

Rights activists want clear law on privacy in private communications

In his comments on the matter recently, TCRA Executive Director James Kilaba told a local newspaper that the institution has no ability to wade into people's private conversations

By Henry Mwangonde

THE Tanzania Human Rights Defenders Coalition (THRDC) has recommended the enactment of a law to protect privacy of citizens in communication whereby only courts of law can authorize revelation of personal conversation.

Speaking at a press conference in Dar es Salaam said yesterday, THRDC coordinator Onesmo Ole Ol Ngurumwa called upon the government to enact

a Data Protection and Privacy Act which will go in line with international conventions which grant rights for privacy in communications.

"The government should continue to respect and uphold the rights of the people on communication until the law on privacy is formulated to ensure that people keep communicating without fear," he said.

Ole Ngurumwa also called for review of various

Why ICJ will not solve Kenya-Somalia maritime border row

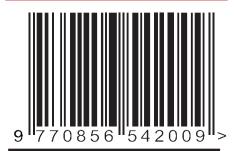

NAIROBI

THE International Court of Justice (ICJ) is expected to deliver its verdict on the Kenya-Somalia maritime border dispute by September 19, following a public hearing a week earlier.

But whether that will close the chapter on an issue that has recently put the two neighbouring states at loggerheads is uncertain, especially since there are political connotations to it.

Gathering here this week, legal and foreign policy experts discussing maritime boundary conflicts on the continent said legal processes often do not end conflicts, suggesting Nairobi and Mogadishu will have to eventually discuss the issue whatever is the ICJ verdict.

Somalia sued Kenya at the ICJ in August 2014, seeking to redraw the sea boundary to a diagonal flow, an extension of the land border south of Kiunga, and objecting to Kenya's current view where the border

flows directly eastwards.

If the ICJ agrees with Mogadishu's view, the change in the boundary could affect about 100,000 square kilometres of sea, limiting Kenya's access to the waters said to contain valuable hydrocarbons.

At the conference organised by the Horn International Institute for Strategic Studies, a policy research think-tank in Nairobi, specialists poring over recent cases of maritime disputes observed that courts in the past have failed to read the political mood and other factors fuelling the conflicts.

"These are terrible ways to do business. It is a win-lose situation," observed Makumi Mwagiru (pictured), Adjunct Professor of Diplomacy at Strathmore University.

In a paper presented to the audience on Thursday, Prof Mwagiru analysed the difference between disputes and conflicts, saying what is happening between Somalia and Kenya is a conflict that cannot be solved by the courts.

In diplomatic parlance, a dispute is often a short-term disagreement on, say, Kenya's cows crossing into Somalia to graze without permission or Kenya's sweets confiscated in Tanzania for not showing certificates of origin.

A conflict on the other hand may be long-term, and could contain several non-negotiable issues such as whether

AIDS experts have for the first time brought together new assessments from six countries around the world that have made impressive progress in fighting the HIV and AIDS pandemic, identifying the common contributors to success and providing a roadmap to ending the pandemic globally.

In a new report released last week in Mexico City at the International AIDS Society (IAS) 2019 Conference on HIV Science, Friends of the Global Fight Against AIDS, Tuberculosis and Malaria demonstrate how dramatic reductions in HIV incidence and mortality have been accomplished in six very different settings around the world, listed as Thailand, Malawi, Uganda, Australia, England and the United States.

The 10th IAS Conference on HIV Science held from July 21st -24th 2019, monitored online by The Guardian, is the world's most influential meeting on HIV research and its applications. This biennial conference presents the most critical advances in

To eliminate HIV worldwide, we need not just great prevention tools, but also strategic and impactful investments and policies," Adeeba Kamarulzaman, International AIDS Society President-Elect basic, clinical and operational research that moves science into policy and practice. Through its open and inclusive programme development, the meeting sets the gold standard for HIV research featuring highly diverse and cutting-edge studies.

The report provides a graph for each location, illustrating declining HIV rates and deaths, as well as policy decisions that drove advances against the epidemic. The report also maps out the future, showing how the required policy, structural and research advances can propel dramatic progress.

"This report highlights the reality that progress toward ending HIV shouldn't be limited by geography or demographics," Greg Millett, Vice President and Director of Public Policy at amfAR, said. "It also highlights how much easier we can achieve our goal by continuing to invest in scientific research, as well as policies that promote human rights."

AmfAR is one of the world's leading non-profit organizations dedicated to the support of AIDS

TRA: Electronic stamps on soft drinks here from Aug 1

By Henry Mwangonde

THE Tanzania Revenue Authority (TRA) has announced 1st August as effective date for the implementation of phase two of the Electronic Tax Stamps (ETS) on carbonated and soft drinks manufacturing companies.

TRA says ETS second phase shall also apply to sweetened or flavored water and other non-alcoholic beverages, but with the exclusion of fruit vegetable juice.

In a public notice published in newspapers, TRA said the date is announced in advance in accordance with provisions of regulation 29 of the ETS Regulations 2018, applicable for locally produced and imported products.

"Admittedly, the abovementioned products in phase two were not affixed with tax stamps prior to an introduction of ETS. Henceforth, all products currently present in the market and in the warehouses of either the manufactures or importers will continue to be traded up to 31st January 2020. It follows therefore that after the fixed end date (31st January 2020) all relevant goods shall be affixed with ETS," reads part of the notice.

TRA announced earlier this month that it was in the final stages of rolling out the second phase of shifting to electronic tax stamps.

The decision to roll out ETS and ending physical stamps stems from numerous incidents of tax evasion and counterfeiting.

TRA started the first phase of ETS on wines, spirits and cigarettes in January this year, then fully rolled out for all alcoholic drinks, cigarettes and bottled water on June 15.

A Swiss firm, Société Industrielle et Commerciale de Produits Alimentaires (SICPA) won the tender

FROM PAGE 1

research, HIV prevention, treatment education and advocacy. Since 1985, amfAR has invested nearly US\$550 million in its programmes and has awarded more than 3,300 grants to research teams worldwide.

Common contributors to lowering HIV incidence and mortality across the six locations according to IAS 2019 include campaigns to encourage HIV testing particularly among groups that are most affected.

Others relate to free and easy access to treatment at the time of diagnosis with HIV, scale up of evidence-based HIV prevention, such as voluntary medical male circumcision, preexposure prophylaxis and harm reduction, concerted efforts to provide human rights-based services and social supports alongside programmes to fight stigma and discrimination.

"There is nothing easy about achieving epidemic control, but in Malawi, a country with few resources, we have found that innovation and early adoption of new guidelines is key to rapid scale up of treatment and prevention," said Maureen Luba, Africa Regional Advocacy Advisor for AIDS Vaccine Advocacy Coalition (AVAC), a US professional agency based in New York.. "With 91 per cent of people who are aware of their status on HIV treatment, Malawi is beginning to show progress on the way to ending the pandemic. But we can't declare success too soon; we can't step back now in Malawi or anywhere else."

Founded in 1995, AVAC is a nonprofit organization that uses education, policy analysis, advocacy and a network of global collaborations to accelerate the ethical development and global delivery of AIDS vaccines, male circumcision, microbicides, preexposure prophylaxis (PrEP) and other emerging HIV prevention options as part of a comprehensive response to the pandemic.

Chris Collins, President of Friends of the Global Fight Against AIDS, Tuberculosis and Malaria, said the report provides a new view to the issue, that ending the pandemic isn't an insurmountable challenge. "It is a question of putting the evidence to

work and scaling access, particularly for those most at risk. It won't be easy anywhere, but it is possible everywhere."

"To eliminate HIV worldwide, we need not just great prevention tools but also strategic and impactful investments and policies," said Adeeba Kamarulzaman, International AIDS Society President-Elect. "The report provides important new analysis of what has worked and what can be scaled to build on this success."

Commenting on how Tanzania fairs in these applications, The Director of Preventive Services at the Ministry of Health, Community Development, Gender Elderly and Children, Dr Leonard Subi told The Guardian yesterday that Tanzania is doing great on all the common contributors to lowering HIV incidence and mortality.

"Testing services are readily available and accessible, including index testing. Access to ARV is good and viral suppression is well," he said in response to a question on how Tanzania is fairing on common contributors to lowering HIV incidences and mortality.

Dr Subi noted that so far about 1,150,000 people are on antiretroviral (ART) drugs, introduction of Dilutegravir (DTG) based regimens down to lower facility, positive political will, along with community engagement and partnerships.

Key and Vulnerable Populations (KVPs) are among population groups that have heightened vulnerability to HIV infections, he stated.

IAS is the world's largest association of HIV professionals, with members in more than 170 countries. IAS advocates and drives urgent action to reduce the impact of HIV, organizing the world's most prestigious HIV conferences, including the International AIDS Conference, the IAS Conference on HIV Science, and the HIV Research for Prevention Conference.

"There is nothing easy about" achieving epidemic control, but in Malawi, a country with few resources, we have found that innovation and early adoption of new guidelines is key to rapid scale up of treatment and prevention"

laws to give clear meaning of 'public interest' and make Tanzanians easily communicate with the communications mechanism being subject to laws upholding human dignity.

THRDC also asked the Tanzania Communication Regulatory Authority (TCRA) through the consumer protective committee to ensure that it performs its duty by protecting the privacy of clients as well as take legal actions against service providers who leak the communication content and thus abuse the privacy of their clients.

"For those whose rights have been violated, we urge them to open cases at any court of law suing service providers

Rights activists want law on privacy in communications

who leaked private communication without due authority of a court of law," he said.

Ole Ngurumwa cited the Constitution at Article 16(1), saying "Every person is entitled to respect and protection of his person, the privacy of his own person, his family and of his matrimonial life, and respect and protection of his residence and private communications."

The statement by the coalition comes in the wake of an alleged leaked communication between retired senior officials of the ruling party which went viral on social media.

The conversation was followed by another leaked voice note allegedly belonging to a former minister reportedly plotting plans to impede President John Magufuli from securing is left in the hands of the police, who his second term in the general elections deal with crime.

next year.

In his comments on the matter recently, TCRA Executive Director James Kilaba told a local newspaper that the institution has no ability to wade into people's private conversations.

Kilaba however said it was easy for anyone to formulate and disperse such voice notes and if anything the matter

to replace hitherto paper-based tax at the end of the production line and for excise duty on locally produced spirits increased by 22.7 per cent.

TRA indicates in the data that excise duty from the spirits increased from 18.5bn/- in January-March 2018 to reach 22.7bn/- in the January-March 2019 period.

Why ICJ just will not solve Kenya-Somalia maritime border row

FROM PAGE 1

to change the flow of the boundary or sharing resources in a contested area. "The law settles disputes. It does not

resolve conflicts," he told the audience. Because disputes follow a fixated process, such as orders of the court and lack of appeal in the case of ICJ, it means that a contest like that of Somalia and Kenya may be decided regardless of the forces behind it.

In fact, in previous cases like that of Nigeria and Cameroon, courts decided based on previous negotiations between the two countries.

Bashir Shettima, a former director of the National Boundary Commission of Nigeria said the ICJ delimited the boundary by following most of what the two countries' officials had reached, but not ratified.

"It took a lot of time, mostly because the trust between the two countries was at its lowest," he said.

Yet, for Somalia and Kenya, there are accusations of third parties such as oil companies and major world powers fuelling the conflict.

In addition, issues of territorial integrity and resources available in the contested areas carry with them deep political connotations that could kill careers.

"This case is giving President (Mohammed) Farmaajo the wind he needs to push the ship of re-election," argued Prof Peter Kagwanja, CEO of the Africa Policy Institute, referring to Somalia's upcoming elections in 2021. "If he chooses otherwise, he is dead

and buried (politically). So he has to appease the political stakeholders by ensuring it goes on." So what is at stake?

The Somali government has insisted on the court decision, in spite of overtures from Nairobi to have it delayed, for talks.

Foreign Affairs CS Monica Juma told journalists earlier in the year that "not even an inch" of Kenyan territory will be ceded and vehemently protested oil stock marketing of Somalia in the contested area.

In legal battles, the outcome may be uncertain, said Justice Srem Sai, law lecturer at the Ghana Institute of Public Management and Administration.

"(International) law in most case is not predictable. So we need to use all the (alternative) means to resolve conflicts. There should be more than judicial ways to resolve these issues."

In the contest lies issues of national interest, observed Dr Kemoli Sagala, a consultant on security, governance and strategy.

And the judges at the international court do not have a history of giving verdicts that offend their appointing states, the consultant added.

If the ICJ agrees with Mogadishu's view, the change in the boundary could affect about 100,000 square kilometres of sea, limiting Kenya's access to the waters said to contain valuable hydrocarbons

Food security ensured after surplus harvests

By Guardian Reporter

TANZANIA has produced a surplus food of 2,565,774 metric tonness of total food crops production for 2019/2020 consumption year of which 253,790 metric tonness include cereals and 2,311,984 metric tons are non-cereals.

The country's food requirement for the 2019/2020 consumption year is 13,842,536 metric tons of which 8,754,119 metric tonness are cereals and 5,088,417 metric tonnes are noncereals, according the June national food security bulletin issued by the Ministry of Agriculture.

Nationally, food crops production in the just ended 2018/2019 cultivation season reached 16,408,309 metric tons where 9,007,909 metric tons are cereals and 7,400,400 metric tons are noncereals.

Following the good harvests, prices of major food stuffs such as rice, beans and maize has remained average in almost all the regions in June whereby Lindi, Arusha, Moshi and Songea had the highest prices of rice ranging from 1, 800/- to 1,944/- per kilogram while Kigoma, Shinyanga and Iringa had the lowest market prices of between 1,250/and 1,350/- per kg.

According to the bulletin, Moshi, Lindi, Kinondoni and Tanga recorded above average maize prices while Iringa, Mbeya Songea and Njombe had below average maize prices. The lowest maize price were observed in the Njombe market where kilogram of maize was sold at 420/, in Songea the price was between 447/- and 480/- per kg,

In Iringa region beans was sold at between 450/- per kg and Mbeya 450/per kg while in Mbeya, Shinyanga, Ilala and Tanga markets the price was a little bit high whereas a kilogram of beans was sold between 1, 844/- and 1,900/-.

Sumbawanga, Kigoma and Bukoba sold beans at prices ranging from 1, 236/-, 1,266/- to 1,267/- per kg.

In Lindi, Mtwara, and Bukoba sorghum was sold at prices ranging from 1,127/- to 1,450 per kg while the markets in Kibaigwa, Arusha, Shinyanga and Dodoma sold sorghum at between 327/- and 500/- per kg.

