcf and 1tcf supplies are meant for powering industries and homes respectively, he added.

Zanzibar's prison island investor given ultimatum to improve infrastructure

By Guardian Reporter

INVESTORS at Zanzibar's prison island have been given two-month ultimatum to improve infrastructure and services to attract tourists or risk stern legal measures from the government.

Zanzibar's tourism and heritage minister Lela Muhamed Mussa made the directives when speaking during her half-day tour of the hot tourist spot.

The minister decried the appalling state of infrastructure at the famous islet, which is home to the tourists' appealing giant land

"The government has offered you this island but that doesn't mean you have to behave as you wish," charged the minister, adding: "I had actually come here to revoke your business licence but because I have seen some works, I'm giving you the last chance.'

Lela accused the investors of ignoring the ministry's previous directives to improve infrastructure at one of the most attractive areas for tourists visiting Zanzibar.

"We saying safety of visitors should be the top priority.

Our Prison Island must be massively improved and its tourism services fully restored... we have to change; we cannot continue this way," directed minister Lela, reminding that island tourism is the country's top

"The government has trusted you with this sensitive project; let's be serious and ensure that we meet the expectations of our visitors," she added.

Project officer with Zanzibar Commission for Tourism Ramadhan Mohamed

challenged the investors to explore more tourist attractions instead of relying solely tortoises.

He proposed improvement of the natural swimming pool in the islet to attract more domestic and foreign visitors. "Prison Island is a huge brand whose image should be reflected in its services," Rifai challenged the investors.

Hotels and Lodges Tanzania Limited's Prison Island project supervisor Sheikhan Mohamed Sheikhan apologised for the anomalies, promising to rectify the situation within the minister's prescribed period.

"Huge transformations are coming; we are determined to restore the international reputation of this place," said Sheikhan, boasting of many awards that the Islet has been receiving for the past 18 years, thanks to its exemplary services.

The home of giant land tortoises, Prison Island has a beautiful beach, clean water, and fascinating history as a yellow fever quarantine station.

One of Zanzibar's never miss tourist spots, with 186 adult tortoises, receives 400 visitors daily on average, according to Sheikhan.

Huge transformations are coming; we are determined to restore the international reputation of this place

THE operation to remove herders from Ihefu Basin within Ruaha National Park in Mbarali District, Mbeya Region had adverse impacts after one herder allegedly committed suicide by hanging himself following seizure of his 50 cattle.

The herder was identified as Pawa Kandago (22), resident of Mapogoro village who is allagedly hanged himself near the Park area, just near where his cattle were seized by defence and security personnel conducting the operation.

Speaking to reporters after the burial of Kandago, the father of the deceased, and the village chairman said after failing to locate him, they begun following him at the area where he was

Herder 'commits suicide' after seizure of his cattle

grazing his livestock.

He said it appears that when he saw his cattle being taken away, he decided to go to nearby bush to cut short his life.

The deceased father Ng'wandu Sama claimed that all the animals his son was grazing were taken

He appealed to the government to return the cattle to them and was even ready to pay any fine that would be imposed according to the law.

Sama said his son has left behind a wife and two children

and therefore believes their upkeep would be difficult if the cattle were not released to them.

Mbarali District herders association secretary Matagli Mbigili lambasted the personnel conducting the operation saying they were carting away livestock that were being grazing outside the national park areas

He said after government officials including Park officials instructed them to remove their livestock from the area, they removed them as ordered, hence they had no livestock to be seized.

"In the circumstances they began seizing the animals that were not in the park area," he added.

He called on the herders to be patient during this difficult time while the authorities were working on the issue.

Mbeya Regional Commissioner Albert Chalamila said the operation to remove herders from Ihefu Basin was conducted successfully and peacefully and if anybody was found dead outside or inside the Park area should not be connected with the operation.

Hurricane leaves 24 village households without shelter

Guardian Correspondent,

Sumbawanga

TWENTY-four households in Kamsamba village, Sumbawanga District, Rukwa Region are without shelter following a huge hurricane that swept away the village homes early this week.

The village executive officer Mary Mahenge said the hurricane happened on Monday this week at around 5.00pm.

Christina Sangu, Kamsamba villager said on material day there were strong winds that drove away many residents from their homes.

She said as time went by the winds gathered speed, that again drove people outside their homes in fear of lives in case the houses collapsed.

After a few minutes they were surprised to see a huge black

cloud low in the sky with the winds increasing speed that caused roofs of 24 houses swept away with some houses collapsing.

"It was so fearful, many of us

thought it was the end of the

world, some people started weeping, while others screamed as they prayed to God to save them. We are now without shelter

and we appeal for assistance," Christina added.

The following day Miangula Ward Councillor Didas Kayanda visited the village. He supplied 120 kgs of maize flour valued at 200,000/- being aid from Kwela Member of Parliament Deus Sangu and each household was given five kgs.

The Councillor called on residents of Kamsamba village to plant trees in order to arrest wind speed whenever hurricanes occur.

Shinyanga immigration authorities nab illegal immigrants from Ethiopia

By Guardian Correspondent, Shinyanga

IMMIGRATION department in Shinyanga Region has nabbed 40 illegal immigrants from Ethiopia who were found in a hut at Bubiki village in Kishapu District.

Addressing reporters, head of Immigration department in Shinyanga Region Rashid Magetta said they were arrested at 2.00 am on Tuesday in a house owned by one Frank Gerald. Magetta said after interrogation, the immigrants said they were heading to South Africa.

However, he said his office was still

who fled before arrest, adding that the saw us some ran away and when they will appear in court for violating immigration laws.

He said during interrogation the immigrants said they succeeded to enter the country with the help of agents who deal in human trafficking, one from Kenya and another from Tanzania.

said: "We received Magetta information of these immigrants from good citizens, and we soon acted on the information with the assistance from Bubiki ward secretary.

"We arrived at the said hut and found a group of people sitting hunting for other illegal immigrants outside in the dead of the night. When

we entered the hut we found about 40 people who were illegal immigrants and arrested them."

He said the owner of the hut Frank Gerald also ran away after seeing us and he is being sought.

The arrest of these immigrants from Ethiopia comes a few days after President John Magufuli pardoned without conditions over 1,700 immigrants from Ethiopia who are waiting to be repatriated back home.

We received information of these immigrants from good citizens, and we soon acted on the information with the assistance from Bubiki ward secretary

Youth urged to increase digital platforms use to help find work

By Getrude Mbago

YOUTH in the country have been urged to be innovative, wake up and start utilising the emerging opportunities in digital platforms to improve their businesses and brands.

Chief Executive Officer of GigSpace, one of the country's digital platforms, Ashura Babi said there are countless opportunities in the internet and various digital networks which are yet to be grabbed by many youth.

According to her, digital space is no longer optional as it has a number of opportunities which in-turn brings positive impacts to people's lives, so the youth should make sure that they grab the opportunities positively.

Babi said that GigSpace, is

selling platform- works to connect people to various opportunities.

She also said that young people can only be competitive in driving their agenda on social networks if they are able to reach their audience with the right content in a timely manner.

"We came up with this forum so as to support young Tanzanians grab various income generating works which are usually advertised in the digital networks, our preliminary study found that major of young people spend a lot of time searching for useless content on social networks while there is a number of opportunities which can help them transform their lives," Babi told The Guardian in an interview.

She said that due to various

a newly launched online skill challenges brought by Covid-19, majority of people including youths are jobless, so by using GigSpace, they can find various opportunities of their choice that can help them earn income online or offline.

> Steve Mawalla, GigSpace cofounder hinted on the note wanting Tanzanians to make proper use of digital space opportunities to promote businesses and brands.

> "We should no longer spend our time and bundle searching for useless issues but rather have a positive eye on what is available on the internet. GigSpace has a lot of opportunities to fit various professions. These include accountants, journalists, lawyers, policy makers, traders and so

many," he said.

EWURA advises LPG suppliers to adhere to rules and regulations governing the sector

By Guardian Correspondent, Mbeya

THE Energy and Water Utilities Regulatory Authority (EWURA) has urged suppliers of Liquefied petroleum gas (LPG) cylinders to adhere to the rules and regulations governing the business by ensuring that products are sold at the required standards as well as ensuring safety of the product to

acting regional **EWURA** manager, Muhiba Chakupewa made the call yesterday during training for entrepreneurs aimed at building their capacity on gas energy use.

He said: "It is the duty for every gas energy supplier to weigh gas cylinder before selling to customers on the pretext that it would help determine the

required volume based on the Nyamamu, urged domestic gas current price."

According to him, EWURA Act requires suppliers of LPG cylinders to ensure that the product's brand and gross weight of a cylinder are clear to his/her customers. "It is strictly prohibited to alter with gas cylinder Company different from the one he works for due to a potential explosion."

"We have identified a serious breach of the agreement between us and the suppliers of domestic gas cylinders, the law requires the distributor to use scales when weighing, something most of them don't do it. But we'll also continue to provide education on the importance of using scales in the interest of all parties," said Chakupewa.

EWURA Engineer Raphael

Financial experts urge govt to

broaden tax-base, reduce VAT

consumers to be careful with the use of such energy by ensuring that before starting to use the cylinder must stay 15 to 30 minutes for the safety of the user.

He said it is best before using the gas cylinder to rest for a specified period of time with the user to ensure that it is properly covered to avoid air leakage or leakage.

The engineer advised the public to be vigilant with the use of domestic gas, including reporting to EWURA when they detect a leak or have a problem to protect their safety.

He also urged the suppliers and sellers of gas cylinders to adhere to the rules, regulations, standards, and procedures required in protecting the health and safety

of consumers to avoid harm.

By Correspondent Theresia Victor

FINANCIAL experts have suggested the need for the government to broaden its taxbase and reduce value-added tax (VAT) to the citizens for the country's social and economic development.

They made the suggestion yesterday in Dar es Salaam when speaking at a one-day tax reform symposium, organised by Liberty Sparks, a non-profit organisation promoting focused on and improving individual understanding of economic, social, and political issues in the country.

Evance Exaud, Liberty Spark Chief Executive Officer said that the government needs to expand its base on collecting tax and reduce VAT to businessmen and citizens at large. "We all need to pay tax for the country's socioeconomic development, but there is a need to have a uniform system

that will compel all people to voluntarily pay taxes, something

that will reduce high VAT," he said. According to Exaud, tax reform

is an important component in fiscal policy and should be considered in light of the current social and economic development the country has.

The expert noted that tax reforms in the country are vital for the government to be able to secure enough funds needed to finance economic and social development projects.

A Dar es Salaam-based financial consultant, Ester Abayo added that the government needs to broaden the tax base by promoting compliance in all regions, with an emphasis on fastgrowing secondary cities.

She asked the government to

come up with a similar system on VAT, whereby everyone pays taxes regardless of the business size.

"If all people pay taxes then there should be a relief in paying VAT as contrary to the current situation whereby few people pay the taxes at the expense of others," she said.

She suggested the need for putting in place stern measures against tax evaders.

Another financial expert, Michael Kiande called on political will and the government's commitment if it is to broaden the tax base.

VAT needs to be reduced on products so that every person can be able to pay taxes as high VAT thwarts development and encourages tax evasion, the expert suggested.

REST IN PEACE 1943-2021

Ambassador (Ret.) Richard Elisante Mariki

The Board of Directors, Management and Staff of Geita Gold Mining Limited (GGML) have received with deep sorrow news of the sudden passing of its Non-Executive Director, Ambassador (Ret.) Richard E. Mariki which happened in Dar es Salaam. Amb. Mariki served as a Director of the Board and Chairman of the Company's Audit Committee from November 2011 and faithfully discharged his duties until his untimely demise on 24th January 2021. The Board regrets and mourns the death of Ambassador Richard Elisante Mariki.

At the time of his passing, Ambassador Mariki was also the Chairman of the GGML's Board Audit Committee.

Prior to retirement from civil service, Ambassador Mariki worked in various positions growing through the ranks in the Ministries of Finance, Foreign Affairs, Information, Home Affairs and Planning Commission. He also served as a Board Director in various government, parastal and private organizations including Air Tanzania, the National Insurance Corporation, Geita Gold Mining Limited and Maendeleo Bank. During his distinguished years of service to the country, Ambassador Mariki participated in numerous international missions, including annually to the World Bank, the International Monetary Fund and the African Development Bank.

Following his retirement, he worked as a Project Coordinator in the World Bank funded projects in the Ministry of Water and Tanzania Revenue Authority (TRA). He was also the first Chairman of the Tanzania Communications Regulatory Authority (TCRA).

Ambassador Mariki will be profoundly remembered for his diligence, kindness and wisdom. AngloGold Ashanti and GGML extends its heartfelt condolences to his family, the corporate community, the Evangelical Lutheran Church in Tanzania (ELCT) and all other stakeholders mourning the passing of our beloved Richard.

May his soul rest in eternal peace. Amen.

THURSDAY 28 JANUARY 2021

Taking A New Look At The News ESTABLISHED IN 1995

Conserving indigenous food resources can reduce stunting

reduced growth rate in human development. It is a primary manifestation of malnutrition or more precisely undernutrition and recurrent infections, such as diarrhea and helminthiasis, in early childhood and even before birth, due to malnutrition during fetal development brought on by a malnourished mother. The definition of stunting according to the World Health OrganiSation (WHO) is for the height for age value to be less than two standard deviations of the WHO child growth standards median.

As of 2012 an estimated 162 million children under 5 years of age, or 25 per cent, were stunted. More than 90 per cent of the world's stunted children live in Africa and Asia, where respectively 36 per cent and 56 per cent of children are affected. Once established, stunting and its effects typically become permanent. Stunted children may never regain the height lost as a result of stunting, and most children will never gain the corresponding body weight. Living in an environment where many people defecate in the open due to lack of sanitation, is an important cause of stunted growth in children, for example in India.

Former Prime Minister Mizengo Pinda has said that the only way to address the serious problem of malnutrition which threatens the well-being of the country at the moment is to encourage the cultivation of nutritious crops to reduce stunting from 32 to 24 per

Pinda made the call this week when he speaking at the pan-African summit aimed at exploring the role of traditional

TUNTED growth is a vegetables in strengthening and diversifying food systems, reducing poverty, energising the industry, and improving health and income for all citizens.

> The three-day forum brought on board a number of experts on the sector from across the continent and the world at large.

> He said that in order to reduce thinning to less than five per cent, the rate set by the World Health Organisation (WHO), there is a need to increase production of horticultural products from 7,230,217 tonnes to 14,600,000 tonnes by 2025.

> "If we're to achieve these goals, we need to identify a number of factors, including capacity building of local government and private institutions to reduce the cost of certification of exports, especially vegetables, whose main investors are women and youth," the ex-premier said.

According to the Food and Agriculture Organisation of the United Nations (FAO), a total of 821 million people suffer from malnutrition-related disorders.

Pinda who is also a chairman of the Agri Thamani Foundation, said in Tanzania, malnutrition is a serious problem, whereby the 2018 nutrition status data, shows that more children are the highly affected group.

Statistics show that children aged 0 to 5, three million children stunted and 1.3 million children are underweight, while at the same age group, five million are anemic. Three million children of the same age are Vitamin A deficiency-a leading cause of preventable blindness in children and increase the risk of disease and death from severe infections such as diarrhoeal disease and measles.

Land rights for women crucial for African development

WNERSHIP is the or fact of exclusive rights and control over property, which may be any asset, including an object, land or real estate, intellectual property, or until the nineteenth century, human beings. Ownership involves multiple rights, collectively referred to as title, which may be separated and held by different parties.

The process and mechanics of ownership are fairly complex: one can gain, transfer, and lose ownership of property in a number of ways. To acquire property one can purchase it with money, trade it for other property, win it in a bet, receive it as a gift, inherit it, find it, receive it as damages, earn it by doing work or performing services, make it, or homestead it. One can transfer or lose ownership of property by selling it for money, exchanging it for other property, giving it as a gift, misplacing it, or having it stripped from one's ownership through legal means such as eviction, foreclosure, seizure, or taking. Ownership is self-propagating in that the owner of any property will also own the economic benefits of that property.

Despite recent advancements in land reforms across Africa, women and girls are still hugely disadvantaged, according to a recent meeting of experts. The 2020 Africa Land Forum (ALC), which took place online between 15 and 17 September last year, brought together 500 participants to explore the theme 'Delivering on the African Union Agenda 2063 by Promoting People-Centered Land Governance in Africa'.

Discussions revealed that when it comes to land rights the issue of inclusion and gender equality is still a massive challenge on the continent, and while women continue to provide the largest portion of agricultural labour across Africa, they do not benefit from an equitable, secure land tenure system.

In 2015, the African Union (AU) Commission, the United Nations **Economic Commission for Africa** and the African Development Bank launched a campaign to ensure that 30 per cent of the land in Africa is in the hands of women by 2025. Improving women's access to and ownership and control of land is crucial if African countries are to meet a number of Sustainable Development Goals by 2030, ranging from Goal 1 on poverty eradication to Goal 5 on gender equality to Goal 8 on decent work.

There is little continent-wide data regarding land ownership, but according to a 2018 working paper from the World Bank, based on data representing more than three-quarters of Africa's population, just under 13 per cent of African women (aged 20-49 years) claim sole ownership of land, compared with 36 per cent of African men. And when it comes to joint ownership, just 38 per cent of African women report owning any land (alone or jointly), compared with 51 per cent of African men.

A lack of access to land leaves women and girls at the mercy of a highly patriarchal system, deepening gender inequality and severely curtailing their social, economic and political progress.

Creating a viable innovative ecosystem in Nigeria

By Inyene Ibanga

Y the time more state governments undertake deliberate actions to foster accessible platforms for tech enthusiasts and innovators, Nigeria may truly be on course to increasing the number of young IT professionals with the requisite skills to drive sustainable growth in her digital economy.

Digital technology most powerful force driving change and efficiency across the global economy today. The transformative nature of digital innovations cuts across every facet of human activity and the environment we operate in. Its impact on lives and the way we do things are enormous and pervasive, because its power transcends physical borders and

The disruptive impact of digital technologies is most evident in agriculture, health, education, transportation, trade and commerce, the banking and security sectors. These crucial areas encompass the art and science of humans living in harmony with the physical environment.

In fact, society remains in an unending race to catch up with the rapid evolution of digital technology. As society is learning to use the latest digital technology, newer and more innovative ones are being introduced.

Emerging technologies such

as Artificial Intelligence (AI), Blockchain, Internet of Things (IoT), Industrial Internet of Things (IIoT), 3D Printing and Robotics are creating significant social and economic effects in most countries of the world.

These emerging technologies are facilitating rapid growth, efficiency, the effective exchange of knowledge, as well as easier communication among individuals, businesses nations.

With the advent of the Fourth Industrial Revolution (also referred to as 4IR or 4.0), the boundaries between the physical, digital and biological spheres are fast disappearing and would become non-existent sooner than later.

While most advanced and developing countries have adopted the digital mode as the new and enduring enabler of their national economies, others are yet to transit from the conventional economy to the digital one.

Presently, Nigeria is developing a digital-led growth strategy to accelerate growth and upgrade the national economy through the "Smart Nigeria Digital Economy Project", for the sustainable diversification of the economy.

This involves a gradual repositioning of the nation's economy into one driven by technology and innovation to improve security, check corruption and harness the unlimited opportunities in both the continental and global markets. A case in point was the recent

Jigawa Innovative Summit tagged "Creating Viable Innovative Ecosystem for National Development", organised by the Jigawa state government in collaboration with the National Technology Information Development Agency (NITDA) and an NGO, Youth Coalition for Development (YCD).

With ongoing implementation of the digital economy, more Nigerian youths are becoming actively engaged in technological and economic activities. Digital technology has opened up a new vista for them to explore and expand their imagination and creativity.

Digital technology offers as a veritable platform for the youths to channel their restlessness into productive and problem-solving activities that foster efficiency, create opportunities, boost technology development and innovation.

States and local governments, tech companies, startups, investors, academia, NGOs, among others, have major roles to play towards creating the enabling environment to stimulate software development and innovations for solving our local socio-economic problems.

For Nigeria to produce competent manpower needed to develop the relevant technologies and innovations for solving our domestic problems, it behooves on states government to start replicating the ICT initiatives of the Federal Government within their domains.

Through strategic collaborations with a broad spectrum of stakeholders within and beyond the tech sector, state governments would be able to convince the youth to contribute the resources needed for expanding digital knowledge and expertise.

Evidently, there is so much the state governments stand to gain when they effectively collaborate with private and public sector stakeholders in the technology and innovations. They need to create relevant agencies to drive the tech revolution in their respective states.

The regular engagement between state governments and the public and private sectors, experts, technopreneurs, academia, and other stakeholders would encourage the exchange of ideas on how to exploit the competitive advantage in their respective states and formulate strategies that can help unlock opportunities and prosperity for their youths.

By the time more state governments undertake deliberate actions to foster accessible platforms for tech enthusiasts and innovators, Nigeria may truly be on course to increasing the number of young IT professionals with the requisite skills to drive sustainable growth in her digital economy.

By Lehlohonolo Mofokeng

OTWITHSTANDING multiple barriers impede learner academic achievement, chief among them is that we are hardly ever held accountable as teachers. And I know of young teachers who have lost their flair and drive because of poor influence caused by toxic work environments.

This year, 2021, marks five years since I joined the teaching profession on a full-time basis. When you enter the profession, you do so, like any ambitious young person would, with high hopes and sky-high energy levels. The thought of transforming the lives of young people keeps your nails polished like a Miss Universe pageant contender.

As the years progress, kneehigh motivation levels replace sky-high optimism levels. Because of often toxic and anti-progress organisational cultures in some of our schools, these young teachers see fitting in, thereby succumbing to pressure, as the only way they will be treated well by their

Five years, counting: My experiences as a township teacher in South Africa

colleagues.

I know of young teachers who have lost their flair and drive because of poor influence caused by toxic work environments. After all, every human being wants to feel like they belong and this is possible if we get along with every colleague around us, regardless of the consequences.

While emphasising the value of building relations, a fellow young teacher asked me these challenging questions to which I could hardly provide convincing answers: "I hear you, but how do you belong to a group of colleagues whose career aspirations and values are incongruent with yours? How do you remain committed to your call of duty while the dominant culture in your school is that of gossip, sabotage and hopelessness?"