The prices of round potatoes also varied from one market to the other whereby, Mtwara, Lindi, Musoma, Dodoma and Kigoma had the highest

prices of round potatoes, ranging from 860/- to 1,150/- per kg while Morogoro, Mbeya, Bukoba and Njombe markets had the lowest prices ranging from 440/- to 585/- per kg.

However, the government through the National Seed Committee (NSC) has approved crop varieties to be used by framers in the 2019 farming season. The 13 new crop varieties approved by NSC have been recommended by the National Variety Release Committee (NVRC) for utilization and adoption. Out of the 13 seed varieties, 9 varieties are maize, 3 soybeans and 1 type of tobacco.

The crop varieties have been released and approved after extensive research with superior characteristics such as high yield, disease and insect pest resistance and early maturity. The seeds have been researched by public and private research centers in the country with the aim of increasing production and productivity of the respective crops while improving food security and increasing farmers' income.

However, the Agricultural Seed Agency (ASA) and other seed companies are expected to start production of hybrid seeds in the 2019/2020 season.

Govt vows to resolve decades-old dispute between artisanal miners and company

By Guardian Reporter, Arusha

MINISTER for Minerals, Dotto Biteko has vowed to resolve clashes that had existed between artisanal miners and Tanzanite-One firm at Mirerani Hills, for over 20 years now.

This follows recommendations that the Minister take punitive measures against the mining firm.

But with the government also having stakes in the company, through its joint venture with State Mining Company (STAMICO), Biteko seems to be caught between a rock and a hard place.

"I am going to start addressing the issue all over again, this time working from the study report which was compiled by a special commission of investigation,"

VALUE RATE AND ANALYTIC

stated Biteko during the occasion to receive the committee report in Mirerani Township, yesterday.

The delegation commissioned to investigate the conflicts which have simmered for two-decades, was made up 35 personnel, from the Ministry of Minerals, Ministry of Land, Surveyors, Representatives from local Mining entities, officers from the Manyara Regional Commissioner Office, security organs and Mirerani Gates Department. The team led by Engineer Khamis Kamando from the Ministry of Minerals worked for 21 days in unearthing the problems that have been facing mining operations in the Mirerani Hills of Simanjiro district, Manyara region.

"We have discovered some

shortcomings as far as Tanzanite-One Mining operations are concerned, the firm's licence is for heavy industrial minerals not gemstones and Tanzanite, mined in Mirerani falls under the Gemstone Category," said the Committee chairperson, Kamando.

According to the committee's report, the Tanzanite-One (formerly African Gemstones Limited - AFGEM) is occupying more area of land than stipulated in the Mining Licencing regulations and that the firm holds a permit to operate in the area infinitely.

The report also wants the joint venture between Tanzanite-One Limited and State Mining Company annulled, because the firm seems to use the government shadow cast by STAMICO, to conceal its

M,Consulting

alleged rackets.

After annulling the Joint Venture, the committee advised that Tanzanite-One be provided with ordinary artisanal miner licenses because the firm has always been operating like a small scale quarry yet conducts heavy mining at Block B'.

The Minister for Minerals, Dotto Biteko revealed that, the government has so far revoked 12,000 mining licenses due to shoddy operations by holders, including failure to settle annual rent for plots.

"Tanzanite-One itself owes the government US \$ 98,000 as accumulated debt for six years," he revealed.

The ownership of Tanzanite-One Ltd, the giant mining company together with its sister ventures was taken over by the State Mining Company (STAMICO) which

shares its operations in a joint-venture with Sky-Associates firm owned by two ordinary Tanzanians.

Hussein Gonga Arusha-based businessman, together with his partner Faisal Shahbhat acquired the 50 per cent stake previously owned by Richland Resources Limited of UK, a firm which bought the company from the African Gemstones (AFGEM) Limited of South Africa.

Richland Resources (UK) Limited through its CEO Benard Olivier sold off its shares in the Tanzanite-One Mining Limited to the Sky Associated Group Limited a firm which has been reported to be owned by Gonga, Shahbhat and a third partner identified as Ridhiwan Ullah.

Commercial yard plot 2,723 sqm for sale, The plot has a clean title deed. Data Analytics Training - SPSS - 2019

RM Consulting, a Technology Solutions Provider Company in Tanzania, in partnership with Predictive Analytical Resources Limited (PARL) from Kenya, A Premier Statistical Software and training consultancy company is offering a five day (5) intensive training in Data Analytics Using SPSS suite of solutions that will be conducted in Dar es Salaam Tanzania.

REQUEST FOR PROPOSALS (RFP)

With more than 20 years of highly successful Analytics training programs, PARL & RM Consulting offers you a wide range of options for learning how to optimize your use of SPSS Software

Why Train with PARL?

More than 20 years of highly successful SPSS training programs delivered by an IBM SPSS Sales

Partner.

Our training is delivered by experienced analysts that will provide you with insider knowledge on all aspects of SPSS, with topics ranging from statistical analysis and survey research to data mining and predictive analytics. Our delivery approach is based on practical learning cases that will enable you to practice what you learn throughout our courses

All levels of expertise are catered for. Our Tailored Training sessions designed specifically for you.

Who is the course for? M &E; University graduate students/Lectures; Researchers/ Consultants & Data analysts

Course Outline

This session will include a lecture followed by interactive exercises. Participants will experience practical data analytics scenarios that include Customer, Risk and Operational analytics.

Introduction to Statistics: Types of statistics, types of variables, summarizing and presenting data.

- Data capture, manipulation and validation Indicator generation, model development.
- Understanding descriptive, predictive and prescriptive analytics.
- Statistical Inferences: Hypothesis testing.
- Test statistics: parametric and non-parametric tests.
- Correlation and regression: Simple and multiple linear regression, logistic, Poisson regression etc.
- Forecasting and Trend Analysis.

Training dates: 26th - 30th August 2019. Payments: Due by 20th August 2019 | Cost: USD 500.00 PP | Venue: Protea Hotel Dar es Salaam, Tanzania

Participants expected to have own laptops. Training Software will be provided by trainers. For inquiries and registration please contact us via email at info@parl.co.ke/ info@rmconsulting.co.tz or call +254.20.3877262, +254.734.351000, +255.754.053921.

Beneficiary Name: RM Consulting Address of AC holder: P.O. Box 11778, DSM, Tanzania Name of Bank: Diamond Trust Bank (DTB) TZ Account No: 0133013001 | USD Account No: 0133013002 Bank Address: Aga Khan Library, Corner of Jamal and Mosque Street, DSM, Tanzania SWIFT Code: DTKETZTZ

TENDER TITLE: A REGIONAL ANALYTICAL ANALYSIS OF TRENDS IN TRADE AND TRANSPORT IN EAST AFRICA

TENDER NUMBER: PRQ20180195

TradeMark East Africa (TMEA) would like to generate and analyse traffic flows of commodities and associated costs of movement along the major trade corridors by different modes of travel in Eastern Africa. TMEA wishes to invite interested and gualified reputable consultancy firms/consortiums to participate in this tender.

The Terms of Reference and the Request for Proposals (RFP) document can be obtained at https://www.trademarkea.com/get-involved/procurement/. All queries quoting the above Tender Title and Number should be emailed to procurement@trademarkea.com. The closing date for submission of this tender is on or before Friday, 30 August 2019 at 12.00 p.m. (Kenya Time).

Interested and qualified reputable consultancy firms/consortiums **MUST** submit their bids through TMEA's Procurement mail box using the email address, procurement@trademarkea.com. The maximum size of each email sent with attachments should not exceed 5 MB.

TMEA cannot answer any query relating to this tender 7 days or less prior to the submission deadline.

Guardian

NEMC stresses legal stand on noise levels

By Guardian Reporter

THE National Environmental Management Council (NEMC) warned yesterday that uncontrolled sounds and blares are unlawful and are categorized as noise pollution under the Environment Management Act 2004.

Speaking to journalists at the end of a one-day seminar on noise pollution held in Dar es Salaam and organised by the NEMC, NEMC director general, Dr Samuel Gwamaka, said the seminar was called to educate bar and entertainment hall owners on what is regarded as noise pollution under the law. "The meeting sought to explain to the participants that noise pollution is unlawful under the regulations made under sections 147 and 148 of the Environment Management Act, 2004," he explained. The seminar was attended by government functionaries, and drew participants from the National Arts Council, owners of bars and entertainment halls and other environment stakeholders

Dr Gwamaka said participants were informed that the law defines lawful levels of noise or sounds and blares, adding that regulations

made under the EMA, 2004 seek to ensure the environment remains good and safe. They also seek to control noise pollution and quivering or tremor or vibrations. Dr Gwamaka also said that NEMC's survey revealed that noise-producing activities are found in residential areas primarily because residences were established without following requirements of the laws governing urban development.

He said the seminar was also informed that under the law activities that unleash noise have to be done in registered locations and in noise-proof premises.

Dr Gwamaka said NEMC will send experts to all parts of Tanzania who will teach people on how to use gear that determines levels of noise and also teach people on negative effects of excessive noise on people and environment.

NEMC Law Compliance Director, Dr Ruth Rugwisha, said big impact and adverse effects of noise pollution and undesirable trembles were not immediately felt by victims or were bit instantly seen on environment. She named the effects as including loss of hearing ability, birth complications and high blood pressure (BP).

By Guardian Correspondent, Rombo

THE Tanzania Agricultural Research Institute (TARI) is working on a fouryear project aimed at increasing production of bananas from 10 tonnes to 69 tonnes per hectare.

The project involves developing and distributing higher-yielding, diseaseresistant hybrid banana varieties.

Manager of TARI-Tengeru centre, Dr Stephano Kuoko announced when speaking at the official launch of different publications on improvement of banana farming in Rombo District, Kilimanjaro Region. Implemented by TARI, the project is supported by Bill & Melinda Gates Foundation and the International Institute of Mandan and Aleni. Tropical Agriculture (IITA) and Natural resources and biodiversity (CABI)-an improving people's lives worldwide by solving problems in agriculture and the environment.

in Uganda, under the National Agricultural Research Organisation (NARO).

In Rombo District, Dr Kuoko said that the project is executed in six wards of Mamsera, Chala, Mengwe, Mengeni,

"Our aim is to ensure that people's lives improves and this is possible due international organization aimed at to the fact that the project involves the use of modern agronomic practices, which is the gateway to high production of the crop," he said, adding: "We're The similar project is implemented expecting that banana yields will go up to 69 tonnes compared to the current 10 tonnes per hectare."

He added: "To us, this is going to be big success; as such production will transform farmers' lives in this area and other parts of the country."

Acting District Agricultural Officer, Ahadi Mnyumba said there are 50 demonstration farms, which have been established in the project and "we've trained 3,402 farmers in the district since the project kick-started in 2017."

TARI to increase banana yields from 10 to 69 tonnes per hectare

Mnyumba said that farmers have started enjoying the benefits of the project, as some harvest reasonable weights of bananas as compared to the past where they were using traditional method of farming.

Reluctant of famers to adopt the new banana farming technology, has been cited as one of the challenges thwarting farmers selling immature bananas, implementation of the project.

Rombo District Commissioner, Agness Hokororo commended TARI and partners in the project, urging extension officers to work closely with farmers so that banana produced in the district be of the best quality that can easily compete in the local and regional markets.

She described banana as one of food and business crop, hence needs to be well managed from planting to harvesting, discouraging the trend of which doesn't pay much.

"So, I call on extension officers and experts of the crop to regularly visit farmers for better results," DC Hokororo stressed.

Bananas are both a food staple and an economic backbone in East and Central Africa, where over half of all cultivated land is planted with bananas. Uganda and Tanzania produce over 50% of all bananas grown in Africa. The region's yearly banana crop is valued at US\$4.3 billion.

190 students to take part in young scientists exhibition

By Correspondent James Kandoya

A total of 190 students of secondary education across the country are expected to participate in the ninth Young Scientists Tanzania (YST) exhibition slated to kick off from July 31 to 1 august this year.

The chairman of the board of the YST, Prof Yunus Mgaya told reporters yesterday in Dar es Salaam that during the exhibition, the students will showcasing scientific and technological projects researched.

He said for the two days of the exhibition, young scientists will display projects in various areas of science such as chemical, physical and mathematical sciences; biological and ecological; social and behavioural science; and technology.

Prof Mgaya noted that the projects are mainly focused on finding practical solution to development challenges in health, agriculture and food security, communications and transportation safety, energy and environment, education, social relations and social problems.

The chairman added that the best projects will be awarded cash, medals and trophies for their schools while the four young scientists will be awarded university scholarships by the Karimjee Jivanjee Foundation to enable them to pursue scientific and technological studies at university.

According to the chairman, the overall winners will also represent Tanzania at the International Eskom Expo Young Scientists competition in Johannesburg, South Africa in October this year.

"YST has inspired many young people in the country to engage in science and innovation. This exhibition is another good opportunity for secondary school students to demonstrate their talents in addressing development challenges, "he said.

"I therefore requesting all stakeholders to continue supporting the young scientists as they strive to develop their scientific potentials, "he added

The chairman said the guest of honor in this year exhibition will be the Minister for Education, Science, Technology and Vocational Training Prof Joyce Ndalichako.

He noted that the participating teachers and students had opportunity to improve their scientific skills through the YST capacity building science Outreach Programme facilitate by YST science advisors and coordinated by the YST Young Scientists Tanzania board chairman Prof Yunus Mgaya, who is also National Institute for Medical

KARIMIE

IIVANIE

Research director general, briefs journalists in Dar es Salaam yesterday on the Ninth YST exhibition to be held in the city this Wednesday and Thursday. With him are Shell communication manager Catherine Mbatia, Shell senior social performance advisor Msomisi Mbenna, YST co-founder Dr Gozbert Kamugisha and YST co-founder Joseph Clowry. Photo:

Regional coordinators.

The outreach programme has played a central role in training many other teachers and students throughout Tanzania and not just the teachers who participated this year exhibition. He said the exhibition was an excellent opportunity for teachers, students, science stakeholders and the public to see and appreciate the scientific ingenuity inquisitiveness of the young people as they present scientific projects addressing socialeconomic changes.

For her part, the Senior Social Performance Advisor from Shell Tanzania, Msomisi Mbenna said the company will continue supporting the exhibition to ensure the scientific innovations in the country play a role of addressing economic challenges.

Karimjee Jivanjee Foundation (KJF) Manager Devota Rubama said up to date the foundation had sponsored 27 students won the YST, where six had graduated in different universities, ten are still pursuing their courses and eleven have yet joined the university.

She said KSJ has increased its sponsorship amounting to US \$ 100,000 annually all aimed to complement efforts made by the YST to improve skills and talents of young scientists in the country.