Well, it's possible to blend well with such people, but you have to have a strong character and stable convictions about your

So, what has five years in teaching taught me? First on the list is that you are in charge of your professional growth. The school may have a committee responsible for teacher professional development, but it serves no purpose if teachers do not see value in exposing themselves to the latest novel

trends in education. Because of perceived limited career growth, prospects in teaching and the "I have arrived" syndrome, continuous teacherinitiated development is still a rarity. Available research clearly shows that teachers who prize continuous professional development tend to do better in terms of improving their classroom practice and inevitably learner achievement outcomes.

I also take issue with how we account for our academic performances as teachers. Since my arrival at my current

school, teachers, especially those teaching the lower grades, hardly ever account for their classroom performance in a manner akin to those teaching matric. Perhaps more worrying is that supervisors hardly follow up on the commitments we make to improve our results. Instead, in most cases where I have witnessed this, your records only come out when there is a visit by departmental officials - at which stage it is often too late to salvage anything.

One thing I have noticed about teachers is that once we know that supervisors, including principals, hardly ever follow up on anything we say regarding our classroom practice, we discard from our memory whatever was discussed in these "accountability" sessions.

Notwithstanding multiple barriers that impede learner academic achievement, chief among them is that we are hardly ever held accountable as teachers.

Proper disposal methods for medical wastes key in improving public safety

By Correspondent Devota Mwachang'a

THE Tanzania Medicines and Medical Devices Authority (TMDA) has identified the correct disposal methods and more than five steps to be followed in disposal of unsafe medicine, medical devices and reagents to ensure environmental protection.

The medicines and medical devices considered unsafe when they are counterfeit, substandard, expired, improperly sealed, prohibited and adulterated.

According to the authority, medical wastes should not be disposed off together with other wastes to avoid damaging living things and polluting the environment.

Speaking to journalists who visited the TMDA headquarters in Lake Zone recently, the authority's Drug Inspector in Lake Zone, Magesa Njegera said disposal of medical wastes should be in accordance with Articles 49 and 85 of the Medicine and Medical Devices Act and 2099 guidelines for medicines

"It is important to dispose of medicines and leftovers in a proper way so that we don't destroy the environment and other living organisms," said Njegera.

He explained that medicine seller as well as those dealing with supply of medical devices who voluntarily applying for the disposal services are supposed to have a record of expired medicine and medical devices with dealers name, medical generic name, power of medicine, expire date, types of medicines (capsule, injection, tabs), reasons and the value of the products.

"The medicines disposal is done in accordance with existing laws; we also make sure that we comply with the National Environmental Management Council (NEMC) Act," Njegera said, noting the disposal exercise is conducted in collaboration with other institutions such as the police force, pharmacist, environmental officer and the owner of the disposed consignment.

He warned the public against irresponsible disposal of medical wastes, citing their health and environmental hazards.

This comes amid growing attitude of some members of the public, who randomly throw away wastes including solid and liquid medicines instead of dumping them in rubbish

Magesa, said any leftover drug should be properly disposed with directives as in hos-

"I advise the members of the public to bring any medicine leftovers to any hospitals near, because they have incinerators (incinerator is a furnace for burning waste) instead of throwing anyhow in open pits, which endanger environment," he said, added, the authority was yet to conduct study to determine the magnitude of the problem of irresponsible disposal of medical wastes in homes.

According to him, TMDA has legal mandate to manage disposal of medical wastes, adding that the procedure should be followed as guidelines issued in 2009.

"There are two types of medical waste disposal voluntary and involuntary disposal. The involuntary disposal is done when the authority seizes medicines and medical devices over various reasons, including poor quality or counterfeit and disposing them according to the law.

"When someone wants to do involuntary disposal, they should first submit their request to the TMDA on their intention and lists of drugs to be disposed attached to the request. "After confirming the products and their value, the authority arranges a date and place where the wastes would be disposed.

The authority is also responsible for informing other institutions to be involved in the disposal exercise, including the police force, district environment officer and oth-

"It's very important to consider proper ways of destroying unfit medicines and medical devices, because the procedure guarantees complete disposal of the medical wastes of substandard drugs and thus avoid effects to the environment and people's health," he stated.

Gaudensia Simwanza, TMDA's communication and public education manager called on health facilities and private pharmacies to avoid unsafe disposal of expired medicines in residential areas, insisting them to follow the available guidelines.

"Expired medicines and medical devices should be taken back to the authority for proper disposal. This will save the people and the environment," she said.

Sophia Mziray, TMDA lake zone manager, said the authority continues to move its services closer to the people and improve the quality services to meet their expectations in line with the international ISO standards. 9001: 2015 and ISO / IEC 17025: 2005.

She said the authority has been conducting pre-testing inspections and disposing of unsafe medicines and medical devices to ensure the products continue to be produced, stored, maintained and processed in a quality, safe and effective manner.

The manager added: "Our zone is fulfilling its regulatory responsibilities including inspection of areas that produce, sell, store and medicines, medical devices and packaging in accordance with the Medicines and Medical Devices Act Chapter 219."

She urged the community to continue working with TMDA to find out how best the authority runs its operations, medicines, medical devices and reagents controlling including realizing more about the hazards of utilizing substandard medicines and medical devices with the aim of protecting public

Increased risk for Nigerians as drug smugglers rebrand tramadol

In July 2019, two senior officials of Chad's Ministry of Foreign Affairs were arrested for tramadol trafficking. Under a 2018 Nigerian government policy, tramadol is a restricted pharmaceutical product used to treat severe pain and can be administered only through prescription by medical professionals. By Maurice Ogbonnaya

ANUFACTURERS in India have rebranded the opioid tramadol to tafrodol so as to evade detection by customs officials at Nigeria's ports and borders. While the name change makes the drug look like tramadol, tafrodol contains two ingredients that should not be combined and can reportedly cause respiratory infection, coma and even instant death.

The rebranding comes shortly after several shipments of tramadol were seized at Nigeria's border posts. Between 2 and 19 August, 2020, the Nigeria Police Force, Nigerian Drug Law Enforcement Agency (NDLEA) and National Agency for Food and Drug Administration and Control (NAFDAC) intercepted 33 containers of tramadol shipped from India worth N1.3-trillion in three different locations in Lagos.

Analysis by the ENACT organised crime project found that Lagos serves as a major market for tramadol originating from Asia and shipped in through Cotonou in Benin. From there it is distributed legally and illegally to other parts of Nigeria, especially Edo and Kano states.

Under a 2018 Nigerian government policy, tramadol is a restricted pharmaceutical product used to treat severe pain and can be administered only through prescription by medical professionals. Despite this, it is widely imported, smuggled and used - particularly among young people - for recreational and non-medical purposes. Health experts warn that this constitutes a threat to health security in the country.

Ahmed Yakasai, the former president of the Pharmaceutical Society of Nigeria, told ENACT that tramadol's rebranding for shipment into Nigeria had been ongoing for some time. He said there was "a criminal collaboration between some pharmaceutical companies in Asia, especially India, and criminal gangs in Nigeria that import tramadol in concealed brands into the country." Examples include tapentadol, an opioid medication used to treat severe pain.

Reasons for the rebranding include crackdowns by regulatory agencies over the past two years. In November 2018, 581 million tramadol tablets, worth over N241-million and weighing about 118 metric tons, were seized in Lagos by NDLEA. In June 2020, customs seized 379 packs of tramadol worth over N56-million in Kaduna. These efforts have been complemented by restrictions on the movement of people and goods as a result of Covid-19.

As a result, the quantity of tramadol in circulation across Nigeria has plummeted causing demand and prices to rise. Dr Ibrahim Abdul Abubakar, NDLEA head in Kano state, told ENACT that a 20kg pack of tramadol sells for as much as N2O-million in Nigeria, especially on the black market. It's popular among armed insurgents and terror groups from Niger, Mali and Libya for use by their fighters.

Officials from NDLEA and NAFDAC, who spoke to ENACT on condition of anonymity, say that tramadol smuggling persists despite all measures because of the involvement of corrupt officials. "Colleagues from sister agencies are involved in this," said a senior NDLEA member. He said when other regulatory agencies record seizures at ports, they send cases relating to cannabis and other illicit drugs to NDLEA for prosecution, but rarely for tramadol.

This was confirmed by a NAFDAC director, who told ENACT that while some agencies were working hard to address the challenge, others were sabotaging it. Two factors enable public sector corruption in the smuggling of illicit drugs into Nigeria. First, the bribes offered run into millions of US dollars, and second, those who have resisted the offers from the smuggling networks have been threatened or killed, Yakasai said.

Besides the complicity of government officials, the porosity of Nigeria's entry points and national borders facilitate the trade of tramadol and illicit substances. Beyond rebranding, smugglers "have learnt to adopt some models of concealment that are yet unknown to law enforcement agencies," said Abubakar.

The rebranding of tramadol to evade detection is a dangerous trend in the smuggling business. The continued illicit trade of the drug despite government restrictions raises questions about the adequacy, capacity and integrity of regulatory institutions.

Although Nigerian government responses to transnational organised crime including tramadol smuggling have varied, they face fundamental challenges. These include poorly equipped and motivated regulatory agencies, porous borders and the lack of cooperation from locals, especially those living in border communities.

The government will need to strengthen policy and law regulating the importation, sales and distribution of controlled drugs, including tramadol. Prosecutions should target officials involved in the smuggling of tramadol, along with illegal distributors and sellers. The public must be educated on the dangers of the recreational use of tramadol. Placing the medication on a higher schedule of restricted drugs may also help.

Nigeria also needs to use diplomatic channels with India to deal with the smuggling ring and block the routes currently being used from India to Nigeria. This should include collaboration between the two countries' law enforcement agencies, especially for information sharing, controlled deliveries and container control in ports.

Reasons for the rebranding include crackdowns by regulatory agencies over the past two years. In November 2018, 581 million tramadol tablets, worth over N241-million and weighing about 118 metric tons, were seized in Lagos by NDLEA

Exim Bank rewards school fees, trip to the winners of its Chanja Kijanja Campaign

By The Banker Reporter

XIM Bank has announced the winners of its latest 'Chanja Kijanja with Exim Bank Mastercard' campaign, at the bank's headquarters in Dar es Salaam

The 1-month campaign, which ran from December 2020 to January 2021, aimed at encouraging the bank's customers to pay for all their transactions, being in shops or online platforms with their bank cards to enjoy the convenience whilst at the same time stand a chance to win various prizes.

Of the three lucky winners of the campaign, it was witnessed two winners opted for the reward of being paid schools fees plus all school equipment for one child of each, while the other winner opted for an all-expenses-paid trip to visit Serengeti National Park in a companion of his loved one.

"Exim Bank understands the challenges parents face during the school reopening season. Many of our bank staff are parents, so we understand the challenges. The rewards would ease the financial burden on parents and guardians in acquiring and providing school materials for their children," Silas Matoi Head of Alternative channels and digital transformation told reporters during the occasion.

He said: "Providing customers with rewarding banking experiences that offer them valueadded benefits, has always been our number one priority at Exim Bank. We are delighted that our 'Chanja Kijanja with Exim Bank Mastercard' campaign has concluded with tremendous success resulting from the enthusiastic participation of our customers."