In everloving memory of our beloved HOWARD SIMON MWANSASU

Today 29TH July, 2019 exactly one year, since you sorrowfully departed from us. The grief in our hearts is unbearable and the gap you have left behind is impossible to fill.

Deeply missed and remembered by your wife, daughters, sons, brothers, sisters, sisters-in-law, sons in-law, relatives and friend.

May the Almighty God rest your soul in Eternal Peace.

Mo Ibrahim announces 2019 leadership fellows

By Guardian Reporter

The Mo Ibrahim Foundation has announced the 2019 intake of selected Ibrahim Leadership Fellows, who will make up the programme's eighth cohort.

A statement released by the foundation at the weekend said named the incoming fellows as: Nadia Hamel from Algeria who has joined the African Development Bank (AfDB), Anta Taal from Gambia who has ioined the International Trade Centre (ITC) and Emmanuella Matare from Zimbabwe who has joined the United Nations Economic Commission for Africa (UNECA).

The Ibrahim Leadership Fellowships programme is a selective programme designed to identify and prepare the next generation of outstanding African leaders by providing them with mentoring opportunities in key multilateral institutions. The candidates, chosen from a pool of over United States Agency for International 2,000 applicants, will benefit from the direct mentorship of the current heads

of the institutions.

Commenting on the new Ibrahim Leadership Fellows, Mo Ibrahim said:

"Congratulations to the three new Ibrahim Leadership Fellows, who will be joining a cohort of 20. My aspiration for the newcomers is that they immerse themselves in this unique opportunity to gain in-depth knowledge and understanding of how such organisations function and use their learnings to continue to contribute to a more prosperous Africa."

According to the statement, Hamel is an international development professional with extensive experience in policy research and advice, strategic programme management, and communications. She has worked with organisations such as the Organisation for Economic Cooperation and Development (OECD), and has supported projects with the Agence française de développement (AFD), the European Union (EU), and the Development (USAID).

years of professional experience in International Development, trade and investments, public-private partnerships and capital markets development. She has worked for the Ministries of Finance and Economic Affairs; Trade, Industry and Employment and Economic Planning & Industrial Development in Gambia. She has represented Gambia in key negotiations in the areas of energy, infrastructure and petroleum sectors.

Matare is an economist whose main interest is in the improvement of fiscal, economic and social conditions in African countries, with extensive experience in macroeconomic research and policy analysis, capacity building and programme management. She has worked with the African Forum and Network on Debt and Development, USAID Strategic Economic Research and Analysis Program and the Southern African Research and Documentation Centre.

The application process for the 2020 Fellowships programme will open on Taal is an economist with ten 12 August 2019, the statement said.

week by Prime Minister Kassim Majaliwa

He said already the government has covered the bill and they are supposed to channel their applications through Small industries Development Organisation(SIDO)

"For small and medium entrepreneurs, TBS in collaboration with the government have continued to certify quality of their goods free of charge for a period of three years," he said

Mussa asked interested entrepreneurs to get an introductory letter from SIDO which would enable him to certify his products at TBS for free.

He said the decision by the government to shift food and cosmetics roles to TBS have simplified procedures for SMEs to access quality mark.

According to him, an applicant is required to forward his requests to TBS, and officials from the bureau would inspect buildings instantly, which earlier had a lot of procedures.

Regarding exhibition, he said they have been organized by regional authority aimed at showing economic opportunities found in the area.

Speaking an exhibitor identified as George Kumburu, wanted to understand whether TBS offices are found in Dar es Salaam only and whether they have plans to reach more people in the country. Responding , the Bureau's Marketing Office Rhoda Mayugu, said they are happy many people

exhibitions in order to educate SMEs on ways of doing business without restrictions.

She urged entrepreneurs to visit their offices in various zones for further clarifications.

More than 400 SMEs have certified their products since the exercise started over ten years ago. They are from regions of Dar es Salaam, Arusha, Tanga, Mwanza and Zanzibar. Tanzania is estimated to have more than 800,000 SMEs operating in various areas.

Experts say more is needed to make sure that the number of SMEs supported in certification is increased.

On reasons why the enterprises tend to shy away from such opportunity, they said it could be due to working environment.

"I think the working environment of most SMEs is not good, and therefore they cannot be issued with any certification under such circumstances. They have to improve it," said Daniel Gulebe.

SMEs are exempted from paying fees related to certification because of their low financial base, hence it is the intention of the government to see that small producers are enabled to sell their products anywhere in the world.

"For small and medium *entrepreneurs*, TBS in collaboration with the government have continued to certify quality of their goods free of charge for a period of three years"

By Guardian Reporter

ONE of the major fertilizer dealers in the country has assured farmers of a timely supply of agricultural products particularly fertilizer, to achieve high yields and bumper harvest next farming season.

Speaking to the firm's agents and distributors in Dar es Salaam over the weekend, YARA Tanzania Country Director, Winstone Odhiambo said that the company had prioritized timely delivery and availability of high-quality fertilizer to Tanzanian farmers at affordable prices.

"YARA always ensures that farmers in the country get the best fertilizer wherever they may be, and at good prices," said the YARA boss, adding that the firm was committed to provide solutions to farmers by increasing crop production in the country.

According to Odhiambo, his company had recently embarked on training fertilizer agents and distributors on the importance of delivering the produce to farmers on time.

He added that they had also engaged agricultural extension officers in 0

'Big' fertiliser dealer pledges timely supply of farm inputs

training farmers on efficient utilization of fertilizer.

Odhiambo further revealed that the firm specializing in agricultural products will from next harvest season; strive to ensure that the useful substance for soil fertility is readily available to farmers scattered across the country.

"Availability and accessibility of fertilizers is crucial aspects of achieving higher yields and bumper harvest to farmers," he offered.

The annual meeting between YARA Tanzania and the distributors and agents sought to identify challenges and opportunities the latter encounter on the field before the beginning of a new season.

Agents and distributors, who surpassed targets set by the firm, were feted by the company during the annual gathering.

"Those who performed exceptionally deserved hefty bonuses from us," said Odhiambo. Apart from being engaged in money making endeavors, YARA Tanzania is also determined to educating farmers in the country on the importance of testing and maintaining soil quality, according to Odhiambo.

In the same vein, Odhiambo took time to appreciate the government's support to the firm in helping farmers feed the country.

The firm's Commercial Manager for the Northern Zone, Phillipo Mwakipesile described the meeting as a milestone in realizing YARA Tanzania's mission and vision of providing farmers in the country with the quality agricultural products.

The important meeting had also attracted senior officials from Tanzania Fertilizer Regulatory Authority (TFRA), Southern Agricultural Growth of Tanzania (SAGCOT), Tanzania Agricultural Development Bank (TADB) and several others held ahead of the beginning of new farming season next month.

Agricultural inputs decisive in achieving middle income status

By Correspondent Friday Simbaya, Iringa

TANZANIA has been mentioned as one of Africa's most privileged countries to achieve a middle economy but more effort is needed on improving access to agricultural inputs and sustainable agricultural markets as it is the Africa's richest fertile land.

The statement was made by the Alliance for a Green Revolution in Africa (AGRA) President Dr. Agnes Kalibata during the AGRA visit to Iringa and Njombe to inspect the implementation of Ihemi-Ludewa Consortium which is a 'Kilimo Tija' project yesterday.

She leads the organization's efforts with public and private partners to ensure a food secure and prosperous Africa through rapid, inclusive, sustainable agricultural growth, improving the productivity and livelihoods of millions of smallholder farmers in Africa.

Dr. Kalibata has also urged the local governments, farmer groups and businesses to work closer with farmers so that they can produce more crops and improving access to quality seeds, inputs and markets.

She said if the farmers can produce more crops without any market restrictions they can increase their yields and access to the market, hence increasing yields in those value chains crops. "AGRA Ihemi/Ludewa Consortium is a platform that brings farmers, farmer groups, local governments and businesses together addressing most challenges related to productivity, post harvest management and access to inputs and output markets," she noted.

Dr. Kalibata is elaborated the most farmers here in Tanzania they producing two tons due to some market restrictions but if they can given a room produce more they

can produce up to five tons.

AGRA is now working with more 1000 farmers in Tanzania specifically Kigoma, Kagera, Sumbawanga and Iringa regions by linking farmers to input and output market to stimulate their crop productivity.

AGRA is working to increase the incomes and improve food security for 30 million farming households in 11 African countries by 2021 through targeted investments to strengthen three (03) core areas: State capability and policies; input delivery systems in agriculture: and partnerships for inclusive agricultural growth.

The AGRA Country Manger- Tanzania Vianey Rweyendela spoke about the contribution of agriculture to sustainable development at a meeting that brought together various agricultural stakeholders from several African countries held in Iringa region. He said that agriculture still plays a key role in bringing about economic transformation in Tanzania that needs to be boosted by improved access to seeds, inputs and crop markets.

Earlier on, the Acting Iringa Regional Administrative Secretary (RAS), Wilfred Muyuyu said he was proud to inform that AGRA Ihemi-Ludewa project has contributed a lot in addressing most challenges related to productivity, post harvest management and access to inputs and output markets to Iringa and Njombe regions.

He said that in Tanzania, the industrialisation aims to bring about economic empowerment and poverty alleviation for the people in the form of better employment prospects, higher incomes and increased competitiveness in an increasingly integrated global economy.

Muyuyu said the AGRA Ihemi-Ludewa alliance has contributed a lot in addressing most challenges related to productivity, post harvest management and access to inputs and output markets Iringa region.

"We must understand that, in the spirit of empowering local entrepreneurs and investors, such market led models that are promoted by AGRA Ihemi Ludewa Consortium should be replicated in all districts of Iringa region and to other Regions of Tanzania," Muyuyu said.

He said that in the current 2018/19 marketing year, Iringa is estimated to produce 1,346,393 tons of maize, 151,235 tons of beans and 104,867 tons of paddy.

He extended his heartfelt congratulations and appreciation to AGRA Management led by Dr. Agnes Kalibata. "My prayer is that AGRA will continue to support Tanzania and more specifically Iringa region and beyond," Acting RAS said.

AGRA Ihemi/Ludewa Consortium is a Partnership for Inclusive Agricultural Transformation in Africa (PiATA) linking farmers to input and out markets to spur maize, beans and soybean productivity in Ihemi-Ludewa cluster of Iringa, Njombe and Ruvuma regions of Tanzania.

AGRA Ihemi/Ludewa Consortium is a three-year consortium managed project with a life span of three years that officially began in October 2017.

Too little new-generation talent to form a strong national soccer side?

JUMA Kaseja is back in the national soccer side, Taifa Stars to back up current number one goalie Aishi Manula, who is under pressure to play consistently and in all matches as the team leadership doesn't appear to appreciate possible substitutes. The fact that they have decided to bring back Kaseja to the team indicates the paucity of options, implying that the competition is poor, that lack of talent is harming the selection process, as no new dependable goalkeepers are to be seen. That doesn't say plenty of good things on the current crop of soccer players we have.

There are some intriguing aspects about this situation, from the viewpoint of something that in social science is known as 'normal distribution.' It is to assert that if there is no dependable goalkeeper apart from Manula, or none as good as Kaseja among the more youthful crop of players aged below 30 in the main, or less if one looks for a star youthful goalie, then there is a problem with the entire generation of players. The trouble is that there is always an extreme case here and there, for instance Manula is certainly of the current generation as he is only 23 years of age (up to September), while among forwards there is Mbwana Samatta, who is slightly older.

Looking at it from a different angle, it may be said that often goalkeepers have a playing longevity which other players may fail to muster, at times going on up to 40 years of age, as in the case of some UEFA Champions League top clubs. Even in this part of the world we have such players, and not always goalkeepers, as in the case of Roger

Milla, the Cameroon star who in 1990 became the oldest player to score a goal in the World Cup finals, where he scored four goals. That case too is hard to put into normal distribution as it veers off the normal, to special.

Yet the bias that comes from 'normal distribution' is not irrelevant as countries win honors in major tournaments not with one or two special players but a generation of players. It is hard to say if there is a mechanism for a specific generation to put up talents that dominate minds for a generation or longer, without any such talent coming into view after that period. That is true even in localized football, for there was a time that some regions produced players who could take the leading city clubs or archrivals by storm, like Morogoro in 1970 and Kigoma in 1973, during Taifa Cup competitions. With regional contests forgotten, it is hard to follow talents by regions.

Still soccer observers say the trend has not changed from the past, that it is still four regions that account for most premier league talent or a broad portion of it, namely Dar es Salaam, Tanga, Morogoro and Kigoma, precisely what was being noticed in the late 1960s and early 1970s. Nor is the trend different in other sports as no region challenges Arusha and Manyara (split from the former) in athletics generally and long distance running specifically. So authorities need to put some encouragement for investors to put money into academies with sports specialization, as depending on chance alone, to find a good young goalkeeper in a school with no pitch is hard.

It's understandable FAO wants enhanced commitment to containing desert locusts

The battle for the soul of South Africa: Where power really lies

By Special Correspondent

LEARLY, President Cyril Ramaphosa has to stay within the rigours of the Constitution to sort out our state system, but this means that he cannot be held back by the requirements of ANC unity. It seems that President Cyril Ramaphosa's repeated calls for unity in the ANC are falling on deaf ears. The clique around former president Jacob Zuma is brazen and not afraid of supporting him publicly, and that includes Ace Magashule, the ANC secretary-general. The question arises: what real power does this group exercise within the ANC and the state broadly? This issue becomes increasingly important since critical decisions are going to have to be taken

subsequently elect the smaller national working committee). The Top Six meet weekly and are the engine room of everything. At present the Top Six are: Cyril Ramaphosa, president; David Mabuza, deputy president; Ace Magashula, secretary-general; Jesse Duarte, deputy secretary-general; Gwede Mantashe, ANC chairperson; and Paul Mashathile, treasurer. Ramaphosa can rely on support from Mantashe and Mashathile with Mabuza wavering.

Ramaphosa has enormous power as president of South Africa. But Magashule has a great deal of power as de facto head of Luthuli House, ANC headquarters. We shall examine each in turn.

As president, Ramaphosa appoints is in control of the public service, army

head of the deployment committee which places selected individuals in key positions throughout the state system. This includes heads of stateowned enterprises, the chief whip of Parliament as well as chairs and whips of committees. This gives the SG enormous power, especially over Parliament since the chief whip reports regularly to him. It also sets the scene for potential conflict between a Zuma-aligned chair of a committee and the relevant minister appointed by Ramaphosa.