"As a result, Exim bank has seen a huge increase in the online and mobile banking

Exim Bank's Head of Alternative channels and digital transformation Silas Matoi (C), addresses journalists in Dar es salaam regarding winners of the bank's 'Chanja Kijanja na Exim Mastercard' that is aimed at encouraging its customers to shop and spend online with their bank cards. Others include the bank's senior officials, Callist Butinga (L) and Paritosh Babla. PHOTO: The Banker Correspondent

Asian shares step back, Microsoft's brisk earnings boost tech optimism

TOKYO

SIAN equities slipped on investors Wednesday as looked to the Federal Reserve's guidance on its monetary policy while futures for U.S. tech shares jumped after strong earnings from Microsoft.

European stocks are expected to slip a tad, with EuroStoxx 50 futures down 0.3 percent and FTSE futures shedding 0.4 percent.

MSCI's gauge of Asian ex-Japan shares slipped 0.2 percent, dragged lower by profittaking in resource shares as some investors have grown wary of stretched valuations.

"The global economy appears to be losing momentum a bit and there is no clear sign yet that COVID-19 infections are slowing even after vaccinations have started in some places. I expect shares to get stuck in a range for a while," said Hisashi Iwama, senior portfolio manager at Asset Management

But the tech sector remained a bright spot after Microsoft's earnings lifted Nasdaq futures 0.5 percent while Japan's Nikkei also rose 0.3 percent.

Microsoft shares rose 3.7 percent in

extended trading after its Azure cloud computing services grew 50%, boosting optimism for other U.S. tech giants, including Apple and Facebook, which announce quarterly results later in the day.

"Microsoft's earnings were superb, even compared with strong market expectations," said Norihiro Fujito, chief investment strategist at Mitsubishi UFJ Morgan Stanley Securities.

"Those tech firm shares have been in a bit of the doldrums since August but they are likely to lead the market again, given their solid outlook," he said.

At their peak in August, the combined market capitalisation of the top five biggest U.S. tech companies, which also include Amazon and Alphabet, reached 24.6 percent of the U.S. blue chip S&P500 index. It stood at 22.7%, still well above 15% two years ago.

S&P500 futures were mostly flat, capped by caution ahead of the Fed's policy meeting as well as profit-taking on cyclical shares after stellar gains this month.

The S&P500 is now trading at 22.7 times its expected earnings, near its September peak of 23.1 times, which was its most inflated level since the dotcom bubble in

A surge in shares of video games company Gamestop driven by retail investors also raised some concerns that a rally propelled by loads of stimulus money from governments and central banks has become extreme. Still, analysts expect the U.S. Federal Reserve to stick to its dovish tone to help speed the economic recovery when it concludes its two-day policy Together, on the right path meeting on Wednesday. U.S. stimulus talks are also in focus with U.S. Senate Majority Leader Chuck Schumer saying Democrats will move forward on President Joe Biden's \$1.9 trillion coronavirus relief plan without Republican

support if necessary.

Benchmark 10-year notes were yielding 1.035%, having hit a three-week low of 1.028% on Tuesday on rising speculation Biden may have to scale back and possibly delay his ambitious stimulus plan.

The U.S. dollar was little moved as investors awaited the Fed's decision for clues on whether they should buy riskier currencies.

The dollar index flirted with this week's low at 90.204, while the euro held firm at \$1.2161.

Sterling rose to as high as \$1.3753, a level last seen in May 2018 while the Japanese yen changed hands at 103.70 per dollar.

The Australian dollar slipped 0.1% to \$0.7739, showing muted response to stronger-than-expected local inflation data.

Oil prices were supported by economic optimism, with U.S. crude futures trading up 0.6% at \$52.95 per

The International Monetary Fund raised its forecast for global growth in 2021, as widely expected, and many investors expect the global economic recovery from the pandemic-driven downturn to continue.

US consumer confidence edges higher; house prices accelerate

CALIFORNIA

U.S. consumer confidence rose moderately in January while lingering concerns about the COVID-19 pandemic led to a further deterioration in households' perceptions of the labor market, raising the risk of a second straight month of job losses.

But the survey from the Conference Board on Tuesday showed consumers more than willing to buy homes and automobiles in the next six months, indicating that the housing market and manufacturing industry will continue to underpin the economy.

"The slow rollout of the vaccines and the still-raging pandemic continue to depress consumer confidence despite the prospect of further fiscal aid and a brighter health situation," said Kathy Bostjancic, chief U.S. financial economist at Oxford Economics in New York.

The Conference Board's consumer confidence index increased to a reading of 89.3 this month from 87.1 in December.

The slight gain likely reflected nearly \$900 billion in additional pandemic relief provided by the government at the end of December, which lifted consumers' near-term expectations.

The was no indication that the Jan. 6 storming of the U.S. Capitol by former President Donald Trump's supporters had impacted on confidence. The cut-off date for the survey was Jan. 14. Economists polled by Reuters had forecast the index little changed at 89 in January.

The survey's present situation measure, based on consumers' assessment of current business and labor market conditions, fell to a reading of 84.4 from 87.2 in December.

The expectations index based on consumers' shortterm outlook for income, business and labor market conditions increased to 92.5 from a reading of 87.0 in December, suggesting households foresee conditions improving in the near term.

President Joe Biden has unveiled a \$1.9 trillion recovery plan from the pandemic. The new Biden administration has pledged to speed up and simplify the distribution of vaccines.

More than 25 million people have been infected by the virus, with the death toll over 420,000 since the pandemic started in the United States in early 2020.

US says \$35 billion more in pandemic loans approved, trying to fix programme snags

WASHINGTON DC

THE U.S. Small Business Administration (SBA) on Tuesday said it had approved 400,000 more pandemic relief loans worth \$35 billion and was trying to fix issues operational snags with the program raised by lenders.

The SBA launched the third round of the Paycheck Protection Program (PPP) this month, but significant changes to its rules, process and technology platform, has caused problems that were slowing approvals, a bank group said on Tuesday.

Companies looking to apply for a second PPP loan were encountering technical hurdles the American Bankers Association said, while lenders are also receiving a "high number of incorrect error messages" when they submit loan applications.

It was earlier in this month reported that government officials had pressured large lenders earlier to go live with the latest round of the program despite many unresolved issues. The SBA said on Tuesday that a review of first-time loans found anomalies - "mostly data mismatches and eligibility concerns" - in approximately 4.7 percent of the lender-submitted data.

"These concerns will require follow-up between the lender and the borrower so that borrowers can access a second round of loans," the SBA said, adding it would provide guidance to help lenders work through the problems they're encountering.

Under the PPP, companies receive loans from banks and fintech companies that will be repaid by the government if the money is spent on eligible expenses. Some \$525 billion worth of PPP loans were made last year via 5.1 million loans.

Congress expanded the program with another \$284 billion last month. It also changed the rules on who was eligible, what the money could be spent, as well as changing the process for submitting and approving loans.

Microsoft earnings rise as pandemic boosts cloud computing, Xbox sales

LOS ANGELES

MICROSOFT Corp on Tuesday reported its Azure cloud computing services grew 50 percent, the second quarter of acceleration in a business that had begun to slow as the global pandemic benefited the software maker's investment on working and learning from home.

The company's shares rose 5 percent in extended trading after gaining about 41 percent in 2020 as COVID-19 shifted computing to areas where the software maker has bet big.

It also saw a surprise recovery in sales on the LinkedIn professional social network and navigated a chip shortage that had threaten to hold back its Xbox business.

The shift to work from home due to the COVID-19 pandemic has accelerated enterprises' switch to cloud-based computing, benefiting Microsoft and rivals such as Amazon.com Inc's cloud unit and Alphabet Inc's Google Cloud.

On a conference call with investors, Microsoft executives said they expect a midpoint of \$14.83 billion in revenue from the company's "Intelligent Cloud" segment for the fiscal third quarter, compared with Wall Street expectations of \$14.12 billion, according to Refinitiv data. For the company's productivity segment and its personal computing segment, sales are expected to have a respective midpoint of \$13.48 billion and \$12.50 billion, compared with estimates of \$12.90 billion and \$11.60 billion" according to Refinitiv data.

Microsoft said GamePass, the company's \$10 monthly gaming subscription, has 18 million users, up from 15 million disclosed in September. The Xbox Live online gaming service has more than 100 million monthly active users. Microsoft did not give an update on the 115 million Teams daily users it disclosed in October but did say that the mobile version is used by 60 million daily users.

Microsoft said revenue in its "Intelligent Cloud" segment rose 23 percent to \$14.6 billion, with 50 percent growth in Azure. Analysts had expected a 41.4 percent growth in Azure, according to consensus data from Visible Alpha. The previous quarter Azure grew 48 percent.

"This was really driven by continued customer demand, with stronger-than-expected consumption as customers have increased their focus on digital transformation," Microsoft Chief Financial Officer Amy Hood told Reuters in an interview.

Atlantic Equities analyst James Cordwell said that last year, "economic weakness and delays in implementation had masked the extent to which Azure was benefiting from the accelerated shift to the cloud caused by the pandemic. But with these results that benefit is now plain to see."

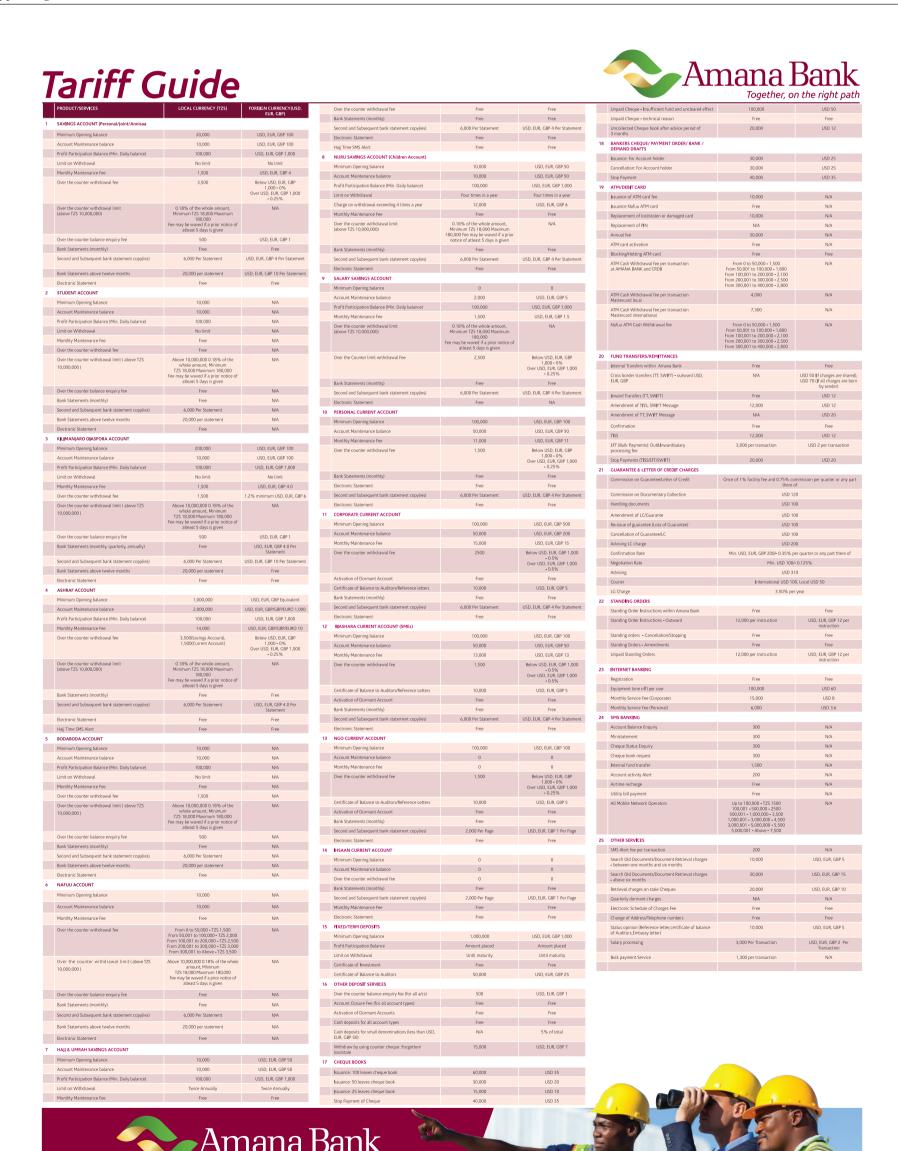

LinkedIn revenue growth, which dipped as the pandemic shut down businesses, reached 23 percent, near its pre-pandemic rate of 24 percent a year earlier. Hood said advertisements on LinkedIn drove the increase.

"We continue to see advertising market recovery," he said.

Microsoft bundles several sets of software and services such as Office and Azure into a "commercial cloud" metric that investors watch closely to gauge the company's progress in selling to large businesses.

Commercial cloud gross margins a measure of the profitability of its sales to large businesses - were 71 percent in the quarter, compared with 67 percent a year earlier.

Revenue from its personal computing division, which includes Windows software and Xbox gaming consoles, rose 14% to \$15.1 billion, driven by strong Xbox content and services growth, beating analysts' estimates of \$13.5 billion, according to IBES data from Refinitiv.

Biden's immigration changes too late for grandfather deported on Inauguration Day

CIUDAD JUAREZ

AS U.S. President Joe Biden took the oath of office last Wednesday, Felipe Ortega sat in a van handcuffed and chained at the waist and feet, headed toward Mexico and the end of his 30-year life in the United States.

A day earlier, the 58-year-old grandfather of eight U.S. citizens was on his way to work when immigration agents surrounded his car in Midland, Texas, just blocks from his home. They told Ortega he had an outstanding deportation order from 15 years ago.

After one sleepless night in jail and a long ride to the border, Ortega, a Mexican national, was sent across the international bridge at El Paso in Texas around 6:30 p.m. on Wednes-

Ortega missed by some 24 hours a dramatic policy change by the new president that could have spared him.

In one of his first acts of office, Biden rescinded an executive order by former President Donald Trump that had targeted more immigrants living in the country illegally for arrest and deportation, including those with no criminal records like Ortega.

The abrupt about-face on policy shows how, without a long-term fix from Congress, the fate of millions of immigrants can change dramatically with the flick of a presidential

Those actions can also face swift challenges in federal court, throwing more lives in limbo as legal battles drag on.

This risk was apparent on Tuesday, when a federal judge in Texas blocked a 100-day moratorium on deportations issued by the Biden administration.

Immigration and Customs Enforcement (ICE) deported more than 185,000 people

in the 2020 fiscal year, not including those quickly expelled at the border under a rule Trump put in place during the coronavirus pandemic.

Biden has pledged ICE officers in his administration will use more discretion. On his first day in office he proposed an immigration reform bill to Congress, that if passed would provide a pathway to citizenship for an estimated 11 million people living in the country illegally.

"SHOCKING"

On Tuesday Jan. 19, Ortega asked border agents before he was sent across the border if there was anything else he could do to continue fighting his case, but he says he was told

"I think that what they wanted was to kick me out before Biden signed what he signed," Ortega told Reuters in a series of phone interviews after his deportation. ICE did not respond to a request for comment on Ortega's

His wife, Maria Ortega, a U.S. permanent resident, and three adult daughters, one a U.S. citizen and the other two permanent residents, drove four hours to cross into Ciudad Juarez and meet him on the other side. The family embraced, weeping.

Ortega said his family never planned to stay long in the United States when they crossed in the 1990s. They entered on a 15-day visa intending to help his brother who was caring for a child with cancer. But the treatment dragged on for months and the Ortegas' young girls started going to school. Life took

After working a few years as a ranch hand, Ortega moved into construction, eventually going into business for himself remodeling

US President Joe Biden

"My dad is his house, his work, his family and that's it," said his middle daughter Adriana, 35, who has a special ringtone programmed in her cell phone for her father's frequent calls. "That's why it is all kind of shocking."

In 2006, Ortega was moving house from Sherman, Texas, to Midland when his truck broke down at a gas station. A local sheriff stopped to see if he needed help but then asked for his residency papers. When Ortega admitted he didn't have any, he was arrested and sent to immigration court.

He lost his case and appealed, though he said he never knew the outcome until deportation officers handed him a three-page document with the 2007 denial last week because the paperwork didn't arrive at his house after he moved, he said.

The document, seen by Reuters, said the judge believed he had not sufficiently proven his relationship to his U.S. citizen daughter and that his deportation would not cause his family enough "extreme and unusual" hardship to have his removal canceled.

A SCARRED HOMETOWN

Ortega returned to Mexico for the first time in 30 years to find his hometown of El Porvenir, around an hour south of Ciudad Juarez, totally transformed. When he and Maria started dating at 15, they would eat ice cream in the plaza and go to dances, strolling the streets late into the night, Maria said.

Now on a drive around the town a couple days after he arrived, he saw burned and abandoned buildings and few people outside, the legacy of years of violent clashes between rival drug

Staying with his brother-in-law - Ortega's only remaining relative in the city - he is trying to make himself useful around the house by fixing up the aging electrical system and other odd jobs. But he had not been prepared to live out his retirement years in a different country than his family.

Maria, who has diabetes and other health problems, has to stay close to her U.S. doctors and can't drive on her own. Adriana, a single mom, is thinking of picking up another job to help support her two aging parents on both sides of the border. Agencies

President Xi hails ROK, Belarus ties

CHINA and the Republic of Korea should make full use of the cooperation system for disease control and the "fast-track" arrangement to serve the economic growth of both nations, President Xi Jinping said on Tuesday.

Xi (pictured) made the remark in a phone call

with ROK President Moon Jae-in. He also spoke by phone with Belarusian President Alexander Lukashenko on

The growth of China-ROK trade under difficult circumstances last year demonstrated the great potential of China-ROK cooperation, Xi said, adding that the two nations should implement their consensus to expand mutually beneficial cooperation.

They should accelerate negotiations on the second stage of the China-ROK free trade agreement, promote implementation of the Regional Comprehensive Economic Partnership and build the China-ROK free trade zone at a faster pace, Xi said.

Facing changes from the COVID-19 pandemic, China and the ROK have set a model of joint disease prevention and control through effective institutional arrangements, Xi said. In May, China began "fast-track" entry systems with the ROK to facilitate essential travel, such as for business.

Noting that next year marks the 30th anniversary of China-ROK diplomatic relations, Xi said the development of bilateral ties is facing new opportunities and he would like to announce the start of the Year of China-ROK Cultural Exchanges together with the ROK president.

Moon congratulated Xi on the upcoming 100th anniversary of the founding of the Communist Party of China, saying that under the leadership of Xi, China has become the first major economy to register positive economic growth amid the pandemic.

The ROK would like to deepen cooperation with China on disease prevention and control, economy and trade, culture and education, Moon said.

In the conversation with Lukashenko, Xi said that China supports Belarus' developing on a path that fits its own situation.

China hopes Belarus maintains political stability and social tranquillity, Xi said, adding that China would like to offer help for the economic and social development of Belarus within its capacity.

The two nations should promote the high-quality development of Belt and Road projects, push forward construction of the China-Belarus industrial park and

Russia, US agree to extend New START on Moscow's conditions – senior diplomat

MOSCOW

RUSSIA and the US have START) without pre-condi- START treaty for five years. tions, as Moscow insisted, Deputy Foreign Minister Sergey Ryabkov told journalists yesterday.

"On our conditions," he said in response to a corresponding question by TASS. "For five years without pre-conditions, without any additions, without any appendices whatsoever," he added.

The senior diplomat said agreed to extend the Treaty that earlier he had exchanged on Measures for the Further notes with US Ambassador to Reduction and Limitation of Russia John Sullivan that re-Strategic Offensive Arms (New cord the extension of the New

He emphasized that the de-

cision is mutually beneficial and is the only right one. "We now have a significant amount of time in order to launch and hold profound bilateral talks on the whole set of issues that influence strategic stability, ensure security of our state for

a long period ahead.

Without a doubt, without extending the New START treaty for five years, this task

would have been much more difficult," he pointed out. "So, we welcome the decision of the Biden administration to agree to our proposal of a fiveyear extension," he added.

On January 26, Moscow and Washington exchanged diplomatic notes to reach an agreement on extending the New START treaty.

Russian President Vladimir Putin and his American counterpart Joe Biden expressed ment will be reviewed by both satisfaction with this fact in a phone conversation on Tues-

As the Kremlin press service reported after the conversation of the two leaders, the sides will soon finalize all the necessary procedures ensuring that this treaty continues to function.

On Tuesday night, Putin submitted to the State Duma the agreement to extend the New START treaty for five years without pre-conditions for ratification. The docuchambers of the parliament as early as yesterday.

ar agreement, or even if it is a similar accord with several improvements, is bad and wrong from an operational and strategic point of view," Lieutenant-General Aviv Kohavi said in an address to Tel Aviv University's Institute for National Security Studies.

Biden's predecessor, Donald Trump, abandoned the nuclear agreement in 2018, a move that was welcomed by Israeli Prime Minister Benjamin Netanyahu, who criticised the sanctions relief it offered and warned of the likelihood of Iranian nuclear arms development after its expiration. Antony Blinken, confirmed

on Tuesday as Biden's secretary of state, said last week the United States was "a long way" from deciding whether to rejoin the deal and it would

need to see what Iran actually did to resume complying with the pact.

Since Washington pulled out of the deal, Iran has gradually breached its key limits, building up its stockpile of low enriched uranium, enriching uranium to higher levels of purity, and installing centrifuges in ways barred by the

Kohavi said those actions by Iran, which denies it is seeking atomic arms, showed it could ultimately decide to push forward rapidly towards building a nuclear weapon.

"In light of this fundamental analysis, I have instructed the

Israel Defense Forces to prepare a number of operational plans, in addition to those already in place," Kohavi said.

"It will be up to the political leadership, of course, to decide on implementation, but these plans need to be on the table.'

Netanyahu had threatened possible Israeli strikes against Iran in the run-up to the accord. But a senior Israeli officer, who spoke to reporters in 2015 on condition of anonymity, underscored differences in Israel over the issue by saying a deal had potential security benefits.

Japan PM apologises after lawmakers' night club outings

TOKYO

JAPANESE Prime Minister Yoshihide Suga apologized yesterday after lawmakers from his ruling coalition visited night clubs despite his government's call for people to avoid unnecessary outings to curb the spread of COVID-19.