Reference must be made to caucus. This consists of all MPs in the National Assembly and National Council of Provinces. Caucus meets every Thursday morning in the Old Assembly. his Cabinet and through his ministers It is chaired by a member appointed by the chief whip and is administered from

the deputy president, who is the and no minutes, and is only convened when there is a serious political issue in Parliament. Its function is to give political guidance but also to assert leadership where needed. It obviously reports to the SG.

> As it happens, there are conflicting views and loyalties, as we see playing out in the reports of the Public Protector for instance. Parliament is meant to rule on her conduct, so what mandate will come from Luthuli House? Then there is the evidence at the Zondo Commission and the possibility of adverse findings against Zuma. This will also ultimately find its way to Parliament.

> Clearly, Ramaphosa will have to stay within the rigours of the Constitution to sort out our state system, but this means he cannot be held back by the requirements of unity.

N 2004 United Nations Food and Agriculture Organization (FAO), Dr. Jacques Diouf, Director-General welcomed the decisive outcome of a ministerial meeting held in Dakar, Senegal, in response to the desert locust threat to crops and pasture in the region. "To make a real impact in the battle to control the desert locust upsurge, help must arrive this month in order to disrupt the next locust breeding cycle in October". Dr. Diouf said. "Otherwise the infestation could spread to even more countries in Africa threatening food security in a wide area."

Dr. Diouf said that there was an urgent need to get large quantities of pesticides, spraying equipment and other means to the scene, but to do so required funds which were only now becoming available. "Locusts don't respect political boundaries, so it is essential that the countries in the region work closely together to tackle this emergency. I warmly welcome the commitment and determination shown by the ministers," Dr. Diouf said.

The complex battle to control the locust upsurge in western Africa calls for close coordination and cooperation among the affected countries, donor countries and organizations and United Nations agencies with technical expertise such as FAO, he said. Since October 2003 FAO has been warning of the growing threat to crops from locust swarms caused by the abundant rains that fell in the summer of 2003 throughout much of West Africa.

FAO recognized the impending threat thanks to the early warning systems developed by the Locust Group as part of the special FAO programme called EMPRES (Emergency Prevention System for Transboundary Animal and Plant Pests and Diseases). A warning signal has been sounded FAO that locust breeding is rapidly spreading at some spots in the Horn of Africa, and large swarms could start spreading out by September. This projection coincides with the usual pattern of locust outbreaks that they peak in

September, and their breeding grounds have apparently not changed. It has to do with temperature, moisture and wind patterns best suited for the gregarious and voracious species, eating its own body weight per day, a mere two grams....

Knowing the sort of devastation that locusts can bring about, countries in the region are quite apprehensive about what comes next, but there are crying gaps in organizational synchrony on the matter. The focus area of the formation of bands of egg laying locusts - where each female insect lays up to 300 eggs - is a stretch of territory that has weak governments, no government at all or there are weak governments at war with one another or within those countries. It is by and large the most hospitable environment the hopper bands to breed, start spreading with impunity.

So far it is the FAO that has taken up the function both of whistle blower and administrator of the situation, saying in a statement that it had purchased additional 'equipment' to increase the capacity of governments to respond to the desert locust menace. It did not say what kind of synergies were being put up together, in collaboration with those governments and especially among themselves. This is where the matter is likely to become tricky, on account of broadly defined lawlessness in the area, where governments are at war, or cornered in self defence, etc.

For one thing, the menace from desert has been diminishing in the decades since independence on account of sharper observation, detection and reaction tools developed since then. Satellite surveillance started decades ago, after which came cheaper aerial spraying capacities, the sort that it appears the UN agency was hinting at in its statement. Currently, surveillance aircraft can pinpoint the breeding points and integrate the data with internet maps for ground positioning, which means governments have much less to do at present. But UN agencies can't order people.

as divergent pressures build up.

To answer this question, we have to go back to the original source of power within the ANC and government. The constitution of the ANC gives local branches the basic power, which is then conveyed upwards through elected delegates. The larger the branch, the more delegates. These delegates are then mandated for national conference. The branch will also make nominations for Parliament and the provincial legislatures in what is called the "list process".

Taking national conference first. it elects the top six officials and the national executive (which will

By Andrew Ihsaan Gasnolar

HE real challenge for South Africa is that the fight back campaign, which is focused on undermining any attempts at accountability and accounting, will relentlessly continue at any cost.

South Africa's political economy and landscape have for far too long been shaped by a few men and women. The consequences for the country is that South Africa was burdened with a lost decade, the costs of which will be borne by generations of South Africans. It is unimaginable that issues of social justice (let alone natural justice) would allow this to happen.

However, we should have expected this if we are honest about how the existing ecosystem of our country is geared towards supporting the incumbents even when those incumbents have a long string of accusations against them, many of which existed long before the outcome of the 1994 election. The disconnect with which public representatives operate should not surprise or shock South Africans, but what should outrage all of us is that we continue to simply move the deck chairs around on this sinking ship.

The suggestions by the Economic Freedom Fighters, and particularly Julius Malema, around the plotting to remove

and police. He appoints the premiers of the provinces and through his ministers, he controls the state-owned enterprises. As secretary-general, Magashule acts on behalf of the Top Six, but with considerable personal discretion, he oversees the provinces, the ANC in Parliament, and all ANC branches. He is in charge of all arrangements for national conference and for national policy conference in between the national conferences.

He is in charge of the list process for Parliament and the provincial legislatures, acting with a list committee appointed by himself.

the latter's office. Caucus is normally briefed by ministers on forthcoming legislation, which is open for discussion. It is also addressed periodically by the SG and the president, who use the occasion to align MPs with the thinking in the national executive and Luthuli House generally. Members are free to give their views, but inevitably there is a strong sense of not stepping out of line. One other committee is important but never appears to be discussed, and

this is the Political Committee headed by the deputy president and consisting of several ministers, the chief whip and a few selected MPs. This committee

He also works in tandem with meets informally, has no secretary

It is often argued that MPs swear allegiance to the Constitution and should therefore at all times defend the rights of ordinary citizens. But MPs also swear allegiance to party constitutions and there may well be a choice to be made. The ANC structure we set out above shows clearly that party discipline is very strong and may well override other considerations. This becomes even more sensitive when the person leading the state is in disagreement with the person running the governing party, as the current situation appears to be.

Members of the ANC but also the people of South Africa are going to have to choose between them.

There's every reason for South Africa to make sure those attempting to hijack democracy fail

former president Jacob Gedlevihlekisa Zuma is another distraction from confronting the challenges South Africa should be wrestling with. It is not surprising that Ace Magashule, in his capacity as ANC secretary-general, would take to heart the suggestion that NEC member Derek Hanekom was plotting with the EFF to remove Zuma, and would go to such lengths as to issue a late-night statement to articulate the outrage the party felt about such suggestions. The factional nature of our political environment is both palpable but also inescapable, and its pervasive nature is focused on keeping us off target.

Those supportive of the State Capture agenda have consistently and continually been mounting attacks on a number of fronts, even if this threatens to tear the ANC apart. We should not be surprised by these antics. These same individuals have never been interested in serving the republic or its people, but rather about supporting their own extravagant lifestyles, supporting their lavish trips to Dubai (and elsewhere), and visiting Saxonwold or its local "shebeen" for the odd curry. The only outcome is that they will continue to

do everything possible to hold on to their slice of the pie - at the expense of the republic, its citizens and even the political party that allowed them to take on their very leadership positions, which has cost South Africa so much.

South Africans witnessed the philosophy of Zuma at the Zondo Commission. We were able to peek into the thinking of a man so focused on protecting himself and his associates that he was willing to sacrifice South Africa's sovereignty and scarce resources in order to fulfil the interests of a few.

The peddling of conspiracies and plots presented to the Commission should not be considered in isolation, but rather in the broader context of how spooks, spies and intrigue have been used by not only elected public representatives but also those who find themselves in the broad church that is the ANC and the Tripartite Alliance.

Zuma did the initial legwork at the Commission around conspiracies, and threats to undermine his administration, and so it makes all the more sense that the EFF would reveal these startling allegations, which would quickly be followed-up by a late-night (rushed and

issued via WhatsApp) press statement from Magashule.

The only way to close out that conspiracy theory must be via Zuma's Twitter account where he seeks to suggest that Hanekom (and those who have acted in a similar manner) are simply "enemy agents". A shocking suggestion from Zuma, noting that he appointed Hanekom to his Cabinet. supported his portfolio, and in fact, allowed the very same man to chair disciplinary procedures and act on behalf of the ANC at a time when Zuma himself was leading Africa's oldest liberation movement.

The need for conspiracy theories to be peddled, and threats of "enemy agents" is an intriguing one in certain circles, but this is not what South Africa requires, especially from current and former public representatives who should be prosecuted for the grave crimes they committed against this republic. These are not the acts of citizens interested in protecting or serving the country. This is not the conduct required by South Africa at this moment as it seeks to correct more than a decade of rampant corruption and a creeping culture of disrespect for the rule of law.

It is canonical to the general public that the judicious application of Electronic Tax Stamps System (hereinafter referred to as "ETS") for cigarettes, wines, spirits, beer, and all kinds of alcoholic beverages started on **15th January 2019.** Indeed, this was Phase I of ETS implementation. The same has, thus far, been (and continues to be) implemented successfully. Our profound thanks to all taxpayers for supporting and cooperating with Tanzania Revenue Authority (TRA) in the **Phase I** of ETS implementation.

Following the aforesaid, therefore, the general public is hereby informed that on 1st August 2019 shall be the effective date for implementation of Phase II of using ETS. Indeed, Phase II of the same shall apply to products such as "sweetened or flavored waters and other non-alcoholic beverages, with the exclusion of fruit vegetable juice of tariff heading 20.09". The aforesaid effective date is announced, well in advance, in accordance with the provisions of **Regulation 29** of The Electronic Tax Stamps Regulations, 2018 and that the specified products shall involve includes all locally produced or imported as mentioned above.

Admittedly, the abovementioned products in **Phase II** were not affixed with tax stamps prior to an introduction of ETS. Henceforth, all products currently present in the market and in the warehouses of either the manufacturers or importers will continue to be traded for up to **31st January 2020**. It follows, therefore that, after the fixed end date (that is, on 31st January 2020), all relevant goods shall be affixed with ETS. The public is, further, categorically notified to take note and understand that the new manufactured or imported products must be affixed with ETS as from **1st August 2019** as clarified above.

Likewise, TRA wishes to inform the general public that every manufacturer and importer of the specified goods shall be required to declare all quantities of products with no ETS in their possession (unsold) in the prescribed form (which is downloadable at <u>www.tra.go.tz</u>) and each TRA Regional Office before the effective date. Finally, all the manufacturers, producers, and importers of the specified products are reminded to **submit full details of their brands, forecasts of quantities** of ETS they intend to use before the effective date and make registration in the Electronic Tax Stamp Management System (ETSMS) to enable ordering of the new tax stamps through a secure web portal (<u>https://taxstamp.tra.go.tz</u>/) available in the TRA website.

The effective date for the other items not mentioned in Phase II shall be announced later. Such products include fruit or vegetable juices, waters, and films/music products (CDs/DVDs/Tapes). For more information and inquiries you may visit the nearest TRA Office, Website (www.tra.go.tz), or use TRA Call Centre through Toll Free *Number 0800 750 075 or 0800 780 078* or email: services@tra.go.tz

PREQUALIFICATION NOTICE FOR SUPPLIERS AND SERVICE PROVIDERS OF GOODS AND SERVICES

Kurasini Area

PROCUREMENT NOTICE

Invitation for Pre-qualification

Rehabilitation, of Residential House at Masaki & General Toilet Facilities at Kurasini Head Office.

IfP No: ZCL/SW/IFP/1/2019

- Zambia Cargo & Logistics Limited has set aside maintenance funds in its financial year 2019 and it intends to apply part of the proceeds of these funds to undertake the contract "Rehabilitation, of Residential House at Masaki & General Toilet Facilities at Kurasini Head Office." Zambia Cargo & Logistics Limited intends to pre-qualify contractors for Rehabilitation, of Residential House at Masaki & General Toilet facilities at Kurasini Head Office.
- 2. Pre-qualification will be conducted through the procedures as specified company's public procurement regulations governing body.
- 3. Interested eligible applicants may obtain further information from and inspect the Pre-qualification Document at the head office of Zambia Cargo & Logistics Company Limited (address below) from 08:00 hrs to 12.00hrs on Tuesday 30th July 2019 to Thursday 1st August 2019.
- 4. A complete set of the Pre-qualification Documents in English may be obtained by interested applicants through the submission of a written application to the address below, not later than **Thursday 1st August 2019**.

Applications for Pre-qualification should be submitted in sealed envelopes, delivered to the address below by 10:30hrs on 06th August 2019 and be clearly marked "Rehabilitation, of Residential House at Masaki & General Toilet Facilities at Kurasini Head Office-IFP No: ZCL/SW/IFP/1/2019".

Attention: The Procurement Controller, Street Address: Zambia Cargo & Logistics Company Ltd, Kurasini Area, Plot No. 237, Near Dock Yard, PO Box 105638, Dar es Salaam – Tanzania.

Catholic Relief Services Tanzania Program intends to update a list of local suppliers, service providers for the supply of goods and services for the year 2019/2021.

Currently, CRS operates in Mbeya and Dar es Salaam Regions. CRS is looking to prequalify eligible, competent and experienced firms to apply in their respective category as listed below to perform various services.

Pre-qualification will be conducted according to CRS Procurement Policies and Procedures. Only shortlisted vendors will be eligible for invitation to quote under competitive procedures each time when needed.

Vendors will be selected and prequalified based on submitted business profile which entail legal compliance, brochures, price list, experience in the market, financial health (provision of audited financial statements), description of similar assignments, technical competence (CVs of key staffs), ability to meet current & future demand, warranty validity, after sale services and manufacturer's authorization.

CATEGORIES FOR PRE-QUALIFICATION

The list is under independent lots; evaluations and pre-qualification will be on lot basis.

Start the week with Cynthia Stacey

Biscuits, billboards and blah blah!

finds me removing faded news cuttings from my notice board prior to repairing it, and some of them go back years, but make interesting reading because of it.

I've often written about wasteful research, like a study done last year involving a large group of people which revealed that those who smile a lot are happier than those who don't... this beggers belief, and is a good case for questioning the funding that's sloshing around.

In a more sensible era, those doing worthwhile research scouted for the funds. Though nowadays it often appears that the funders go in search of the recipients, and possibly get commission for doing so, or whatever.

...but a cutting I'm looking at now is the gem of the genre, with a heading of "Half of Brits injured by biscuits" ...does this illustrate the lunacies of the advanced economies?...(I'm cutting down on using the term 'the western world')

Anyway, readers of this would have learnt that according to the survey, " more than half of all Britons have been injured by biscuits. This ranged from being scalded by hot tea or coffee whilst *dipping in the biscuit, or breaking* a tooth on hard ones" reported a British newspaper.