The news is another headache for Suga whose approval rating has tumbled due to dissatisfaction with his handling of the pandemic, which critics have called too slow and in-"I'm terribly sorry that this happened when we are asking

people not to eat out after 8 pm and to avoid non-essential, non-urgent outings," Suga told parliament.

"Each lawmaker should behave to gain the public's understanding.'

Japan this month issued a state of emergency in Tokyo and other areas to tame a sharp increase in COVID-19 cases. The measure includes a request for restaurants and bars to close by 8 pm although there are currently no penalties for non-compliance.

"My behaviour was careless at a time when we are asking people to be patient," Jun Matsumoto, a senior lawmaker from the ruling Liberal Democratic Party (LDP), told report-

Matsumoto was speaking following a Daily Shincho magazine report that he had visited two night clubs in Tokyo's posh Ginza district after dining at an Italian restaurant last

Kiyohiko Toyama, a lawmaker from the coalition's junior partner Komeito, also apologized after tabloid Shukan Bunshun reported he had visited a high-end night club in Ginza until late last Friday.

Other incidents have stoked public anger.

LDP lawmaker Nobuteru Ishihara was swiftly admitted to hospital despite not showing symptoms after he tested positive for the novel coronavirus on Friday. Agencies

China must drive growth through scientific, technological innovation

mation is on the upswing in today's world, bringing about profound changes to huand development-once again proved man development and offering a new path that mankind cannot defeat the pandemfor solving and responding to difficulties ic without science and technology.

> While analyzing the reasons behind China's major strategic achievements in its response to COVID-19, Prensa Latina, the official state news agency of Cuba, pointed out that the application of new technologies is an important part of Chi-

> na's "remedies" for the virus. Desperately needed vaccines against COVID-19, developed and tested at record speed, were selected as the first of the top ten scientific breakthroughs of the year 2020 by the Science magazine

> in the U.S. Meanwhile, the website of the British

science journal Nature listed "the effectiveness of several new vaccines will become clearer in early 2021" as one of the science events to watch for in 2021.

One promising prospect in 2020 was that digital medical services finally gained recognition, said Forbes on its website.

Scalable and sustainable digital health solutions will help improve health for everyone in the world, according to a report recently issued by the World Health Organization, predicting the development prospects of digital health in the following five years.

Scientific and technological innovation also serves as the key driving force for global economic recovery.

According to a report released by the World Economic Forum, the COVID-19 pandemic has accelerated 10 key technology trends, including online shopping and robot deliveries, digital and contactless payments, remote work, distance learning, telehealth, online entertainment, supply chain 4.0, 3D printing, robotics and drones, as well as 5G and information and communications technology.

The United Nations Department of Economic and Social Affairs called on policymakers from all countries to seize the opportunity of technological advancement to establish a digital strategy for the future and support their nations' long-term

sustainable development. China has always made innovation the

primary driving force for development. It has achieved remarkable achievements in innovation and demonstrated its strength in this regard.

China's new large carrier rocket Long March-5B made its maiden flight on May 5, 2020; its Mars probe Tianwen-1 is flying toward the red planet; the Chang'e-5 lunar probe returned to Earth with samples collected from the moon on Dec. 17, 2020.

Meanwhile, China's BeiDou Navigation Satellite System was officially commissioned and its deep-sea manned submersible Fendouzhe, or Striver, has completed sea trials in the Mariana Trench, the world's deepest natural trench in the western Pacific Ocean.

Lam urges Biden govt to view National Security Law fairly

HONG KONG

HONG KONG Chief Executive Carrie Lam Cheng Yuet-ngor expressed on Tuesday her hope that the Biden administration will review the US position on the National Security Law for Hong Kong in "a fair manner", after the Trump administration imposed "unjustified sanctions" on the city.

In a video speech at a seminar focusing on Sino-US relations, Lam said the security law comes with important features to put it on a par with, if not making it superior to, similar national security laws in other jurisdictions, including such laws in the US.

She said the Hong Kong law, which outlaws four types of acts and activities that endanger national security, also contains specific provisions to uphold Hong Kong people's rights and free-

It also provides for important principles of the rule of law, including the presumption of innocence, the prohibition of double jeopardy, and the right to a fair trial, she said. The law came into effect on June 30, after the city had been haunted by a year of street violence that began in June 2019.

The enactment of the law in Hong Kong, a special administrative region of China, was both a "necessary" and "rational" move by the central government as it is "the legitimate right and duty of every state to safeguard its national security", Lam said.

It was "lamentable if not outright resentful" for the Trump administration to impose unilateral "unjustified actions or sanctions" on the Hong Kong SAR government, businesses and individuals, she said.

As one of the sanctioned officials, Lam said she and her 11 senior sanctioned colleagues will continue to steadfastly, dutifully and lawfully carry out their duties to safeguard the country's national sovereignty, unity and territorial integrity. In fact, the implementation of the law has restored long-overdue stability, which Lam said is vitally important to the prosperity of Hong Kong and the business activities of both local and overseas enterprises.

Lam's remarks were backed by a report by the American Chamber of Commerce in Hong Kong, the largest foreign business chamber in the city. According to the report, US enterprises in the city are still optimistic about Hong Kong's

Hong Kong Chief Executive Carrie Lam Cheng Yuet-ngor

business environment after the enactment of the law.

According to the report released recently, AmCham said most surveyed businesses expect Hong Kong to remain their respective regional headquarters for the next three years, and half of the surveyed businesses are cautiously optimistic they will perform better in 2021.

Jessica Bartlett, chairwoman of AmCham HK, said earlier in a video published on the chamber's social media account that there was no exodus of US capital in the wake of the law's implementation.

Foreign Ministry spokesman Zhao Lijian, at a news briefing on Monday, said the report by AmCham is a living embodiment of how the National Security Law brings significant benefits to maintain Hong Kong's robust business environment by providing a safer, brighter, more stable and sustainable investment environment for foreign businesses.

Lau Siu-kai, vice-president of the Chinese Association of Hong Kong and Macao Studies, said the Biden administration should rescind the US' unjustifiable actions against Hong Kong as an olive branch to repair the damage by then-president Donald Trump's violation of international commerce norms.

For example, it should drop the unreasonable requirement that cityproduced exports be labeled "Made in China" and recognize the Hong Kong SAR as a separate customs territory, which it has under the city's "one country, two systems" arrange-

Lau said that if the new US administration intends to normalize relations with China, it must take the initiative to stop exploiting and hyping Hong Kong affairs and gradually abandon its all-around suppression of and containment of China.

However, he said he believes the attitude of the US-led Western camp toward the security law will not change the determination of the central government nor Hong Kong to strictly enforce the law.

Australia approves first COVID-19 vaccine for use

CANBERRA,

AUSTRALIA'S medical regulator has provisionally approved the Pfizer/BioNTech COVID-19 vaccine for use in the country.

The Therapeutic Goods Administration (TGA), the country's medical regulator, announced on Monday morning that the Pfizer vaccine met safety, efficacy and quality standards and has been approved for people aged 16 and older.

It is the first vaccine to be approved for use in Australia.The decision was welcomed by Prime Minister Scott Morrison on Monday when he attended a press conference in Canberra. "Our priority has always been to keep Australians safe and protect lives and livelihoods," he said.

"Today's approval is another big step forward for our community, particularly in the protection of our most vulnerable people."

Australians will receive two doses of the Pfizer vaccine at least 21 days apart. The government is now planning to begin vaccinations in late February - slightly later than the mid-February start date it had previously announced as a result of shipment and production delays,

with healthcare workers and the elderly to be given priority access.

In Australia the vaccine will be rolled out in five phases over the coming months and, over time, will involve more than 1,000 vaccination administration sites.

Greg Hunt, the minister for health, said that the TGA had "placed safety above all else" during the approval process.

"This approval and the upcoming rollout of the vaccine will play an important part in our ability to manage the pandemic in 2021," he said.

The Australian government has

purchased 10 million doses of the Pfizer vaccine, enough to inoculate 5 million people against COVID-19, and more than 53 million doses of that developed by University of Oxford and AstraZeneca, which must pass TGA's assessment and approval processes.

Monday's announcement came about one year since Australia confirmed its first case of COVID-19. According to the latest figures updated on Sunday evening from the Department of Health, Australia as of Sunday afternoon had 28,766 confirmed cases, 130 of which remain active, and 909 deaths, most of which were in aged care facilities in Victoria during the state's devastating second wave of infections.

Despite Australia's relative success in preventing the spread of the virus Chief Medical Officer (CMO) Paul Kelly said that Australians would have to learn to live with coronavirus.

"We will control it more this year than we did last year," he told the Special Broadcasting Service (SBS) in an recent interview."But we're going to have to learn to live with this virus. I don't think it's going to be completely eradicated anytime soon," he said.

Trump chases votes again in Senate

NEW YORK

FOR the second time in a year, members of the US House of Representatives walked over to the Senate on Monday to deliver an article of impeachment against Donald Trump, now a former president.

Speaking of the impeachment, US President Joe Biden said on Monday that he does not believe there will be enough votes to convict Trump at his trial, CNN reported.

The House charged Trump with "incitement of insurrection" over a speech preceding the storming of the US Capitol by his supporters on Jan 6, while Congress was in a joint session to confirm the Electoral College victory of Biden as president. Five people died in the chaos.

Nine House Democrats who will serve as prosecutors in the trial followed the clerk of the House and the acting sergeant-at-arms as they carried the written accusation through the Capitol Rotunda and to the Senate chamber late on Monday.

Trump's trial will start in the week beginning Feb 8. Biden said he does not

will vote to convict Trump, the number necessary if all 50 Democrats vote for a conviction, according to CNN, which said it conducted a brief interview with Biden.

It also was announced on Monday that US Senator Patrick Leahy of Vermont will preside over the trial. Leahy, 80, the longest-serving senator, also holds the title of president pro tempore of the Senate.

Supreme Court Chief Justice John Roberts, who presided over the first impeachment, will not do so on this one, reportedly over constitutional concerns about whether the chief justice should conduct the trial of a former president.

Leahy, a Democrat, also is expected to vote at the conclusion of the trial, which some Republicans questioned on Monday. He said he would take "extraordinar-

to administer "impartial jus-

"How does a Senator preside, like a judge, and serve as juror too?" Senator John Cornyn asked on Twitter.

Cornyn said Trump already has been held accountable. "One way in our system you get punished is losing an election," the senator said.

Divided chamber

The Senate is now evenly divided, 50-50, after two Democrats, Raphael Warnock and Jon Ossoff, won seats in a runoff election in Georgia this month. Vice-President Kamala Harris would vote in the event of a tie, which gives Democrats effective control of the chamber.

However, in the case of impeachment, a two-thirds majority of the Senate, or 67 votes, is needed for a convic-

The mood from Republicans in the Senate is not as supportive of Trump as it was last year, but it would take 17 GOP senators to vote with the Democrats to convict Trump. It would take a separate vote to possibly bar Trump from holding public office again.

Mountainous county in E China lifts residents out of poverty by improving infrastructure and developing characteristic industries

BY continuously improving infrastructure, building resettlement sites, and developing industries suited to local conditions, Taihu county, Anqing, east China's Anhui province, has lifted 122,000 villagers from 35,900 impoverished households in 67 poor villages out of poverty.

From 2014 to 2019, the countv. which was once one of the key counties for national development-oriented poverty alleviation work in China and a mountainous county suffering from extreme poverty, increased the per capita disposable income of farmers from 8,010 yuan (about \$1,240.75) to 12,727 yuan, with an average annual growth of 9.7 percent.

Taihu county had long been troubled by poor transportation conditions, as it has a great number of mountains and interlaced rivers and lakes, but the number of its roads and bridges was far from enough.

Since 2014, the county has made great efforts to improve its transportation infrastructure. It has built 2,586 kilometers of roads and constructed or renovated 138 dangerous bridges, ensuring that each of the relatively large natural villages in registered poor

administrative villages has a hardened road with a pavement width of no less than 3.5 meters.

To further improve the infrastructure in poor areas, especially mountainous areas, the county treated 80.27 kilometers of small and mediumsized rivers, reinforced 33 small reservoirs, transformed 70,000 mu (about 46.7 square kilometers) of small and medium-sized irrigated areas, and improved 84,500 mu of irrigated areas through a program launched to promote small facilities for water conservancy, laying a solid foundation for industrial development.

Year Plan period (2016-2020), Taihu county relocated a total of 6,298 residents from 1,820 households living in inhospitable areas in an effort to help them get rid of poverty. All the relocated residents have moved into their new homes in 59 resettlement sites on schedule.

During China's 13th Five-

WASHINGTON,

U.S. President Joe Biden on Tuesday signed a memorandum condemning the surge of anti-Asian racism in the country during the COVID-19 pandemic, while directing the Department of Justice to make more concerted efforts to address hate crimes and harassment against Asian Americans and Pacific Island-

"During the coronavirus disease 2019 (COVID-19) pandemic, inflammatory and xenophobic rhetoric has put Asian American and Pacific Islander (AAPI) persons, families, communities, and businesses at risk," said the memorandum, which is part of a series of executive orders regarding racial equity and civil rights signed by the president.

"The Federal Government must recognize that it has played a role in furthering these xenophobic sentiments through the actions of political leaders, including references to the COVID-19 pandemic by the geographic location of its origin," it said,

"Such statements have stoked unfounded fears and perpetuated stigma about Asian Americans and Pacific Islanders and have contributed to increasing rates of bullying, harassment, and hate crimes against AAPI

ment, the pandemic response from federal health authorities should demonstrate "cultural competency, language access, and sensitivity towards AAPIs."

In addition, the memorandum orders federal agencies to look into whether discriminatory rhetoric like "China Virus" is referred to in any existing policies or federal websites published by the previous administra-

It also issued guidance for the Department of Justice on how to further prevent hate crimes and harassment against these racial groups,

tion of anti-Asian hate incidents with the assistance of AAPI communities.

"It's time to act now, not only because it's the right thing to do, but because if we do, we'll all be better off for it," Biden said at a signing ceremony at the White House. The president also signed executive orders directing the Department of Housing and Urban Development to address racially discriminatory federal housing policies and the Department of Justice to end

its use of private prisons. "I think these are very promising... And I think it's

According to the docu- including better data collec- just the beginning. There's a lot more work that needs to be done," Manju Kulkarni, the executive director of Asian Pacific Policy and Planning Council (A3PCON), said of the memorandum.

Throughout last year, then U.S. president Donald Trump repeatedly referred to the coronavirus as the "Chinese virus" despite guidance from public health officials to avoid attaching locations or ethnicity to a disease.

A study published in the journal Health Education & Behavior suggests that such racist rhetoric has had a profound impact on how

see Asian Americans, noting the language led to an increased subconscious belief that Asian Americans are "perpetual foreigners."

"Research suggests that when people see Asian Americans as being more 'foreign,' they are more likely to express hostility toward them and engage in acts of violence and discrimination," said Rucker Johnson, a public policy professor at the University of California, Berkeley, and co-author of the study.

"Words matter. People are making that close association between the virus and

those in the United States Chinese people because he insisted on using that term," said Russell Jeung, chairman of the Asian American studies department at San Francisco State University.

Stop AAPI Hate, an online reporting center, recorded 2,583 anti-Asian incidents across the country between March and August last year. Victims said they were spat on, stabbed while shopping, shunned for wearing masks and barred from entering ride-hailing vehicles.

An estimated 2 million Asian Americans and Pacific Islanders have served on the front lines of combating the pandemic as health care providers, first responders, and other essential roles, according to a Huffington Post report.

keeping on cooperating with stakeholders to oversee the project," he noted.

Muhongo disclosed: "Following the directives, of Parliament, Sospeter Muhongo, has we have put the contest, which had been opted to halt the traditional dances slated for this month, on hold, and we are now concentrating on construction of the classrooms.'

He insisted that education is valuable, coordinates the contest, which gears therefore, he has opted to spend time in his towards promoting culture, disclosed the constituency to motivate people to back the project which will see to it students study in friendly environment.

He said: "Our constituency is short of 31 classrooms for the constituency' Form One classrooms, therefore efforts to construct the classrooms are in place whilst students are "Prime Minister, Kassim Majaliwa, has attending studies, they will go for different issued a directive all students should as of arrangement once the construction reaches

TTB set to use boxing bout to promote tourism

By Correspondent Ismail Tano

THE Tanzania Tourist Board (TTB) has said it will an international title bout between Tanzanian Ibrahim Mgendera and Malawian Dennis Mwale to promote the country's tourism beyond its borders.

Mgendera and Mwale will fight for the World Boxing Federation (WBF) Super Featherweight title at Next Door Arena in Dar es Salaam

The event is organized by Jackson Group Sports and will be shown to more than 150 countries around the world.

The day will also feature eight other fights involving various boxers including prominent Bulgarian boxer Tervel Pulev who has arrived along with world heavyweight boxing sensation, Kubrat Pulev, who fought British pugilist Anthony Joshua late last year.

The TTB Marketing Director, Mindi Kasiga, said that they will use the opportunity to promote the country's tourism as the bout will be seen in many countries.

"This is an opportunity for us to promote tourism and support Jackson Group Sports," Kasiga (pictured) stated.

Apart from TTB, the fight is sponsored by CRDB Bank, the bank's Brand Manager Joe Bendera said they are promoting sports in the country as they also sponsored basketball.

Bendera noted the institution moreover organized a marathon and provided education opportunities for 26 young people through basketball.

The Global Boxing Stars (GBS)'s Chief Executive Officer, Scott Farrell, said that they were interested in cooperating with the Jackson Group Sports company to develop professional

He said that their goal is to sharpen the sport's talents in the country.

Other sponsors are Azam TV, Onomo Hotel, Precision Air, Vitasa, Bono 5, Hotel Demag and

Jackson Group Sports' Chief Executive Officer, Kelvin Twissa, said preparations for tomorrow's fights have been completed and all boxers have arrived for the fights.

Twissa said that every boxer has a strong desire to win a fight the pugilist will take part in.

The day will also feature eight other fights involving various boxers including prominent Bulgarian boxer Tervel Pulev who has arrived along with world heavyweight boxing sensation, Kubrat Pulev, who fought British pugilist Anthony Joshua late last year

Firm spices up 2021 General Waitara golf tournament

SPORTS

By Guardian Correspondent

GOLF, a game once considered elitist by most local folks, is now attracting an unpredecedented attention in Tanzania.

The game now has been given impetus by the General (rtd) Waitara golf tournament which serves as the longest golf championship in Tanzania, having been inaugurated in 2006.

This years' tournament, which was supposed to be hosted last year but was postponed due to inevitable cisrcumstances, was held at the Lugalo Golf Club in Dar es Salaam last weekend.

It attracted scores of local and regional golf stars.

Sponsored by the World's number one Scotch whisky, Johnnie Walker, the contest is now well-known as the Johnnie Walker-Waitara Golf Tournament.

This year, the 18-hole game attracted over 180 golfers of top-notch local and international players who coloured the game as they tussled for the dazzling gifts that were up for grabs.

Parciticapating clubs included, Arusha Gymkhana, Mufindi Club, Morogoro Gymkhana, Dar es Salaam Gymkhana, Zanzibar's Sea Cliff Golf Club, Kili Golf, TPC Golf Club and also other professional golfers from the East Africa region and Malawi.

The tournament is organised by the Lugalo Golf Club every year and it has been dubbed 'Waitara Golf Tournament' to honour General (rtd) George Waitara for inaugurating the golf course and also for his valuable contribution to the game.

Johnnie Walker brand's sponsorship of the tournament does not come as a surprise, this being the second time that a product from Serengeti Breweries Limited (SBL)'s stable is supporting the game.

In 2019, Serengeti Premium Lite beer, SBL's Superbrands-winning beer brand, sponsored the competition.

Marketed and distributed by SBL, Johnnie Walker Scotch Whisky was first produced in Scotland 200 years ago, growing in bounds to stand out from its peers' crowd globally.

This years' tournament has coincided with the whisky's 200th anniversary.

Speaking at the gala dinner to award the leading participants, SBL's

The overall winner of this year's Johnnie Walker Waitara Trophy golf tournament, Khalid Shemndolwa (L), receives a trophy during the event's presentation ceremony, held at Lugalo Golf Club in Dar es Salaam early this week. Looking on (R-L) is a Resolution Insurance Company's representative, the Chief of Defence Forces, General Venance Mabeyo, Permanent Secretary in the Ministry of Defence and National Service, Faraji Mnyepe, and Malawi's Chief of Defence Forces, General Vincent Nundwe. PHOTO: CORRESPONDENT

"We will continue to be behind this be associated with a company that's tournament and others to come."

"We are committed to partnering with Lugalo Golf Club in lifting the game of golf in the Tanzania".

Ocitti further reassured the audience that SBL would remain committed in supporting the game because it contributes towards the growth of sports in Tanzania.

Spirits Marketing Manager, Lumuli Minga, said the brand is proud to be associated with Waitara Golf Tournament that is gaining popularity in the country rapidly.

Lumuli disclosed that Johnnie Walker brand will keep on supporting sports in the country and golf in particular.

"Johnnie Walker is a brand that believes in progress, forwardness, quality, resilience, perseverance and keeping the commitment. Just like many golf players will attest, these are some of the qualities that enable them to make it in the game", Lumuli said.

She added: "SBL, through its world class-whisky Johnnie Walker, is proud to be the main sponsor of this year's Waitara Golf Tournament. Our support to this tournament demonstrates our solid commitment to supporting sports promotion in the country".

Also speaking at the gala was the Lugalo Golf Club Chairman, Michael Luwongo, who expressed his gratitude to SBL for sponsoring the event.

He said: "We take great pride in SBL's support for the game of golf and, being aware that SBL is a great lover of sports Managing Director Mark Ocitti said: in the country, we are very happy to

committed to the developmet of all kinds of sports in Tanzania".

A high profile guest and golfer, Malawi's Chief of Defence Forces, General Vincent Nundwe, who displayed great tenacity in the game, talked of his joy and excitement to play with golf professionals within the army and local citizens.

He enthused: "Such games as golf foster good neighbourhood and friendship between countries. I'm happy to be here to represent my country, Malawi, in this tournament. I believe this is just the beginning of an outstanding and long-lasting friendship through this and similar tournaments in our region.'