And..." an estimated 25 million adults have been hurt while eat-

IAMBO for the week, which *ing biscuits during a tea or coffee* break, with at least 500 landing *in hospital.* One of the worst offenders was a custard cream *biscuit, which beat a plain one to* top the table of 15 generic types of biscuit whose potential dangers were calculated by The Biscuit In*jury Threat Evaluation*". (I'm not making this up you know...!)

"Custard creams got a risk rating of 5.63 compared to Jaffa cakes which was the safest biscuit of all in the evaluation.

Research company Mindlab International were commissioned by the producers of Rocky, a chocolate biscuit bar, to conduct the research, and found almost a third of adults said they'd been splashed or scald*ed by hot drinks whilst dipping in* a biscuit, or trying to pick out the remnants of a collapsed one.

It also revealed that 28 per cent had choked on crumbs whilst one *in 10 had broken a tooth or filling* by biting into a biscuit.

More unusally, 3 per cent had poked themselves in the eye with one, and 7 % were bitten by a pet or *'other animal' trying to get at the* biscuit. Mindlab International Dr. David Lewis said, "We also tested the physical properties of 15 popular types of biscuits, along with aspects of their consumption, such as 'dupability' and crumb dispersal". ...end of report, and I trust you

are all stunned...so how do I follow that ...?!

Well, no connection to bis-

cuits, but how about electioneering, on which there's dialogue going on around the globe, with people being quoted on either the idiotic statements they've made, or the clever and noteworthy ones. And closer to home, in October 2010, I was filing notes on what was being said in the run up to the national elections, and pinning some to the board, which I'm reading now.

As players in the field, Josephine Mushumbusi, fiancee to Chadema presidental contender Dr. Willibrod Slaa, declared at a rally, that she wouldn't defend herself against rumours and accusations, and would let God almighty decide her destiny... and as an afterthought, said she had no interest in politics!

Some male participants in this game might welcome a break from it when returning to the marital hearth. For others though, a spouse who engages in political concerns is almost

a necessary requirement of her 'job description' apart from that of being a wife. But back to the partner in question, once more being

quoted as saying "Once I become the first lady, no one need worry about me flying around the world with state money campaigning for my husband". Not surprisingly, given the

anger and concern over squandered public funds at the time, (not only from Chadema sup-

An attractive and colourful poster billboard for the 2015 elections in Dar es Salaam, in which the ruling CCM's Dr John Magufuli won the presidential vote. A useful medium to campaign or advertise in, bill boards, should be well regulated to fit the scale of the area in which they are sited.

porters) this clever little statement, more loaded and effective than an outright campaign speech, was greeted with hearty applause.

Though perhaps an admission of political apathy seems an unlikely way for a possible first lady to gain popularity. Though it worked for Carla Bruni, the ex singer and model wife of France's former President Sarkosy, who expressed similar disinterest in her husband's work, but eclipsed him in public, simply by standing around looking pretty.

It's debatable how natural was the birth of multi party politics in Tanzania, as opposed to a donor doctored conception, but the 'baby' tumbled into a world of major challenges, with Tanzania politically in David and Goliath mode. It was an exciting time, and 26 years later it still is, though the mighty machine that powers the ruling party's momentum, will create an unequal balance for some time to come.

Anyway, as the wife of Tanzanias' Ambas-

hope Josephine is enjoying life, and with slightly more freedom of speech etc. than she would have had as a presidential spouse!

***** Well talking of 'mighty', at the time of that

2010 election, people were wondering could advertising bill boards get any bigger, and residents of a local estate, declined to renew their agreement allowing a gigantic billboard in their compound. They were therefore surprised to see it once again, framing another advert, but this time for the CCM election campaign. Without informing anyone, workers came at dusk, crudely slashed the flowering hedge, and placing the huge poster in the frame, then left without clearing the debris.

At the time, but yet to come into force, (was it delayed for the election?) was the Dar es Salaam bill board and advertising control regulations of 2009. Under the Prime Minister's Of-

sador to Canada, and with God to guide her, I fice, this stated an advert relating to a pending election for local or central government, was exempt from certain controls governing others.

Nevertheless, the manner of placing this advert was an unacceptable way for CCM to convey their message, especially since the company involved, had months before been ordered to remove the entire structure due to its inappropriate dimensions and siting.

Time to close, but not before I've mentioned another jotting from the notice board... Thomas Jefferson, 3rd President of the United States, said..."were it left to me to decide whether we should have a government without newspapers, or newspapers without government, I should not hesitate to prefer the latter"...quite right too, who needs politics...learn to love us press people instead, me in particular!

....enjoy the week, and stay away from dangerous biscuits!

Inside Africa's bid for digital economy

By Julius Bizimungu

ETWORK infrastructure and connectivity are backbone of a vibrant digital economy.Yet, there is still a big gap when it comes to linkages in transport, communications, energy, and water networks across the African continent.

This was observed on Tuesday at the 'Invest-

rently, internet penetration stands at about 50 per cent of the population.

Harkirit Singh, the Global Head of Solutions for Tata Communications shared his experience working in Tanzania in the 1990's, and said connectivity drives many sectors and economies.

"My first job back in 1997 was to set up a first telephone link connecting Tanzanian tea plantation farmers and Tanzania Telecom Corporation, and

But Singa reckons that there is an urgent need to liberalise the digital space, especially to break the monopoly of services like data hosting and network provision offered by telecom companies and other big companies.

For Alex Ntare, the head of the ICT Chamber in Rwanda, connectivity services for basic needs like that provided by babyl and education should not be subjected to the same pricing as those that are entirely commercial in nature.

Rwanda officially the Republic of Rwanda is a country in central and

ment Forum' organised by the Rwanda Development Board (RDB) and Africa50, ahead of the latter's Annual General Shareholders' Meeting on Wednesday.

At the forum, experts from the banking sector, technology, and health, made a case for increased investment to bridge the gap in Africa's infrastructure connectivity, which they said will be realised through private and public partnerships.

Infrastructure funding gap in Africa is estimated to be around \$130-170 billion a year, according to the African Development Bank.

To bridge such a gap, Diane Karusisi, the chief executive officer of Bank of Kigali, cited a case of Rwanda and the lead that Government took to lay out broadband infrastructure to enhance connectivity.

"Rwanda was a pioneer in laying the fibre optic backbone across the country to enable last-mile connectivity. This has helped businesses a lot those in smart transportation and bankers like us - to ensure our customers easily transact on their mobile phones from wherever they are," she said.

The fibre optic backbone has also seen more people in Rwanda connect to the internet, and cur-

I have seen the delight that people had than they had before," he said.

Digital strategy

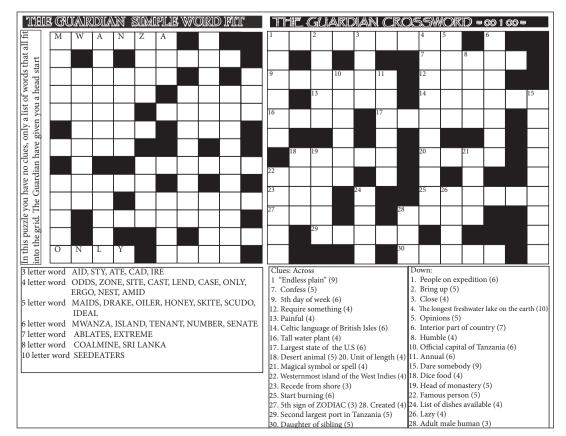

Singh said that connectivity provides opportunities which drive economies, emphasising the need to create conducive frameworks for entrepreneurs and investors, something he said propelled his country, India, to develop fast.

"In India, we did not create innovation hubs or an innovation city, what we created is the enabling framework that allowed people to be sure that when they come up with some technology or innovations, they are going to be protected," he said.

That same framework [the National Digital Strategy], he said, also allowed people to receive support from financial institutions in terms of investment they are looking to build, as well as support from academic institutions like Indian Institutes of Technology

These institutions have enabled India's mobile digital revolution and have trained outstanding technologists and engineers who work for multinational corporations such as Google, Amazon and Facebook.

Most of these are companies that are building

Bank of Kigali chief executive Diane Karusisi speaks at the Investment Forum in Kigali recently.

digital infrastructure, allowing millions of people to do business without relying on traditional infrastructure.

Singh said it was, therefore, important for African governments to invest significant resources in educational institutes that are able to train the next generation of engineers and adopt innovative financing models for connectivity.

"We are working with Google and Facebook to promote open internet access and the model is innovative. If today we set up Wi-Fi infrastructure on buses, railways and across the city in Kigali, the number of people using application on that platform, every time they click using that Wi-Fi infrastructure, Google and Facebook pays back," Singh says.

Such financing model is being adopted by big technology companies to expand their reach, especially in rural areas and this is helping bring connectivity access to people living in remote areas.

Bridging the gap

A recent report by the Global Infrastructure Hub which focused on ten African countries -Rwanda, Morocco, Ethiopia, Ivory Coast, Senegal, Egypt, Ghana, Tunisia, Benin, and Guinea - indicated that there was a huge financing gap.

To keep pace with success stories elsewhere such as Vietnam in terms of developing roads, railways, airports, sea ports, electricity, water and physical telecommunications infrastructure, these nations require investments of \$2 trillion through 2040.

Patrick Singa, a Medical Director at babyl - a startup that provides digital healthcare solutions by helping patients consult doctors using their mobile phones - said they are finding a way around physical infrastructure to bring innovative solutions to people in need.

"We are tapping into digital platforms that are affordable and accessible to offer services to people. We are now using USSD (a global system for mobile phones) to allow patients to consult doctors," he noted.

East Africa and one of the smallest countries on the African mainland. Located a few degrees south of the Equator, Rwanda is bordered by Uganda, Tanzania, Burundi, and the Democratic Republic of the Congo. Rwanda is in the African Great Lakes region and is highly elevated; its geography is dominated by mountains in the west and savanna to the east, with numerous lakes throughout the country. The climate is temperate to subtropical, with two rainy seasons and two dry seasons each year.

The population is young and predominantly rural, with a density among the highest in Africa. Rwandans are drawn from just one cultural and linguistic group, the Banyarwanda, although within this group there are three subgroups: the Hutu, Tutsi and Twa. The Twa are a forestdwelling pygmy people descended from Rwanda's earliest inhabitants. Scholars disagree on the origins of and differences between the Hutu and Tutsi; some believe differences are derived from former social castes within a single people, while others believe the Hutu and Tutsi arrived in the country separately, and from different locations. Christianity is the largest religion in the country; the principal language is Kinyarwanda, spoken by most Rwandans, with English and French serving as additional official languages. The sovereign state of Rwanda has a presidential system of government. The president is Paul Kagame of the Rwandan Patriotic Front (RPF), who took office in 2000. Rwanda today has low corruption compared with neighbouring countries, although human rights organisations report suppression of opposition groups, intimidation and restrictions on freedom of speech. The country has been governed by a strict administrative hierarchy since precolonial times; there are five provinces delineated by borders drawn in 2006. Rwanda is one of only two countries with a female majority in the national parliament.

Hunter gatherers settled the territory in the stone and iron ages, followed later by Bantu peoples. The population coalesced first into clans and then into kingdoms. The Kingdom of Rwanda dominated from the mid-eighteenth century, with the Tutsi kings conquering others militarily, centralising power and later enacting anti-Hutu policies. Germany colonised Rwanda in 1884 as part of German East Africa, followed by Belgium, which invaded in 1916 during World War I. Both European nations ruled through the kings and perpetuated a pro-Tutsi policy. The Hutu population revolted in 1959. They massacred numerous Tutsi and ultimately established an independent, Hutu-dominated state in 1962. A 1973 military coup saw a change of leadership, but pro-Hutu policy remained. The Tutsi-led Rwandan Patriotic Front launched a civil war in 1990. The presidents of Rwanda and Burundi, both Hutus, died together when their plane was shot down in April 1994. Social tensions erupted in the 1994 genocide, in which Hutu extremists killed an estimated 500,000 to 1 million Tutsi and moderate Hutu. The RPF ended the genocide with a military victory.

Rwanda's developing economy suffered heavily in wake of the 1994 genocide, but has since strengthened. The economy is based mostly on subsistence agriculture. Coffee and tea are the major cash crops for export. Tourism is a fast-growing sector and is now the country's leading foreign exchange earner. Rwanda is one of only two countries in which mountain gorillas can be visited safely, and visitors pay high prices for gorilla tracking permits. Music and dance are an integral part of Rwandan culture, particularly drums and the highly choreographed intore dance. Traditional arts and crafts are produced throughout the country, including imigongo, a unique cow dung art.

RELIEF

Sigh of relief for **UŠ-based firm as TPDC's Director General ordered** to resume duties

By Guardian Reporter

THE recent reinstatement of Tanzania Petroleum Development Corporation's Director General, Dr James Mataragio, has exonerated Bell Geospace Inc against allegations of wrongdoing in the awarding of a tender on gradiometry survey of a gas blocks in 2016, according to the US-based firm.

Bell Geospace Inc's President and CEO, Scott Hammond, expressed relief after hearing news that President John Magufuli had ordered Dr Mataragio and his suspended team back to

work last week, after over two years since being suspended by TPDC board on allegations of corruption.

"First of all, we were very glad to hear that this situation is finally resolved for Dr Mataragio and the rest of his staff that were suspended. It was a very long time and very difficult on everyone involved," Hammond wrote in an emailed response while stressing that the TPDC's chief is an upright professional man who doesn't condone corruption.

said.

According to the MP, thev

were expecting the Commit-

tee on implementation to en-

force part of the report which

adversely mentions Mr Kinyua,

who was in June last year ap-

pointed to the board by Presi-

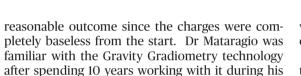

dent Uhuru Kenyatta. He said

that the House has adopted the

report, which found Mr Kinyua

guilty of conflict of interest and

that it came as a shocker when

time with Bell Geospace," Hammond argued. The Bell Geospace Inc President and CEO further noted that Dr Mataragio knew the Gravity Gradiom-"As to the final results, Bell Geo- etry technology as being widely used worldwide by space believes that this was the only most of the major oil and gas companies because it

would provide valuable information to TPDC for its exploration program.

"Once he decided it was needed technology he turned the entire tendering process over to his professional staff and it was all handled completely above board. Bell Geospace is the pioneer of this technology and has been acquiring these surveys for 20+ years," Hammond pointed out. In addition, TPDC awarded the first of two gradi-

ometry projects to Bell Geospace direct competitor because despite being headed by Dr Mataragio, he strictly respects thorough professional approaches in such assignments.

President Magufuli ordered Dr Mataragio's reinstatement as TPDC Managing Director while describing him as an honest patriotic Tanzanian who was suspended mistakenly. The TPDC chief and his colleagues were also charged of abuse of office.

CENSURE

KFS board chairman on the spot over café inside Karura

NAIROBI

QUESTIONS have been raised over the legality of the operations of River Café which is located in the middle of Karura Forest in Nairobi.

Chairman of the National Assembly Environment Committee Kareke Mbiuki, who is also the Maara Member of Parliament, Saturday told the Sunday Nation that the establishment of such restaurants was respon-

sible for the dwindling forest cover as senior government officials whimsically allocate themselves spaces in the natural resource for commercial gain.

In a classic case of conflict of interest, the café is being run by Mrs Sophie Kinyua, who is Kenya Forest Service (KFS) board chairman Peter Kinyua's wife. "He should not hold the KFS position in all fairness and it is unfortunate he continues to operate the restaurant," Mr Mbiuki he learnt that he had been

awarded another term at the board.

"It is unfortunate that he was awarded another term in office even after we raised the concerns," he said, adding that if found guilty Mr Kinyua should be barred from holding public office.

He said that Mr Kinyua contravened section 101 of the Penal Code and Public Officer Ethics Act 2003, as well as the Mwongozo Code of Governance

for State Corporations.

Conservationists have in the past raised concerns over the existence of the café saying that the area where it stands was in 2014 designated as a place where indigenous trees would be planted, which led to the felling of trees and space cleared for the project.

Chief conservator of forests Mr Julius Kamau said that there were procedures that one should follow before setting

up a restaurant inside a forest. However, when asked about River Café, he declined to comment on the matter. On his side, Mr Kinyua referred the Sunday Nation to lobby group Friends of Karura over the matter.

"I can't comment on that but it is okay if you contact the Friends of Karura they are in a better position to say something about the café," he said. While appearing at the National Assembly's environment committee last year, Mr Kinyua admitted that the joint was being run by his spouse. He said that she had run it for close to two years before he became chairperson of the board.

This prompted members of the committee, including Hilary Kosgei (Kipkelion West), Charity Chepkwony (Njoro) and Sophia Noor (Ijara) to ask the Ethics and Anti-Corruption Commission (EACC) to investigate the matter and take action.

Kenmare Resources says no 'tax benefits' from firms in Mauritius

ΜΑΡυτο

con, a source of zirconium metal.

IRISH stock market-listed mineral exploration company Kenmare Resources has said it does not benefit from low corporate tax rates in Mauritius after two of its affiliate companies were included on a list of companies linked to the African island nation. The entities - Kenmare

Moma Mining Mauritius Ltd

and Kenmare Moma Processing Mauritius Ltd - were

included on a long list of

companies published by the

International Consortium of

Investigative Journalists, or

the ICIJ, which were incor-

porated in Mauritius.

The company said its subsidiary companies are registered in Mozambique and that it pays taxes in that country. It said it has invested \$1.2bn (€1.1bn) in the Mozambique mine and paid the Mozambican government more than \$83m between 2013 and 2018.

"Kenmare operates the Moma mine and associated facilities in Mozambique through two subsidiary project companies," a Kenmare spokesman said. Both are registered as branches in Mozambique and, accordingly, pay all taxes due in Mozambique.

Kenmare has no mining The company spokesman said all tax payments are reoperations in Mauritius, but it operates one of the world's ported publicly each year and largest mineral mines in Mothe Mauritian companies "do zambique. The mining comnot confer - and never have pany - which has its shares conferred - any tax benefits on Kenmare. "The project listed on the Irish and London stock exchanges - opcompanies were incorporaterates the Moma titanium ed in Mauritius, as lenders required an African jurisdiction mine in Mozambique and directly employs 1,400 people with an appropriately funcat the extensive site. tioning and efficient common The mine produces 7% of law regime," the spokesman said. Kenmare is set to pay its first ever dividend to share-

the world's ilmenite - the main source of titanium metal - and titanium dioxholders, in October, based ide, which is used as a white on a significant increase in pigment in paint. It also prorevenues and profits last duces 4% of the world's zir- year.

APPROVAL

PM Majaliwa pays tribute to NMB for supporting govt in education, health

By Guardian Reporter, Ruangwa

NMB Bank Plc's continued investment in education and health sector is an important role in support of government's efforts to improve quality and

availability of such services to the public. Prime Minister, Kassim Majaliwa said yesterday after receiving an assortment of constriction material, desks and books all

valued at over 25m/- in support

of his constituency's education mercial banks and other compaand health sectors that NMB's management has shown commitment to back state efforts for many years.

"As government, we recognise and appreciate the contribution being made by NMB in supporting development projects but also disaster relief when misfortune strikes the community," Majaliwa noted.

He pledged the government's continued improvement of the investment climate so that com-

nies should operate profitably.

Speaking after handing over the materials, NMB's Head of Government Business, Vicky Bishubo said the bank values support which it receives from the community hence feels obliged to invest part of its profits in support of social services. "So far this year we have al-

ready spent over 600m/- of the allocated 1bn/- in support of education, health and disaster relief," Bishubo said while stress-

ing that NMB understands the has the largest physical branch importance of having a healthy and educated population for

growth. The donated materials which also included computer sets, aluminium windows and timber planks will benefit Nandagala health centre, Kassim Majaliwa Secondary School and note books to several public schools in Ruangwa constituency.

The NMB Head of Government Business further noted that the Dar es Salaam based bank which

network countrywide support projects in every corner of the country targeting education, health and disaster relief.

"For the past seven years, we have annually allocated one percent of our profit to invest in social projects as part of our corporate social responsibility program," she stressed while pledging to continue such investments for the foreseeable future.

tasks is to identify and take control of the in- ing industries, given that 96 percent of the 207 vestment areas on behalf of the government are small-scale industries firms, with possibiliand find investors. "However, this should not ties to upgrade to medium and large-scale inbe done by EPZA alone but we encourage regional and district authorities to collaborate in speeding up the process of setting investment areas necessary for attracting investors for industrial development," he said.

The regional investment guide launched by Prime Minister Kassim Majaliwa is meant to cater for the needs and sorts out productive activities in the region and offer information to private investors both local and foreign to tap the resources.

According to the investment guide, there are also plenty of opportunities to invest in new and existing agro-processing and manufacturdustries.

Currently, there are only 19 medium-scale industries, most of which are in Songea municipality and Mbinga town council. The newly established factories include two maize milling factories for which one is still under construction.

The agriculture sector engages about 75.8 percent of the people in the region with mainly coffee, beans, maize, groundnuts, paddy rice, potatoes, tobacco, cassava, sesame, millet, coconuts, cashew nuts, sorghum, fruits and sunflower production, among the top crops

CONCERN

Farmers of French beans decry high pesticide cost

KIGALI

THE cost for an imported effective pesticide used in controlling disease attacking French beans is high, farmers have said, calling for interventions such as government subsidies to make it affordable.

Farmers told Sunday Times that the pesticide called Ortva costs over Rwf150,000 a litre, and that some two litres of it valued at over Rwf300,000 - are sprayed on a hectare plantation upon harvest

Hategekimana, Emmanuel President of Abadasigana ba Kinyinya, a cooperative farm-

ers growing French beans (also called green beans) in Kinyinya Sector of Gasabo District said that such a pesticide is used to manage a disease called anthracnose, which is locally known as'Nyirakadori.'

It is considered a major disease of beans and is caused by a fungus, which impairs the quality of the beans and reduces vields. The cooperative grows the crop on about 15 hectares, and has 56 farmers. "Such a disease is infectious and can cause serious losses to the farm produce if it is not treated. The pesticide to tackle it is expensive," Hategekimana said.

"Our suggestion is that there should be entrepreneurs to produce it [within the country], and the government provides a subsidy to bring the cost down," he said as he appealed support. Pierre Nzabamwita, President of Abakumburwa Kajevuba, a French bean farmers' coopera-

tive in Gasabo District's Rutunga Sector also said that the pesticide is expensive for farmers. The cooperative has over 450 members growing vegetables on 80 hectares, of which 52 are used for French beans cultivation. Nzabamwita said that between 23 and 13 tonnes of French beans are produced on a hectare

Vodacom, MTN made to wait as SA targets smaller firms

JOHANNESBURG

VODACOM Group and MTN Group's long wait for the auction of new spectrum in their home market of South Africa is set to continue after the government made clear the priority is to increase opportunities for smaller companies.

The telecommunications ministry said Friday that more than 400 operators with no access to spectrum should be allowed to use a wireless open access network, or WOAN, to boost competition and lower communication costs. That may push back allocation for the two market leaders by as many as two years, according to Dominic Cull, a telecommunications regulatory lawyer at Cape Town-based Ellipsis **Regulatory Solutions.**

"The problem is that the implementation of the WOAN, and getting applications in for licenses could delay the actual spectrum auction by another year or two," he said by phone.

Vodacom and MTN say they need new spectrum to continue rolling out broadband in the country and reduce data prices. They were told by a competition regulator in April to reduce charges anyway, which led to Vodacom reporting a fall in first-quarter South African revenue on Thursday.

The Johannesburg-based company said it will review the WOAN document and comment in due course. "The confirmed plan for a WOAN in South Africa dashes Vodacom's hopes for quick access to spectrum to cut costs and widen service availability," John Davies, an analyst at Bloomberg Intelligence, said in a note. "The WOAN and auction design will take time and mean that spectrum available to large incumbents Vodacom and MTN will be limited and relatively expensive.'

The spectrum auction was last formally set for

early 2017, but postponed due to a dispute over the process between the government and the industry regulator, known as Icasa. Businesses will need to apply for licenses to be part of the WOAN, and only then will spectrum be allocated to them with reduced fees. The policy aims to allow entry to smaller operators unable to compete for spectrum against the big operators.

The problem is that the implementation of the WOAN, and getting applications in for licenses could delay the actual spectrum auction by another year ADVERTISEMENT

Jason Statham, Idris Elba, and Dwayne Johnson in 'Fast & Furious'.

A Minute With: Jason Statham and Idris Elba on 'Fast & Furious' spin-off

COLOGNE, Germany

DWAYNE Johnson and Jason Statham return as agent Hobbs and outcast Shaw in "Fast & Furious: Hobbs & Shaw", their own spin-off in the hugely successful film franchise.

The two characters, who strongly dislike each other, must join forces against villain Brixton, played by Idris Elba.

Reuters spoke to Statham and Elba about the spin-off and franchise, whose films have grossed more than \$5 billion worldwide. Below are edited excerpts of those interviews.

IDRIS ELBA

Q: How would you describe your character? **Elba:** "My character is a human being with an extraordinary ability, he's part machine and this part machine is designed to fight. It's designed for war. He has a big ego ... in fact his ego is what might destroy him as opposed to his machinery ... He has a recurring memory that isn't a good one."

Q: What was it like working with Jason Statham and Dwayne Johnson?

Elba: "It's working with the best in their

AAT stages Go-karting training for teen drivers

By Guardian Correspondent

FOR the first time in history the Automobile Association of Tanzania. in collaboration with Federation de International Automobiles (FIA), has staged a successful two-day training of Go-karting for young drivers in Dar es Salaam over the weekend.

The training got underway with FIA-approved training providers from Motorsport South Africa with highly experienced trainer, Steve Harding, at the helm.

He was assisted by 23-year-old Tristen De Nobrega. Nobrega has previously won many karting events in South Africa.

Participants for the workshop were drawn from the AAT drivers' instructors, training clock team, safety team, marshals and others.

The workshop was opened by the AAT president Nizar Jivani who underscored the need to train young drivers whom should adopt road safety culture right from a tender age.

He also said plans are underway to stage training of young drivers across Dar es Salaam and beyond depending on availability of resources.

After theoretical knowledge on Friday, all participants joined a practical session the following morning at the Shaaban Robert Secondary School parking yard.

Chief trainer Harding said the workshop has been highly a success as trainees gained knowledge enough to impart to children.

Those who featured in the training included Samuel Saleh, Athuman Hamis, Juma Mpuluma, Ahmed Kulimba, Alex Mundaba, Wedson Mwakalundwa, Abdul Suleiman, Athuman Majapa, Salim Mchume, Mohamed Ugasa and Jonas Mchome. Dar es Salaam Regional Sports

Officer Adolf Halii who was among the dignitaries attending the workshop said he has been highly impressed by a handin-glove cooperation extended by AAT in various motorsport as well as road safety initiatives.

es Salaam on Friday. PHOTO: GUARDIAN CORRESPONDENT

The Tanzania Traffic Police Head of Education and Training, Superintendent of Police (SP), Abel Swai, was also present and reiterated the need by organisers of

motorsport events to secure permission and approval from AAT.

He said no motorsport event can be staged in the country without a nod from AAT.

South African instructor Tristen De Nobrega (in blue shirt, C) insists a point during AAT-FIA organised Go-Karting training staged in Dar

The AAT chief executive officer Yusuf Ghor expressed his sincere appreciation to all participants who attended the workshop as well as firms that stepped up to facilitate smooth running of the

event

These included Dar Fresh's Milcom/ Watercom and Shaaban Robert Secondary School management that provided the car park for open training. Tanzania is the second country in the continent to get FIA donation of two

karting cars after Ethiopia. Other countries expected to join the FIA list include Namibia and Zambia.

The dark side of a sport many still love

By TIM DAHLBERG

IT's impossible to reconcile, so I won't even try.

How can you love a sport so filled with tragedy and heartbreak? How can you cheer when you know getting hit in in the head can cause so much harm?

JASON STATHAM

Q: What is the film about?

Statham: "It's about two guys that do not want to be in the same room as each other. have to put their differences to one side for the greater good of saving the world."

Q: How did the idea of a spin-off come about?

Statham: "We did part 8 (where) we had a couple of great moments face to face, and people responded to the animosity and the tension in the room when we were trying to kill each other. We expanded on that and people wanted to see more of it."

Q: What's the secret of the "Fast & **Furious**" success?

Statham: "It's down to the characters ... people relate to characters they either like or don't like ... The action hero was coined by Arnold (Schwarzenegger) and Sylvester Stallone, there was something about them that was relatable or their humour or there was just something about their personality ... We are drawn to see these people overcome the odds."

game ... (They) have been action movies for like 20 years ... I was like a kid in a candy shop watching these guys do that."

Q: Did you do your own stunts?