Johnnie Walker Scotch Whisky brand came into existence when John Walker, an ordinary Scottish businessman, started his grocery business in Ayrshire and used varieties of single malts and blended them together to make his whisky tastier.

He eventually found a new blended whisky and named it Johnnie Walker which 200 years later is now the most preferred scotch whisky globally.

For many years, SBL has established itself as a genuine lover of sports in the

It has pursued groundbreaking schemes to strengthen the sports sectors within the country.

The firm's sponsorship permeates through golf, athletics, football, among others.

Yanga's new striker jets into Dar

By Correspondent Ismail Tano

YANGA's new striker, Fiston Abdoul Razak, is today expected to land in Dar es Salaam to join the team's camp for preparation for the Vodacom Premier League's second phase.

Fiston (pictured) is one of three players signed by Yanga in the mini transfer window, who are coming to bolster the squad that is battling to win the Premier League title this season.

The Yanga have officially started training to prepare for the domestic top flight's second phase fixtures, with the squad training held at the Avic Town camp, Kigamboni in the city.

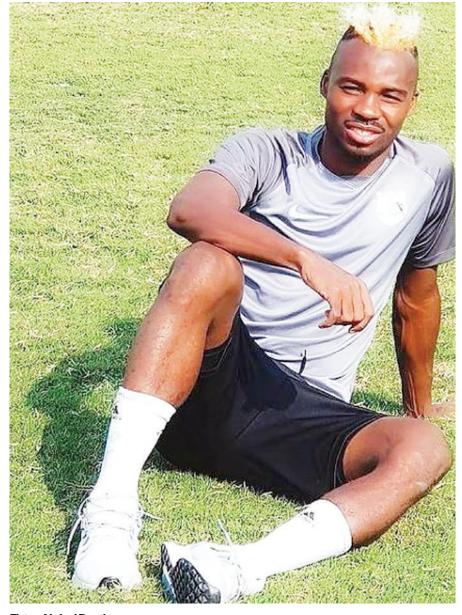

In the middle of this week, a letter by the Heritage Soccer Agency was sent to FIFA, Confederation of African Football (CAF) and Tanzania Football Federation (TFF), alleging that the striker has violated his contract with the agency and signed for Yanga without their consent.

Commenting on the allegations, Fiston said: "Those people are scammers, I saw the letter, I called them, insulted them and told them what they are doing is a scam and if they do it to other players, they will not be fair to the players at all."

He insisted: "I do not like ignorance and what they are doing is not right at all because I have never worked with them, they have never given me any experimental deal why should they say that."

"And if you look at that their letter, it has been cut down, I work with three agents who are Egyptian citizens but not the said agency because those who claim so are, among others, a Tanzanian and I have had an argument with him," he said.

Abdoul Razak has also approached the Heritage Soccer Agency and called

Fiston Abdoul Razak

them scammers due to the company claiming it was not involved in the player's deal to join Yanga.

Yanga lead the Vodacom Premier League standings, accumulating 44 points in the 18 games they have played so far.

runs and 26 runs respectively.

By Guardian Reporter

ANNADIL Burhani cricketers notched a comprehensive six-wicket victory over Alaf Aces in this year's Dar es Salaam Cricket (DC) Gymkhana Cup tournament's match, held in the city early this week.

Top order batsmen made their presence felt when Alaf Aces went in to bat first, seeing to it the outfit score 124 runs for the loss of five wickets in 20 overs.

After an early exit of opener Ravi Kumar who ended with seven runs, which included a four, fellow opening batsman Raza Vakil put solid knocks to show, posting 18 runs which included a boundary and a six.

Muaaz Abdulkarim was ultimately the squad's top run getter, given he posted 28 runs which included two boundaries and a six.

There were as well meaningful contribution by Raza Baloch and Imtiyaz Yusuf as they notched 23 runs and 23 runs not out respectively.

The side's skipper, Bhavesh Govind, chipped in with 10 runs which in-

Annadil Burhani's Firoz Hatim Dahodwala had most wickets, ending his spell with two and giving away 18 runs in four overs.

In response, Annadil Burhani smoothly chased Alaf Aces' total for the loss four wickets in 17.3 overs.

Annadil Burhani captain Mustafa Lukmanji played a pivotal role in the

outfit's ability to mount successful chase, notching 40 runs not out. They made their plan to get down to successful chase known when opening batsmen, Alaqmar Shakir and Mufaddal Seifuddin, posted 15

Murtaza Kaderbhai, batting at number three, also put some good knocks, notching 14 runs.

Firoz Hatim Dahodwala, partnering Lukmanji, made certain of the

squad's victory, recording 20 runs not out. Despite Alaf Aces' captain, Govind, giving his all with the ball and post-

ing two wickets, there was little the side's remaining batsmen could do to see to it they bounce back.

Govind leaked 12 runs in his four-over spell.

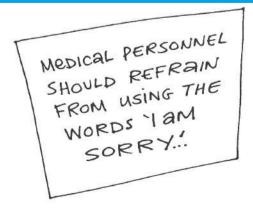

In the day's other tie, Estim side posted eight-wicket victory over Unisoft Rising Stars.

Unisoft Rising Stars had chance to bat first, notching 108 runs all out in 20 overs.

Sandeep Nilajkar significantly contributed to his team's total, nailing 30

Estim chased their opponents' total with ease, recording 112 runs for the loss of two wickets in 14.2 overs.

Africa Kabaddi Championship pushed back

By Correspondent Joseph Mchekadona

THE Africa Kabaddi Championship, which was to be held in Dar es Salaam in March, has been pushed back to early April, local organizing committee announced.

Abdallah Nyoni, Tanzania Kabaddi Association's Chairman, said the championship was slated for March 9-14 but it has been pushed back to April 6-10 this year.

He said the decision to postpone the championship was announced by Africa Kabaddi Confederation in consultation with competing nations.

Nyoni said the move was reached after evaluation of a second wave of coronavirus pandemic which has hit hard some of the countries which will compete at the championship.

"We had a video meeting with leaders of Africa Kabaddi Confederation and nations which will compete at the championship, some nations complained that it will be difficult for them to compete at the showpiece as they have been locked up due to the second phase of coronavirus crisis which is expected to end in March, so it was agreed that the best way is to push it back to April," he said.

He said due to this development the national Kabaddi team which has 34 players that are attending residential camp was given a brief rest, but he said the team was to resume residential camp yesterday.

Nyoni disclosed that Kabaddi coaches from India are expected in the country early February to train the players, thanks to World Kabaddi Association, which will bring the coaches.

In a previous interview, he said it is historical for the country to host Africa Kabaddi Championship and the competition it will involve Kenya, Cameroon, Nigeria, Ghana, Egypt, Mauritius, Zimbabwe, Uganda and hosts Tanzania.

He said Tanzania accepted a request from Africa Kabaddi Confederation and World Kabaddi Federation (WKF) to host the championship as it will be a way of promoting and developing the sport in the country.

Nyoni, who is also the first vice-president of Africa Kabaddi Confederation and founder of Buffalo Kabaddi Sports Club, thanked Adarsh Sharma, Chief Executive Officer of Demeter Insurance Company, and patron of Tanzania Kabaddi Association, for bankrolling the national team's camp. He said Dar es Salaam is organizing the championship and he asked the city's residents and other parts of the country to prepare to welcome more than 350 visitors who will come for the championship.

He disclosed: "Hosting Africa Kabaddi Championship is historical for the country and we feel honoured to be given this opportunity."

"We also thank Sharma, who is our patron, for his generosity to sponsor the national team, we also appreciate the support we are getting from Dar es Salaam Regional Office and other stakeholders, we are asking the corporate world to sponsor us so that we can successfully host the tournament" he said. Wikipedia describes Kabaddi as popular sport in India and other surrounding Isian countries.

It is a contact team sport played between two teams of seven players, the objective of the game is for a single player on offence, referred to as a 'raider', to run into the opposing team's half of a court, tag out as many of their defenders as possible, and return to their own half of the court, all without being tackled by the defenders, and in a single breath.

Heavyweight boxers, Tanzanian Shaaban Jongo (2nd L), and American Shawn Miller (2nd R),

in Dar' by storm

PROFESSIONAL boxers, Tanzanian Ibrahim Mgendera 'Class' and Malawian Denis Mwale, yesterday got into a war of words when they met face to face for the first time before their tomorrow's fight dubbed 'Rumble in Dar.

Boxers promise

to take 'Rumble

Mgendera and Mwale will battle it out for the World Boxing Federation (WBF) intercontinental championship at the Next Door Arena in Dar es Salaam, a fight that will be preceded by eight others.

The two boxers will today attend the weigh-in as well as medical examination to be witnessed by WBF president Howard Goldberg as well as Scott Farrell, Chief Executive Officer of Global Boxing Stars (GBS), and the bout's sponsors, Onomo Hotel, CRDB Bank and Tanzania Tourist Board (TTB).

Speaking yesterday, Mwale said he is not in Tanzania for holiday rather than fighting against Mgendera and his target is to win the title.

The Malawian boxer said that he respects Mgendera's the best record in the game with the pugilist moreover boasting of experience in the ring, but he does not expect his unbeaten record to be broken by the Tanzanian.

in front of his fans, that is undisputed, I have not come to Tanzania for holiday rather than to work, which is fighting, and win." "I have fought hard to reach this level

He noted: "I will dismantle Mgendera

and now I am among the best international boxers boxing is my life and I respect my job," he noted. Mgendera noted it would not be possible for him to lose at the home

ground and he promised all Tanzania boxing supporters to turn at the venue to give him support. He disclosed: "I have trained hard

and I am sure to win at home venue. I will not let down all Tanzanians, please give me support to come at the venue." The boxers' fight will be witnessed

by Kubrat Pulev, a boxer who lost against Anthony Joshua in the World Boxing Association (WBA), International Boxing Federation (IBF), World Boxing Organization (WBO) and International Boxing Organization (IBO) championship belts. Kubrat has been accompanied by his younger brother, Tervel, who will fight against Vikapita Merero of Namibia.

"We have come to fight and win, in our family we do not have a big or small fight, that's why my younger brother has never been beaten, and apart from Anthony Joshua, I have never lost a fight, so we are going to continue that history on Tanzanian soil," Kubrat noted. Chief Executive Officer of Jackson Group Sports Agency, which organizes the fight, Kelvin Twissa, disclosed all preparations for the fight are complete and tickets are on sale for 100, 000/- for regular seats, 150, 000/-, 200,000/- and 1.6m/- per eight-people table.

He noted: "Preparations are complete, and this will be the first time in the history of Tanzania that senior boxers from different countries come to fight here." Other boxers who will be participating in bouts tomorrow are Ardi Ndembo of DR Congo who will face Tanzanian Paschal Enock in Heavyweight fight, Happy Daudi will exchange blows against Zambian boxer Lolita Ndembo in Super Welterweight bout and Saidi Mrosso will be in action against Botswana's Gomatsang Gaasite.

Also in the list are Jacob Maganga will be trading blows with Hafidh David while Nassib Ramadhani will fight Nkosinati Biyana from South Africa.

Stumai Muki will fight against Zimbabwe's Revai Madondo and Shaaban Jongo will face Shawn Miller of the United States for the WBF international