Elba: "I did a lot of the fighting sequence stunts myself, some of the bike stunts I did myself and that's because (director) David (Leitch) wants to have you in the frame ... We did a lot of training for fitness because he does long takes and we got in there as much as possible."

Q: You wrote a song on your iPad during filming, how did that happen?

Elba: "There's always set up times in between shots ... in that time space I always have something to do and it's typically playing FIFA (video games) or making music. And I wrote a song that is in the movie, in the chase sequence."

Q: Is your DJing and music a second career?

Elba: "Second career for sure, I've been DJing all my life, but now I can say it's a career because I'm loving it, it's very grounding for me.'

REUTERS

Sweden rebuffs Trump over US rapper charges, saying courts independent

STOCKHOLM

SWEDEN on Friday dismissed an angry outburst from U.S. President Donald Trump after prosecutors charged U.S. rapper A\$AP Rocky with assault, saying the country's judicial system was independent of political interference.

Best known for his song "Praise the Lord", the 30-year-old performer, producer and model, whose real name is Rakim Mayers, was detained about three weeks ago following a street altercation with two men in Stockholm on June 30. A\$AP Rocky, who was charged on Thursday, will go on trial this week.

Trump, who last week urged Swedish Prime Minister Stefan Lofven to free A\$AP Rocky, fired off tweets on Thursday saying he was "very disappointed" in Lofven and demanding: "Treat Americans fairly!" Trump added: "We do so much for Sweden but it doesn't seem to work the other way around. Sweden should focus on its real crime problem! #FreeRocky." A spokesman

for the Swedish government said on Friday the government would not get involved in the case.

"Sweden and Prime Minister Stefan Lofven have been very clear in the dialogue with both the White House and directly with the American president, that in Sweden everyone is equal before the law and that the government cannot interfere in legal proceedings," the spokesman said in a text message.

Mayers has said he is innocent and that the men provoked him and his two companions, who have also been charged with assault. If convicted, they could face up to two years in jail.

Trump has said he would personally vouch for Mayers' bail. Sweden does not have a bail system. Former prime minister Carl Bildt told the daily Aftonbladet that Lofven was right not to comment further on the case.

"I think it's right of the government not to go into a mud wrestling match with Trump. That is his element, and should not be Sweden's," Bildt said

Maxim Dadashev wasn't a world champion. He didn't have an entourage like Manny Pacquiao, and no one paid \$74.99 to see him fight on pay-per-view. Like many young boxers, though, the Russian did have a dream. He would become a world champion one day, a goal that seemed possible after he won his first 13 fights, 11 by knockout.

"He was a lovely young man, totally dedicated to boxing," said his promoter, Bob Arum. "We thought he was going to be somebody who would be contending for a world title in the 140-pound division."

Dadashev never got that chance. In a fight last week televised by ESPNplus, Dadashev went 11 grueling rounds in Maryland with Subriel Matias, taking more and more punishment as the fight went on before his corner finally stopped it.

Four days later, Dadashev was dead from bleeding in the brain. He was 28. Just what went wrong can be – and will be – debated. Arum's matchmakers never thought Dadashev would take a beating to begin with. They thought he would win the fight, another in a progression that would hopefully lead to a title bout.

"He seemed OK. He was ready," trainer Buddy McGirt, a former fighter and member of the International Boxing Hall of Fame, told ESPN. "But it's the sport that we're in. It just takes one punch, man."

It was McGirt who finally stopped the fight, even as Dadashev continued to fight back. Dadashev protested when told the fight would be stopped, intent on finishing the final round and maybe landing one big punch to turn it around. Sometimes fighters have to be saved from themselves. But sometimes they can't be saved at all.

Dadashev needed help leaving the ring and collapsed before getting to his dressing room. He was taken by ambulance to a hospital, where he underwent surgery for bleeding on the brain, and died on Tuesday.

A few days later there was another boxing death, this one in Argentina. Hugo Santillan, a 23-year-old Argentinian, died five days after collapsing following his

In this Oct. 20, 2018, file photo, Maxim Dadashev, of Russia, left, hits Antonio DeMarco, of Mexico, during a junior welter bht bout in Las Vegas. Maxim Dadashev has died after suffering a brain injury in a fight in Maryland. He was 28. The Russian Boxing Federation said Tuesday, July 23, 2019, that Dadashev died "as a result of the injuries he sustained" in Friday's, July 19, 2019, light-welterweight fight with Subriel Matias at the Theater at MGM National Harbor in Oxon Hill, Maryland. (AP Photo)

super lightweight bout against Uruguayan Eduardo Abreu. The statistics will say it's an aberration and, indeed, there are years that go by without even one death in a pro fight. Sports like cycling, football and baseball that more people engage in account for far more brain injuries.

But no one disputes that boxing is an inherently brutal sport that can not only kill but cause long-term brain damage. Muhammad Ali was the most famous and celebrated fighter ever, but even he wasn't immune. The punches he took over his career brought on Parkinson's that silenced his once magnificent voice in his later years.

Still, we watch. Still, we celebrate the violence.

"We know that any blow to the head is potentially traumatic," said Martin Mortazavi, a brain surgeon and medical director of the California Institute of Neuroscience. "We also know football causes injuries but people still do it. But these are accepted sports and part of the sport is you take blows to the head. It intertwines with our cultural addictions when we are used to something."

I've covered boxing for the better part of four decades now, and if there were any illusions about the dangers of the sport they were shattered early by the death of Duk Koo Kim at the hands of Ray "Boom Boom" Mancini in 1982. I was ringside for that fight outdoors at Caesars Palace, and there when Kim's family came from South Korea to take his body home. I also sat in a neurologist's office with former heavyweight champion Leon Spinks and his family when he was diagnosed with brain damage, and spent an afternoon with former middleweight champion Gerald McClellan, who was left blind and brain damaged after his 1995 title fight with Nigel Benn.

McClellan held my hand as we sat together on a couch and asked me the same questions over and over again.

"Tim, what's your favorite color? Tim, what's your favorite food?"

I walked out of McClellan's home in Illinois shaken and wondering why I would be involved in a sport that did such damage. But a few weeks later I was back at ringside, writing about other fighters with the same dreams.

That didn't stop me – and many others – from cringing earlier this year when heavyweight champion Deontay Wilder said he needed to get a body on his record and that "this is the only sport where you can kill a man and get paid for it at the same time." Wilder was trying to sell a fight, but his comments were not only over the line but deeply troubling.

Arum said this is the first time a fighter he promotes has died in the ring, though he has promoted fights with deaths three times, including Duk Koo Kim. He's planning on paying funeral expenses and making what he said will be a large donation to a GoFundMe account for the fallen Russian fighter.

"It's a horrible, horrible tragedy," Arum said. "He had a young family. It's beyond tragic.'

There are other things that can happen, too. Medical regulations need to be standardized across states, and all fighters need to have baseline brain scans and annual scans if they are to be allowed to fight.

But Dr. Mortazavi says no one can easily predict who will be hurt by punches and who will emerge unscathed. So far researchers have not been able to figure out why a fighter with 100 fights might show no symptoms of any kind of brain trauma, while one with 13 fights does.

I wish I had the answer.

And I wish I didn't care so much for a sport that can hurt so badly.

Arsenal gambling big with summer spending spree Valverde backs Griezmann to connect with Messi, Suarez

KOBE

BARCELONA coach Ernesto Valverde is confident new signing Antoine Griezmann will have no problems linking up with strike partners Lionel Messi and Luis Suarez when the trio finally appear in the same team together.

Griezmann, who signed from La Liga rivals Atletico Madrid earlier this month, has been with the squad on Barcelona's tour of Japan and featured in the side's 2-0 win over Vissel Kobe on Saturday.

However, following their exploits in the Copa America, Messi and Suarez have been given an extended break and will not link up with the team until they return from Japan.

With 682 La Liga goals between them, Valverde is understandably excited about the attacking trident and believes Griezmann might be the missing part of the puzzle as Barcelona chase their first Champions League trophy since 2015.

"It's true that some players who are good fit in together easier," said Valverde

"We will see the relationship socially and at the camp. We are excited for this opportunity.

"We believe in balance in the

team, in front or in the back, he (Griezmann) moves quick, he passes well, and finds space and this is what we were missing."

Two second-half goals from 21-year-old academy graduate Carles Perez were enough to seal the win over Kobe, who featured former Barca players Andres Iniesta, David Villa and Sergi Samper on Saturday. "Carles Perez scored two goals today, so it's a good news for his potential and shows how we can bring the young guys forward," Valverde said. Former Barca captain Iniesta, who left the club after 16 trophyfilled years last year, said it was an odd afternoon playing against for-

"Well, it's a bit strange of course (to play against Barcelona)," said the 35-vear-old.

"You spend so long playing with the same players... it's strange, special.

"But at the start of the match you Barcelona's next pre-season

Dani Alves 'looking for a job' amid

LONDON

DANI Alves is still waiting on offers this summer, with the legendary Brazilian full-back admitting on social media that is "looking for a job" after dropping into the free agent pool.

The 36-year-old finds himself without a club after leaving Paris Saint-Germain at the end of his contract.

He opted against committing to fresh terms with the French champions, with another fresh start being sought.

Several landing spots have been mooted for the Barcelona legend, with leading sides across Europe said to be keen on acquiring his experience and ability.

It has been confirmed to Goal

mer team mates such as Sergio Busquets and Ivan Rakitic.

are clearly focusing on playing and trying to give a good impression." match is against Arsenal at the Nou Camp on August 7.

in an effort to tout his services, say-

ing: "Looking for a job, where do I put my resume? "Someone let me know if you have time to read!" Manchester City are another of those to have been linked with

Alves, with Pep Guardiola having previously worked with the iconic defender at Barcelona. The Blues boss has, however,

distanced himself from those rumours, saying: "All the important clubs in the world know his situation and the incredible player he is. "He's an extraordinary person too but now we have two incredible full backs."

Wherever Alves ends up, he has made it clear that he will only be joining a project of serious ambition.

LONDON

JUST two measly weeks ago, Arsenal board member Josh Korenke - son of owner Stan Kroenke - told the public, "It's no secret that we have a Champions League wage bill on a Europa League budget right now. That's a fact. And one that we're figuring out how to face internally at the moment."

His words were in response to an open letter from Arsenal supporter groups that claimed the club's "approach to both buying players and paying wages looks uncoordinated and appears to lack strategy." Days later, despite media claims that the club is operating on a summer budget of just \$50 million, the Gunners were reportedly smashing the club transfer record for Lille winger Nicolas Pepe. So what gives?

There's no other conclusion: the club is betting on itself. The Pepe transfer tells the story, as the club has deferred much of the payments to installments over the course of the year, hoping to ease the immediate financial burden with the budget currently strapped. The decision to spend future funds now is a dangerous risk, but could pay off should the club reach the Champions League. Kroenke explicitly said the team is currently operating on a Champions League wage budget, despite beginning a third consecutive season outside Europe's top competition. It's clear that three Europa League seasons in a row is beginning to have an effect on the operating costs at the Emirates. Adding a club-record transfer fee plus wages competitive to lure Pepe to the Emirates seems counter to a logical resolution, but by betting on the team, the front office is pushing the team forward in an ambitious and positive direction.

Undoubtedly, there's huge risk involved with such a push. Should the Gunners yet again miss out on the Champions League either by a top four finish in Premier League play or by winning the Europa League, there could be disastrous consequences. The Premier League television money is free-flowing, but going another year without Champions League prize money and media rights could be disastrous for the current financial structure.

One questionable decision is the choice to bolster the attack rather than patch up the defensive line, an area the club struggled mightily with at times last year. With captain Laurent Koscielny pushing to leave the club, it leaves Sokratis, Shkodran Mustafi, and Konstantinos Mavorpanos as the only healthy central defenders, with Rob Holding still recovering from his ACL tear suffered, although he is expected to return soon. On the flanks are Sead Kolasinac, Nacho Monreal, Ainsley Maintland-Niles, and Hector Bellerin, with Calum Chambers versatile enough to play anywhere along the back or in midfield.

Is that a Champions League defensive unit? It's hard to see how it would be, yet Arsenal has decided to splash the cash up front and hope they can outscore teams enough to reach the promised land. Other than Pepe, the Gunners spent money on winger Gabriel Martinelli, an 18-year-old Brazilian, and young defender William Saliba who was sent back on

loan to St. Etienne.

The Gunners have taken a calculated risk, one they believe to be beneficial to the long-term health of the club. Should it pay off, Arsenal could be set up for a long stay near the top of the Premier League with a young attacking core and some youth at the back as well. But if they miss, the financial detriment to the club could be even more devastating than what they are set to potentially gain, as Financial Fair Play could be a factor down the road if Champions League riches never arrive.

Meanwhile, Arsenal's managing director Vinai Venkatesham has refuted claims that the club only have £40 million (\$50m) to spend this summer, while head of football Raul Sanllehi is expecting further movement before the window slams shut.

It had been suggested that Gunners boss Unai Emery would have to work on another limited budget as those in north London endeavour to force their way back into contention for Champions League qualification.

Venkatesham is, however, adamant that no cap has been put on spending, with deals having already been tied up for William Saliba and Dani Ceballos and there the promise of more to come.

He told fans at the annual supporters' club Q&A: "I don't recognise this £40m figure, I have read it a lot. That doesn't come from us, that doesn't come from the club.

The numbers never come from us. "We never ever, ever, ever talk about how much money we have to spend because that's the least helpful thing you can do. Raul's job is hard enough, if you go into a negotiation and everyone knows how much money you've got, it doesn't really help.

"It is true that our funds are more limited after three years in the Europa League, but the budget isn't £40m. We have the budget to make a difference but this is a particularly tough window and we're in the middle of it. I sense and understand the frustration, but there is a huge amount of misinformation out there in the market.

"I read and am sent articles about players we're supposed to have missed out on and they're players we've never even talked about. I get why sometimes it's hard for fans to understand what we're doing, but I'd say that's because about 85% of what vou read just isn't true."

Arsenal continue to be linked with the likes of Celtic defender Kieran Tierney and Lille forward Nicolas Pepe, with Sanllehi conceding that talks with targets are ongoing.

He said when asked if a centre-half would be acquired for this season, with Saliba set to spend the 2019-20 campaign back on loan at St Etienne: "I cannot say a

name because I wouldn't be doing my job.

"If I say a name, I walk out the door tonight and he's £10m more expensive. The transfer window is a moving target, I have been doing this for 16 years now and 1 know that some windows are harder than others. This is a particularly hard window. When I talk with other clubs, this is a common knowledge.

"There is a bit of stagnation in the market and you don't see the number of signings you normally see just yet. I don't know exactly how things will turn out, but I can assure you we are working every hour of every day. I think it's a bit like school, where you evaluate your grade at the end of the school year and not in the middle.

"What is most important is to talk with the coach, about how he is feeling about the team, what system he wants to play. He knows more than anyone, more than me, about what he wants. We're going to do our best and we will keep working, but I will not mention any names.

"Edu joined us recently and is doing great work, but he is not going to be responsible for this window, I want to make this very clear. His real job is going to start in September and he will start planning and working with scouts then. Having said that, he is helping us now, but it would be unfair to say this window is him."

Afcon 2019: Mahrez likens Algeria's triumph to Premier League success with Leicester City

PARIS

ALGERIA captain Riyad Mahrez has described the feeling of winning the 2019 Africa Cup of Nations as the same he had when Leicester City won the English Premier League title three years ago.

Mahrez was one of the standout performers in the 2015-16 season when the Foxes overcame all odds to win their maiden English topflight title.

A week ago, the 28-year-old led Algeria to win their first Afcon title since 1990 after defeating Senegal 1-0 in the final of the continental tournament, thanks to Baghdad Bounedjah's first-half strike.

On his visit to Sarcelles - his place of birth in the northern suburbs of Paris, Mahrez disclosed the confidence and support which helped Algeria to end their 29-year trophy drought.

"There are moments like that in football, you can't even explain," Mahrez told L'Equipe.

"It was like when we won the Premier League title with Leicester.

"We had the feeling that nobody could stop us. At the 2019 Afcon, it was the same feeling.

"We had support from every angle. We had a great team and a great coach. Everything was in place." Mahrez scored three goals in

seven matches in Egypt, while the Afcon success made it four titles the Manchester City winger won this year.

Due to his international commitments with Algeria this summer, Mahrez has been given an extended period of holiday before joining Pep Guardiola's side for the 2019-20 season.

REUTERS

By Tom Kundert, ESPN Portugal writer

AT just 19 years old and after barely half a season of regular senior football, Joao Felix became the fourth-most expensive footballer in history when Atletico Madrid paid Benfica €126 million for the striker dubbed "the new Cristiano Ronaldo."

Despite the astronomical fee, rather than viewing the purchase as an enormous punt, the general consensus is that the Spaniards have done well to stave off opposition from Manchester City and other top clubs, with many speculating that the Colchoneros will more than make their cash back as Felix's value soars in the coming years.

Where has he come from?

After dominating Portuguese football for three decades, Porto have been usurped by Benfica as top dogs in the country in recent years, and the tale of Joao Felix could be seen as a perfect illustration of this shift. Born in Viseu in central Portugal, Felix was on Porto's books from an early age until three years ago. Letting him join their arch-rivals must rank as one of their greatest mistakes.

Felix made quick progress at the Lisbon club's famed Seixal Academy (which has spawned stars such as Bernardo Silva and Andre Gomes), scoring 50 goals in 100 matches for the U17, U19 and B teams.

His impact was immediate when given his senior debut, scoring an equaliser as a late substitute in the Lisbon derby against city rivals Sporting. The Benfica faithful had a new darling. Felix went on to score 20 goals in 43 matches in 2018-19 and became the youngest player to score a Europa League hat trick, triggering his switch from Portugal's capital to that of Spain.

Position

When coming through the ranks, Felix was more of an attacking midfielder than a striker due to his excellent vision and creative passing. In his first senior appearances he usually played on the right side of midfield.

The sacking of Benfica manager Rui Vitoria and promotion of B-team coach Bruno Lage in January was hugely significant. Lage knew Felix well having worked together in the club's youth set-up. "When I got the job the first thing I thought was I'm going to get this kid playing," Lage said in the wake of a tremendously successful season for both of them as Benfica won their 37th league title.

Felix was positioned as the second striker behind big Swiss centre-forward Haris Seferovic. The partnership proved devastating, and the young

as dubbed 'the new Cristiano Ronaldo' before he had even made his full Portugal debut. (Agencies)

forward scored 17 of his 20 goals in his debut season in those final five months of the campaign

Strengths

Felix shoots powerfully and readily with both feet and is surprisingly strong in the air given the teenager's slight frame, but one standout attribute is his instinctive positional sense. Like all the great strikers, he seems to have a sixth sense as regards where the ball will land, together with an uncanny ability to evade his marker. Few of his goals last season were long-range screamers or remarkable individual efforts, but rather clinical and sure-footed finishes from inside the box.

Another noteworthy string to his bow is his absolute confidence of his own ability. While Felix is shy and retiring off the pitch, he is anything but on it. He thrived in the biggest matches, scoring and putting in outstanding displays in crucial away victories at Sporting and Porto, and the way he stood up to intimidating physical treatment from veteran Porto centre-back Pepe spoke that he knew the biggest games were his stage.

by David Chikoko

Weaknesses

Still to fill out and not blessed with pace to burn, Felix remains heavily reliant on service from his teammates to shine. He is not a striker who will run tirelessly in search for the ball, much less one who can hold the line. As a result, on the rare occasions when Benfica's ultra-attacking game was blunted, he became a peripheral figure. At this early stage of his career, his defensive contributions are negligible.

This was also evident in his one senior appearance for Portugal to date, when a well-organised Switzerland cut off the supply line to Felix in his international debut in the Nations League semifinals.

Where he fits in

Felix is a player around whom the team should be built to get the most out of his skillset. A €126m investment suggests Atletico are prepared to do that.

Paradoxically, however, Diego Simeone's teams are known for their defensive solidity and immense work rate when it comes to blocking the opposition's attacking game from the front. It will therefore be fascinating to see whether these two contrasting aspects are reconciled to get the best out of Felix.

Simeone has a history of shopping in Portugal for strikers, with mixed results. Radamel Falcao was a massive hit, while Jackson Martinez was very much a bust, although in terms of playing style Felix could be seen as a like-for-like replacement for Antoine Griezmann.

The player himself is convinced he made the right choice to continue his career's upward trajectory. "I had several clubs interested in me but I ended up choosing Atletico Madrid because I believe it's the club that gives me the best chance to develop," he said at his unveiling last week. "I'm grown up enough to handle this situation."

Winning back vice-captaincy was logical next step for Ben Stokes-Giles

ASHLEY Giles believes Ben Stokes' reinstatement as England vice-captain ahead of the Ashes is the logical next step in his development as a Test allrounder.

In announcing their 14-man squad for the first Test against Australia starting at Edgbaston August 1, the ECB also revealed chairman Colin Graves had approved Stokes' re-appointment on the recommendation of Ashley Giles and chief executive Tom Harrison.

Stokes had been stripped of the role during investigations into the fight outside a Bristol night club in 2017, over which he was ultimately found not guilty of affray. Stokes subsequently faced an ECB disciplinary hearing, which resulted in him being fined and banned for eight international matches in December 2018, a punishment that he had already served in missing five months of cricket, including the 2017-18 Ashes.

Giles, the managing director of England men's cricket, said Stokes was highly respected within the team environment.

"He is a natural leader and has a great understanding of the game," Giles said. "He will offer tremendous support to Joe Root as part of the senior playing group.

"Over the past 18 months, he has come a long way and has shown a great degree of maturity on and off the field.

"I have no doubts that the added responsibility will also help him to continue his rise as a world class allrounder in the Test arena."

Stokes will take over the vice-captaincy from Jos Buttler.

Stokes scored in the 70s and 80s four times in his last five innings at the World Cup and was Player of the Match in the final at Lord's after guiding England's run-chase with an unbeaten 84 from 98 balls, as well as adding a crucial 8 from 3 in the decisive Super Over. Jofra Archer, who is in line to make his Test debut after also being named in England's Ashes squad, credited Stokes with offering some calming words when he was chosen to bowl to New Zealand in their Super Over, with Stokes having been through a similar experience - although with a different outcome when charged with bowling the final over of the 2016 T20 World Cup final against West Indies in Kolkata. "If we had lost today, I don't know what I would have done tomorrow," Archer said at the time. "But Ben Stokes told me even before the over: 'Win or lose, today does not define you. Everyone believes in you.' He came to talk to me because of Kolkata. He probably went through the same emotions but was on the losing side."

Senior national soccer squad 'Taifa Stars' players train in Dar es Salaam mid last week to shape up for the Africa Nations Championship (CHAN) qualifiers' first round encounter with Kenya, which took place in the city yesterday. PHOTO: COURTESY OF TFF

Taifa Stars manage barren draw with Harambee Stars

By Guardian Reporter

SENIOR national soccer team, Taifa Stars, have experienced a wobbly star to their campaign in the Africa Nations Championship (CHAN) qualifiers, given they posted a 0-0 draw with Kenya's Harambee Stars in the first round's first leg that was played in Dar es Salaam yesterday.

Taifa Stars, therefore, face an uphill task

had intercepted a pass by forward Ayoub Lyanga, aimed at fellow forward Bocco, a few meters from the former's box.

A fierce long range effort by the hosts' midfielder Jonas Mkude flew across the visitors' goal on the 38th minute as the hosts stepped up pursuit of an opener.

The two squads failed to find each other's back of the net when the first period came to an end.

a date to be announced later.

The competition's finals will be held in Cameroon in January next year.

The CHAN is a football tournament which was first announced on September 11, 2007. It is organized by the Confederation of African Football (CAF) and is played between the best national teams of Africa.

The national teams of Airica. The national teams exclusively feature players who are active in the national cham-

Jeshi Stars hold sway in National Volleyball Club Championship

By Correspondent Michael Sikapundwa, Morogoro

DAR ES SALAAM's Jeshi Stars teams have won this year's national Volleyball Club Championship which climaxed at JKT Hall venue in Morogoro last weekend.

The five-day tournament, opened by Deputy Minister for Information, Culture, Arts and Sports, Juliana Shonza, had Morogoro Regional Administrative Secretary (RAS), Clifford Tandari, gracing the climax.

Jeshi Stars' men's squad lifted the trophy after commanding 3-1 win over Mwanza Transit Camp team in the final.

Jeshi Stars' women team emulated their male counterparts' exploits, winning the women category's top honour with a hard-fought 3-2 victory over Star Girls in an all-Dar es Salaam final.

Jeshi Stars' men's team went down 23-25 to Mwanza Transit Camp in the first set, a situation that forced the Dar es Salaam team's skipper, Godwin Ekingo, to opt to change game approach in an effort to turn the team's fortunes around.

The approach paid off given Jeshi Stars bounced back in the following set, winning 25-13. They went on to win 25-21 in the third set and made certain of their victory with a win in the following set.

Taifa Stars showcased determination to control the proceedings early on, given they went close twice in the first two minutes of the yesterday clash that took place at the National Stadium.

In the first of the hosts' opportunities, Taifa Stars forward Idd Selemani pounced a poor clearance by a Kenya defender within the latter's area, Selemani then released fellow forward John Bocco that unleashed an effort which was blocked by a defender.

The hosts' left fullback Gadiel Michael floated in a cross that was met by striker Ayoub Lyanga, the forward's effort went over the opponents' crossbar.

Taifa Stars' fullback Paul Godfrey was set up by team mate on the sixth minute, the fullback's delivery into Kenya's area was however poor, given it went straight into the hands of Kenya's keeper John Oyemba.

The visitors began attempting to impose themselves in the game in the latter stages of the opening stanza, putting the hosts' defense under pressure on several occasions. The visitors' defense was later under

pressure after one of the squad's defenders

Flexibles by David Chikoko

Taifa Stars got two chances early in the second stanza only to be let down by profligacy in the opponents' box.

They won a free kick a few meters the opponents' box, an effort Michael went over.

A well taken kick by Michael a minute later was also wasted, given the team's forwards failed to connect it in.

Taifa Stars' defense had to stand firm a few minutes later, as Kenya made two dangerous moves.

The hosts' interim head coach, Etienne Ndayiragije, opted for substitutions later on in an effort to boost pursuit of goals.

He brought in young forward Kelvin Pius in place of midfielder Hassan Dilunga and midfielder Ibrahim Ajibu that had replaced Lyanga.

The move injected fresh zeal in the hosts' squad, given it made several good moves but still failed to make the most of opportunities the team got.

It was an end to end affair in the remaining minutes with both squads going close now and then.

The aggregate winners will lock horns with Sudan in the final qualifying round at

pionships and qualified to play in the ongoing season.

Expatriate players, regardless of where they play, even in Africa, are not qualified to take part in the Africa Nations Championship.

The first tournament was held in 2009. It was hosted by Ivory Coast and won by Democratic Republic of Congo.

The competition was expanded to 16 teams for the second tournament, held in Sudan in 2011.

The tournament was won by Tunisia, in the wake of the Tunisian Revolution.

The tournament is held every even years, alternating with the Africa Cup of Nations.

Stars took part in the maiden CHAN finals that was held in 2009. The competition, hosted by Ivory Coast and won by Democratic Republic of Congo, saw Stars crash out of the group stage.

The Tanzania squad was put in Group A of the tournament with Senegal, Zambia and hosts, Ivory Coast.

Taifa Stars conceded 1-0 loss to Senegal in the first match and later on, the former lost 1-0 to the hosts.

Stars wrapped up their group stage campaign with 1-1 draw with Zambia. It was hardly plain sailing for Jeshi Stars' ladies as they were forced to knuckle down to their victory over their opponents.

Jeshi Stars lost 22-25 in the opening set, prompting the team's coach Nassoro Shariff to change tactics and the decision helped the side post 25-15 in the second set.

Moro Stars regrouped to register 26-28 win in the following set to bring the match to the fifth set tie-break, which was won by their opponents.

The champions were presented with trophies and gold medals, runners-up got silver medals whilst Moro Stars and Kigamboni Girls that were runners-up in men and women categories respectively received bronze medals.

Clifford presented awards to the competition's Most Valuable Players (MVPs), namely Flora Stephano of Moro Stars and Jackson Mmari of Jeshi Stars.

Others that received honours include best referee Salim Yusuph that was presented with the event's best referee honour, Moro Stars' coach Yusuf Mkarambati that got the best coach honour in the women category.

Shariff was presented with the men's category best coach honour, senior players, Neema Ngowi of Jeshi Stars and Shukuru Ally of Moro Stars, also received honours for coaching junior players.

Clifford congratulated all participating teams. He also hailed Moro Stars' teams, which put poor showing in the last year's tournament which took place in Dodoma, for finishing third this season.

The official noted the Morogoro teams have, in the process, regained the trust Morogoro fans had in the squads.

"It is my pleasure to have watched the team put good showing in the matches. They battled tirelessly and succeeded to win and they have promised changes in the next competition," he said.

Don'T LET THAT secretary of Yours Fall IN Love WITH YOU! WHAT DO I CARE IF I'M SO HANDSOME!
